How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide

Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more.

Quicksand Ellen Singer, 2001 A riveting true story of the failure of the courts and police to protect a woman and her daughters.

Transitions to parenthood in Europe Ann Nilsen, Julia Brannen, Suzan Lewis, 2013 Transitions to Parenthood in Europe analyzes and compares the biographies of mothers and fathers in seven European countries. Focusing on how working people negotiate the transition into parenthood—and the work-life balances it requires—the contributors provide an in-depth understanding of working parents' real lives within a diverse set of national, workplace, and family contexts. With rich insights into how institutional policy and practices affect individuals and families, it highlights pertinent and sometimes

challenging issues regarding the sustainability of contemporary lifestyles as people try to create a healthy, supportive home.

An Oriental Biographical Dictionary Thomas William Beale, 1894

Akbar the Great Mogul, 1542-1605 Vincent Arthur Smith, 1917 Akbar the Great Mogul, 1542-1605 is a biography of Akbar I (reigned, 1556-1605), the third and greatest of the Mughal emperors of India. The author, Vincent Arthur Smith, was an Irish-born historian and antiquary who served in the Indian Civil Service before turning to full-time research and scholarship. After assuming the throne while still a youth, Akbar succeeded in consolidating and enlarging the Mughal Empire. He instituted reforms of the tax structure, the organization and control of the military, and the religious establishment and its relationship to the state. He was also a patron of culture and the arts, and he had a keen interest in religion and the possible sources of religious knowledge. The book traces Akbar's ancestry and early years; his accession to the throne and his regency under Bayram Khan; his many conquests, including Bihar, the Afghan kingdom of Bengal, Malwa, Gujarat, Kashmir, Sind, parts of Orissa, and parts of the Deccan Plateau; and his annexation of other territories through diplomacy, including Baluchistan and Kandahar. The book devotes considerable attention to Akbar's religious beliefs and interests. On several occasions Akbar requested that the Portuguese authorities in Goa send priests to his court to teach him about Christianity, and the book recounts the stories of the three Jesuit missions organized in response to these requests. By origin a Sunni Muslim, Akbar also sought to learn from Shi'ite scholars, Sufi mystics, and Hindus, Jains, and Parsis. The last four chapters of the book are not chronological but deal with the Akbar's personal

characteristics, civil and military institutions in the empire, the social and economic conditions of the people, and literature and art. The book contains a detailed chronology of the life and reign of Akbar and an annotated bibliography. Also included are maps and illustrations. Maps of India in 1561 and India in 1605 show the extent of Akbar's conquests, and sketch maps illustrate his main military campaigns.

Knowing from the Inside Tim Ingold, 2022-02-24 Knowledge comes from thinking with, from and through things, not just about them. We get to know the world around us from the inside of our being in it. Drawing on the fields of anthropology, art, architecture and education, this book addresses what knowing from the inside means for practices of teaching and learning. If knowledge is not transmitted ready-made, independently of its application in the world, but grows from the crucible of our engagements with people, places and materials, then how can there be such a thing as a curriculum? What forms could it take? And what could it mean to place such disciplines as anthropology, art and architecture at the heart of the curriculum rather than – as at present – on the margins? In addressing these questions, the fifteen distinguished contributors to this volume challenge mainstream thinking about education and the curriculum, and suggest experimental ways to overcome the stultifying effects of current pedagogic practice.

Promoting Psychological Well-Being in Children with Acute and Chronic Illness Melinda Edwards, Penny Titman, 2011-02-15 Living with a chronic illness can have a significant psychological impact on a child and his or her family, and it is essential that this aspect of their care is not overlooked. This book provides a comprehensive guide to

promoting the psychological well-being of children with chronic illnesses and medical conditions, covering support within health, social services and education. It discusses issues such as the impact of diagnosis and the experiences of children and their families in managing their medical condition and treatment. Strategies to support children and help them to cope with medical conditions are demonstrated, including cognitive behavioural and systemic approaches, and techniques such as relaxation and motivational interviewing. Case examples from clinical practice are given to illustrate the application of psychological ideas and frameworks to a variety of medical conditions and psychological difficulties. The book also includes a comprehensive resources section of where to look for further information. This will be an essential book for all professionals working with children with medical conditions, including psychologists, doctors, nurses, physiotherapists, occupational therapists, counsellors, social workers, speech and language therapists, dieticians and play therapists.

Historical Climate Variability and Impacts in North America Lesley-Ann Dupigny-Giroux, Cary J. Mock, 2009-09-18 Climatologists with an eye on the past have any number of sources for their work, from personal diaries to weather station reports. Piecing together the trajectory of a weather event can thus be a painstaking process taking years and involving real detective work. Missing pieces of a climate puzzle can come from very far afield, often in unlikely places. In this book, a series of case studies examine specific regions across North America, using instrumental and documentary data from the 17th to the 19th centuries. Extreme weather events such as the Sitka hurricane of 1880 are recounted in detail, while the chapters also cover more widespread phenomena such as

the collapse of the Low Country rice culture. The book also looks at the role of weather station histories in complementing the instrumental record, and sets out the methods that involve early instrumental and documentary climate data. Finally, the book's focus on North America reflects the fact that the historical climate community there has only grown relatively recently. Up to now, most such studies have focused on Europe and Asia. The four sections begin with regional case studies, and move on to reconstruct extreme events and parameters. This is followed by the role of station history and, lastly, methodologies and other analyses. The editors' aim has been to produce a volume that would be instrumental in molding the next generation of historical climatologists. They designed this book for use by general researchers as well as in upper-level undergraduate or graduate level courses.
