Ambient Communications and Computer Systems Gregorio Martinez Perez,Shailesh Tiwari,Munesh C. Trivedi,Krishn K. Mishra,2018-03-20 This book includes high-quality, peer-reviewed papers from the International Conference on Recent Advancement in Computer, Communication and Computational Sciences (RACCCS-2017), held at Aryabhatta College of Engineering & Research Center, Ajmer, India on September 2–3, 2017, presenting the latest developments and technical solutions in computational sciences. Data science, data- and knowledge engineering require networking and communication as a backbone and have a wide scope of implementation in engineering sciences. Keeping this ideology in mind, the book offers insights that reflect the advances in these fields from upcoming researchers and leading academicians across the globe. Covering a variety of topics, such as intelligent hardware and software design, advanced communications, intelligent computing technologies, advanced software engineering, the web and informatics, and intelligent image processing, it helps those in the computer industry and academia use the advances of next-generation communication and computational technology to shape real-world applications.

An Introduction to Music Technology Dan Hosken,2014-08-01 An Introduction to Music Technology, Second Edition provides a clear overview of the essential elements of music technology for today's musician. This book focuses on the topics that underlie the hardware and software in use today: Sound, Audio, MIDI, Computer Notation, and Computer- Assisted Instruction. Appendices cover necessary computer hardware and software concepts. Written for both music technology majors and non-majors, this textbook introduces fundamental principles and practices so students can learn to work with a wide range of software programs, adapt to new music technologies, and apply music technology in their performance, composition, teaching, and analysis. Features: Thorough explanations of key topics in music technology Content applicable to all software and hardware, not linked to just one piece of software or gear In-depth discussion of digital audio topics, such as sampling rates, resolutions, and file formats Explanations of standard audio plug-ins including dynamics processors, EQs, and delay based effects Coverage of synthesis and sampling in software instruments Pedagogical features, including: Further Reading sections that allow the student to delve deeper into topics of interest Suggested Activities that can be carried out with a variety of different programs Key Terms at the end of each chapter What Do I Need? Chapters covering the types of hardware and software needed in order to put together Audio and MIDI systems A companion website with links to audio examples that demonstrate various concepts, step-by-step tutorials, relevant hardware, software, and additional audio and video resources. The new edition has been fully updated to cover new technologies that have emerged since the first edition, including iOS and mobile platforms, online notation software, alternate controllers, and Open Sound Control (OSC).

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang,2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Table of Contents

Easter Lily Margaret Knight, 2006-02-16 Continuing the saga of Sam and Tony Brownfield, portrayed in “Ginger Lily”, Sam and Tony are living in Barbados, in the west coast beach house - named Ginger Lily- and getting on with their lives, bringing up Sam and Albert’s son, Ray, and Tony’s son, Douglas, and daughter, Charmaine. All is going well until Albert appears on the scene. He had re-married in London, but when the second wife left him he decided to return to Barbados and help run his parents’ small farm. Some conflict and intrigue follow this move, but Tony and Sam remain steadfast in their marriage. Ray and Douglas are at boarding-school in England, and Doug springs a surprise - not an altogether pleasant one – on the family. Social events and intriguing political activities form an expose into life in Barbados in the 1960’s and 70’s. Albert surprises everyone by becoming a Born Again Christian, marries a Canadian woman and goes off to Canada to live. Unfortunately, tragedy follows, but is eventually coupled with some joy.

Social Security Financing T. Whitaker, 1997 This is the third in a series of manuals produced by the Social Security Department of the ILO. Focusing on the financing of social security, the manual presents a stand-alone text which can be referred to independently of the others. The book is aimed primarily at countries where the social security system is not yet operational, or is undergoing change, in particular developing countries and countries in transition.; It begins with a module which looks at social protection systems and their economic environment and the second module examines in detail the principles of financing and financia.

Evans + Shalev Joseph Rykwert, 2020 Eldred Evans and David Shalev are among Britain's most respected architects. The first monograph on their work, this book covers their entire sixty-year career including cultural landmarks such as Bede's World Museum, Jarrow, and Tate St Ives.

Hybrid Intelligent Systems Ajith Abraham, Thomas Hanne, Oscar Castillo, Niketa Gandhi, Tatiane Nogueira Rios, Tzung-Pei Hong, 2021-04-16 This book highlights the recent research on hybrid intelligent systems and their various practical applications. It presents 58 selected papers from the 20th International

Conference on Hybrid Intelligent Systems (HIS 2020) and 20 papers from the 12th World Congress on Nature and Biologically Inspired Computing (NaBIC 2020), which was held online, from December 14 to 16, 2020. A premier conference in the field of artificial intelligence, HIS - NaBIC 2020 brought together researchers, engineers and practitioners whose work involves intelligent systems, network security and their applications in industry. Including contributions by authors from 25 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of science and engineering.

