Daundlerlust Peter Ross, 2014 Eccentric, humorous, moving, and extraordinary essays about life in Scotland, providing a piece-by-piece portrait of a changing nation.

8-Bit Apocalypse Alex Rubens, 2019-09-10 Before Call of Duty, beforeÂ World of Warcraft, before even Super Mario Bros., the video game industry exploded in the late 1970s with the advent of the video arcade. Leading the charge was Atari Inc., the creator of, among others, the iconic game Missile Command. The first game to double as a commentary on culture, Missile Command put the players' fingers on "the button,†? making them responsible for the fate of civilization in a no-win scenario, all for the price of a quarter. The game was marvel of modern culture, helping usher in both the age of the video game and the video game lifestyle. Its groundbreaking implications inspired a fanatical culture that persists to this day. As fascinating as the cultural reaction to Missile Command were the programmers behind it. Before the era of massive development teams and worship of figures like Steve Jobs, Atari was manufacturing arcade machines designed, written, and coded by individual designers. As earnings from their games entered the millions, these creators were celebrated as geniuses in their time; once dismissed as nerds and fanatics, they were now being interviewed for major publications, and partied like Wall Street traders. However, the toll on these programmers was high: developers worked 120-hour weeks, often opting to stay in the office for days on end while under a deadline. Missile Command creator David Theurer threw himself particularly fervently into his work, prompting not only declining health and a suffering relationship with his family, but frequent nightmares about nuclear annihilation. To truly tell the story from the inside, tech insider and writer Alex Rubens has interviewed numerous major figures from

this time: Nolan Bushnell, founder of Atari; David Theurer, the creator of Missile Command; and Phil Klemmer, writer for the NBC series Chuck, who wrote an entire episode for the show about Missile Command and its mythical “kill screen.” Taking readers back to the days of TaB cola, dot matrix printers, and digging through the couch for just one more quarter, Alex Rubens combines his knowledge of the tech industry and experience as a gaming journalist to conjure the wild silicon frontier of the 8-bit '80s. 8-Bit Apocalypse: The Untold Story of Atari's Missile Command offers the first in-depth, personal history of an era for which fans have a lot of nostalgia.

Ultimate Hendrix John McDermott, Eddie Kramer, Billy Cox, 2009 Guitar legend Jimi Hendrix packed so much into so few years, leaping forward musically with each innovation. Hendrix expert John McDermott chronicles each of Jimi's revolutionary recording sessions, enlisting the help of Hendrix's friend and bandmate Billy Cox, and sound engineer and photographer Eddie Kramer. This beautifully designed, illustrated volume will also include vivid new descriptions of every single live Hendrix concert from 1963 to 1970.

Five Laterals and a Trombone Tyler Bridges, 2022-11-15 In conjunction with the 40th anniversary of The Play—a thrilling and nuanced chronicle of college football's most unforgettable ending The wildest finish ever to a college football game occurred when five laterals on the final kickoff ended with a sprint through the opposing team's marching band—prematurely in celebration on the field—for the winning touchdown. It was 21 seconds of action so unfathomable it has become known simply as The Play. Five Laterals and a Trombone captures the madcap story as it developed in November 1982, tracing the ups and downs, mood swings and hijinks surrounding the 85th Big Game between the University of California at Berkeley and Stanford University. Journalist Tyler Bridges has deftly reconstructed the pivotal moments and resulting lore thanks to hundreds of interviews with all the key figures on both sides of the rivalry, including players, coaches, referees, and stadium personnel. Among the memorable characters are Stanford star quarterback John Elway, Cal linebacker Ron Rivera, the final lateral receiver Kevin Moen, and the immortalized Cardinal trombone player Gary Tyrrell. The Play was not televised live. There was no instant replay—let alone a viral video. In 1982, Steve Wozniak and Steve Jobs, who had founded Apple Computer Company in a garage only 10 miles from the Stanford campus, were just developing the first personal computers. It took hours for news of the rivalry game's outcome to spread across the country, yet football fans would remain enthralled by the bizarre sequence for decades to come. Readers will be transported onto the field and inside the huddle in this definitive history of college football's ultimate oddity.

Best of Enemies Rainier George Weiner,2015-05-07 Suppose fate placed you on an inflatable life-raft in the middle of the freezing Atlantic Ocean along with your most bitter enemy contrivable? Would the emotions of hatred, revenge and love of country trump the desire to survive, if killing that enemy ensured your own demise? Captain Mat Richardson, USN, and Emil Gluckler, a German submarine commander, experience that option during the 2nd World War. Mat, captain of a small destroyer, and Emil, commander of an attacking submarine, become stranded on a life-raft after each of the combatant crafts sink each other during a fierce naval engagement. They subsequently experience 38 harrowing days striving for survival. If nothing else, this required the ultimate in mutual cooperation. If the two survived, would the events have a lasting effect on their relationship? Or, if one had the opportunity to kill the other at a later date in a new war-time circumstance, would he do so, or not?
