The Origins of the West Semitic Alphabet in Egyptian Scripts Gordon J. Hamilton,2024-02-29 A useful work for all interested in the history of the alphabet. Hamilton shows a direct correspondence between the West Semitic alphabet and its proposed Egyptian counterparts. Following an examination of the various Egyptian prototypes, each grapheme of the various Canaanite scripts is shown and described in exhaustive detail in terms of feature and stance. Subsequently, each individual unit is augmented with a survey of the development of the names of letters and their vocalization, with the author pointing to acrophony, rhyming, and clipping as factors in their nomenclature. Hamilton also provides summary charts of the ancient Egyptian models and West Semitic derivatives.

The New Catalog of Maya Hieroglyphs: The Classic period inscriptions Martha J. Macri,Matthew George Looper,2003 For hundreds of years, Maya artists and scholars used hieroglyphs to record their history and culture. In the nineteenth and twentieth centuries, archaeologists, photographers, and artists recorded the Maya carvings that remained, often by transporting box cameras and plaster casts through the jungle on muleback. The New Catalog of Maya Hieroglyphs, Volume I: The Classic Period Inscriptions is a guide to all the known hieroglyphic symbols of the Classic Maya script. In the New Catalog Martha J. Macri and Matthew G. Looper have produced a valuable research tool based on the latest Mesoamerican scholarship. An essential resource for all students of Maya texts, the New Catalog is also accessible to nonspecialists with an interest in Mesoamerican cultures. Macri and Looper present the combined knowledge of the most reliable scholars in Maya epigraphy. They provide currently accepted syllabic and logographic values, a history of references to published discussions of each sign, and related lexical entries from dictionaries of Maya languages, all of which were compiled through the Maya Hieroglyphic Database Project. This first volume of the New Catalog focuses on texts from the Classic Period (approximately 150-900 C.E.), which have been found on carved stone monuments, stucco wall panels, wooden lintels, carved and painted pottery, murals, and small objects of jadeite, shell, bone, and wood. The forthcoming second volume will describe the hieroglyphs of the three surviving Maya codices that date from later periods.

The New Catalog of Maya Hieroglyphs, Volume Two Gabrielle Vail,Martha J. Macri,2012-11-12 This long-awaited resource complements its companion volume on Classic Period monumental inscriptions. Authors Martha J. Macri and Gabrielle Vail provide a comprehensive listing of graphemes found in the Dresden, Madrid, and Paris codices, 40 percent of which are unique to these painted manuscripts, and discuss current and past interpretations of these graphemes. The New Catalog uses an original coding system developed for the Maya Hieroglyphic Database Project. The new three-digit codes group the graphemes according to their visual, rather than functional, characteristics to allow readers to see distinctions between similar signs. Each entry contains the grapheme's New Catalog code, an image, the corresponding Thompson number, proposed syllabic and logographic values, calendrical significance, and bibliographical citations. Appendices and an index of signs from both volumes contain images of all graphemes and variants ordered by code, allowing readers to search for graphemes by visual form or by their proposed logographic and phonetic values. Together the two volumes of the New Catalog represent the most significant updating of the sign lists for the Maya script proposed in half a century. They provide a cutting-edge reference tool critical to the research of Mesoamericanists in the fields of archaeology, art history, ethnohistory, and linguistics, and a valuable resource to scholars specializing in comparative studies of writing systems and related disciplines.

An Egyptian Hieroglyphic Dictionary E. A. Wallis Budge,2013-01-01 An Egyptian Hieroglyphic Dictionary, a two volume set written by Egyptian expert E.A. Wallis Budge, is quite simply one of the most comprehensive and detailed dictionaries of Egyptian hieroglyphs with English to accompany it. The series includes a detailed Introduction by the author with key words and glyphs, a bibliography of works used to help with translation and research, glyphs organized alphabetically by the Egyptian alphabet with accompanying words and English translations, tables of hieroglyphs with phonetic and numeric values and accompanying translations, lists of both Egyptian kinds and locations, and an Index of both English and Egyptian words. Volume II includes letters S through TCH of hieroglyphs and translations, a list of Egyptian kings and geographical locations, and the Indexes. SIR ERNEST ALFRED THOMPSON WALLIS BUDGE (1857-1934) was born in Bodmin, Cornwall in the UK and discovered an interest in languages at a very early age. Budge spent all his free time learning and discovering Semitic languages, including Assyrian, Syriac, and Hebrew. Eventually, through a close contact, he was able to acquire a job working with Egyptian and Iraqi artifacts at the British Museum. Budge excavated and deciphered numerous cuneiform and hieroglyphic documents, contributing vastly to the museum's collection. Eventually, he became the Keeper of his department, specializing in Egyptology. Budge wrote many books during his lifetime, most specializing in Egyptian life, religion, and language.

Hieroglyphs to Alphabets Charles King,1977 Traces the discovery and gradual interpretation of ancient forms of writing from many archaeologists and historians instrument;a in deciphering these previously neglected scripts.

Understanding Relations Between Scripts Philippa Steele,2017-08-31 Understanding Relations Between Scripts examines the writing systems of the ancient Aegean and Cyprus in the second and first millennia BC, principally Cretan [Hieroglyphic], Linear A, Linear B, Cypro-Minoan and the Cypriot Syllabary. These scripts, of which some are deciphered and others are not, are known to be related to each other. However, the details of their relationships with each other have remained poorly understood and this will be the first volume dedicated solely to this issue. Nine papers aim to reach a better appreciation of relationships between writing systems than has been possible in previous research, through an interdisciplinary dialogue that takes account of both features of the writing systems and the contextual factors affecting the way in which writing was passed on. Each individual contribution furthers this aim by presenting the latest research on the Aegean scripts, demonstrating the great advances in our understanding of script relations that are possible through such detailed and innovative studies.