Music Technology and the Project Studio Dan Hosken, 2012-03-15 Music Technology and the Project Studio: Synthesis and Sampling provides clear explanations of synthesis and sampling techniques and how to use them effectively and creatively. Starting with analog-style synthesis as a basic model, this textbook explores in detail how messages from a MIDI controller or sequencer are used to control elements of a synthesizer to create rich, dynamic sound. Since samplers and sample players are also common in today's software, the book explores the details of sampling and the control of sampled instruments with MIDI messages. This book is not limited to any specific software and is general enough to apply to many different software instruments. Overviews of sound and digital audio provide students with a set of common concepts used throughout the text, and Technically Speaking sidebars offer detailed explanations of advanced technical concepts, preparing students for future studies in sound synthesis. Music Technology and the Project Studio: Synthesis and Sampling is an ideal follow-up to the author's An Introduction to Music Technology, although each book can be used independently. The Companion Website includes: Audio examples demonstrating synthesis and sampling techniques Interactive software that allows the reader to experiment with various synthesis techniques Guides relating the material in the book to various software synthesizers and samplers Links to relevant resources, examples, and software

Twenty Observations on a World in Turmoil Ulrich Beck, 2013-04-26 Translated by Ciaran Cronin. The world is a state of turmoil. From the financial crisis to the chaos in the eurozone, from the Arab uprisings to protests in Athens, Barcelona, New York and elsewhere, many of the familiar frameworks are collapsing and we have to find new ways to orient ourselves in a world undergoing rapid change. Of course, it is necessary for political leaders to address local issues and react to people's specific demands, but without a cosmopolitan outlook, such a reaction is likely to be inadequate. Ulrich Beck's *Twenty-one Observations on a World in Turmoil* is a demonstration of cosmopolitan politics in practice. It is more than a mirror: it is a magnifying glass that brings into focus the processes that are transforming our world and highlights the great challenges we face today. 'Global domestic politics', the concept introduced and developed by Beck, is much more than a political theory, a philosophical utopia (or dystopia), a governance programme or a mental state: it is the reality of our times. Beck turns the argument that 'global domestic politics' is an unrealistic ideology on its head, arguing that it is the proponents of the national who are the idealists. They view reality through the obsolete lenses of the nation-state and thus cannot see the profound global changes that are transforming our reality. Global domestic politics is therefore a perspective, a political reality and a normative idea. And it is the critical theory of our times since it challenges the most profound truths which we hold dear: the truths of the nation.

Processing the Past Francis X. Blouin Jr., William G. Rosenberg, 2012-12-18 Processing the Past explores the dramatic changes taking place in historical understanding and archival management, and hence the relations between historians and archivists. Written by an archivist and a historian, it shows how these changes have been brought on by new historical thinking, new conceptions of archives, changing notions of historical authority, modifications in archival

practices, and new information technologies. The book takes an archival turn by situating archives as subjects rather than places of study, and examining the increasingly problematic relationships between historical and archival work. By showing how nineteenth- and early twentieth-century historians and archivists in Europe and North America came to occupy the same conceptual and methodological space, the book sets the background to these changes. In the past, authoritative history was based on authoritative archives and mutual understandings of scientific research. These connections changed as historians began to ask questions not easily answered by traditional documentation, and archivists began to confront an unmanageable increase in the amount of material they processed and the challenges of new electronic technologies. The authors contend that historians and archivists have divided into two entirely separate professions with distinct conceptual frameworks, training, and purposes, as well as different understandings of the authorities that govern their work. *Processing the Past* moves toward bridging this divide by speaking in one voice to these very different audiences. Blouin and Rosenberg conclude by raising the worrisome question of what future historical archives might be like if historical scholars and archivists no longer understand each other, and indeed, whether their now different notions of what is archival and historical will ever again be joined.

Currents of Archival Thinking Heather MacNeil, Terry Eastwood, 2017-01-09 With new technologies and additional goals driving their institutions, archives are changing drastically. This book shows how the foundations of archival practice can be brought forward to adapt to new environments—while adhering to the key principles of preservation and access. Archives of all types are experiencing a resurgence, evolving to meet new environments (digital and physical) and new priorities. To meet those changes, professional archivist education programs—now one of the more active segments of LIS schools—are proliferating as well. This book identifies core archival theories and approaches and how those interact with major issues and trends in the field. The essays explore the progression of archival thinking today, discussing the nature of archives in light of present-day roles for archivists and archival institutions in the preservation of documentary heritage. Examining new conceptualizations and emerging frameworks through the lenses of core archival practice and theory, the book covers core foundational topics, such as the nature of archives, the ruling concept of provenance, and the principal functions of archivists, discussing each in the context of current and future environments and priorities. Several new essays on topics of central importance not treated in the first edition are included, such as digital preservation and the influence of new technologies on institutional programs that facilitate archival access, advocacy, and outreach; the changing legal context of archives and archival work; and the archival collections of private persons and organizations. Readers will also learn how communities of various kinds intersect with the archival mission and how other disciplines' perspectives on archives can open new avenues.

Driven from Home David Hollenbach, SJ, 2010-04-19 Throughout human history people have been driven from their homes by wars, unjust treatment, earthquakes, and hurricanes. The reality of forced migration is not new, nor is awareness of the suffering of the displaced a recent discovery. The United Nations High Commissioner for Refugees estimates that at the end of 2007 there were 67 million persons in the world who had been forcibly displaced from their homes—including more than 16 million people who had to flee across an international border for fear of being persecuted due to race, religion, nationality, social group, or political opinion. *Driven from Home* advances the discussion on how best to protect and assist the growing number of persons who have been forced from their homes and proposes a human rights framework to guide political and policy responses to forced migration. This thought-provoking volume brings together contributors from several disciplines, including international affairs, law, ethics, economics, and theology, to advocate for better responses to

protect the global community's most vulnerable citizens.

The Basics of Process Mapping, 2nd Edition Robert Damelio, 2011-05-11 The bestselling first edition of this influential resource has been incorporated into the curriculum at forward thinking colleges and universities, a leading vocational technical institute, many in-house corporate continuous improvement approaches, and the United Nations' headquarters. Providing a complete and accessible introduction to process maps, The Basics of Process Mapping, Second Edition raises the bar on what constitutes the basics. Thoroughly revised and updated to keep pace with recent developments, it explains how relationship maps, cross-functional process maps (swimlane diagrams), and flowcharts can be used as a set to provide different views of work. New in the Second Edition: Four new chapters and 75 new graphics An introduction to the concepts of flow and waste and how both appear in knowledge work or business processes A set of measures for flow and waste A discussion of problematic features of knowledge work and business processes that act as barriers to flow Seven principles* and 29 guidelines for improving the flow of knowledge work A detailed (actual) case study that shows how one organization applied the principles and guidelines to reduce lead time from an average of 28 days to 4 days Unlike tool books or pocket guides that focus on discrete tools in isolation, this text use a single comprehensive service work example that integrates all three maps, and illustrates the insights they provide when applied as a set. It contains how to procedures for creating each type of map, and includes clear-cut guidance for determining when each type of map is most appropriate. The well-rounded understanding provided in these pages will allow readers to effectively apply all three types of maps to make work visible at the organization, process, and job/performer levels. *The Seven principles are integrated into Version 3 of the body of knowledge used for Lean certification by the ASQ/AME/SME/SHINGO Lean Alliance. This is the first publication of those principles and guidelines.

The Camomile Lawn Mary Wesley, 2013-11-12 International Bestseller: A novel of youthful love and loss and “a powerful evocation of the war years” in England (The Guardian). On a hot August evening in 1939, cousins Oliver, Calypso, Polly, Walter, and Sophy spent one last night together, celebrating the end of summer, at the home of their aunt and uncle. Now, forty years later, as the motley cast of characters drive to the funeral of one of their own, they recall how important that night truly was—and all that came after. From Oliver, whose desperation to prove himself in war ended up as his downfall, to Calypso, whose flirtations landed her in an unlikely marriage with even less likely results, to Sophy, whose secrets from that night haunted her for the rest of her life, each of them recalls the twisted paths of love and betrayal they walked as the country came apart around them under the coming shadow of World War II. Mary Wesley masterfully interweaves tragedy and humor in this “extraordinarily accomplished and fast-moving” novel, presenting a tale of both the world at large and the dalliances, allegiances, and losses of her expertly crafted characters (Financial Times).

Forensic Science: a Very Short Introduction Jim Fraser, 2020-02-27 Forensic science is a subject of wide fascination. What happens at a crime scene? How does DNA profiling work? How can it help solve crimes that happened 20 years ago? In forensic science, a criminal case can often hinge on a piece of evidence such as a hair, a blood trace, half a footprint, or a tyre mark. Complex scientific findings must be considered carefully and dispassionately, and communicated with clarity, simplicity, and precision. High profile cases such as the Stephen Lawrence enquiry and the Madeleine McCann case have attracted enormous media attention and enhanced general interest in this area in recent years. In this Very Short Introduction, Jim Fraser introduces the concept of forensic science and explains how it is used in the investigation of crime. He begins at the crime scene itself, explaining the principles and processes of crime scene

management, and drawing on his own personal experience of high profile cases including, the murder of Rachel Nickell and the unsolved murder of Jill Dando. Fraser explores how forensic scientists work; from the reconstruction of events to laboratory examinations. He considers the techniques they use, such as fingerprinting, and goes on to highlight the immense impact DNA profiling has had. Providing examples from forensic science cases in the UK, US, and other countries, he considers the techniques and challenges faced around the world. This new edition has been fully updated to take into account developments in areas such as DNA analysis and drug analysis, and the growing field of digital forensics. Topical areas explored include the growing significance of cognitive bias in forensic science, and recent research that raises doubts about the validity of some forensic techniques. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
