Cultures and Organizations: Software of the Mind, Third Edition Geert Hofstede,Gert Jan Hofstede,Michael Minkov,2010-05-24 The revolutionary study of how the place where we grew up shapes the way we think, feel, and act-- with new dimensions and perspectives Based on research conducted in more than seventy countries over a forty-year span, Cultures and Organizations examines what drives people apart—when cooperation is so clearly in everyone's interest. With major new contributions from Michael Minkov's analysis of data from the World Values Survey, as well as an account of the evolution of cultures by Gert Jan Hofstede, this revised and expanded edition: Reveals the "moral circles" from which national societies are built and the unexamined rules by which people think, feel, and act Explores how national cultures differ in the areas of inequality, assertiveness versus modesty, and tolerance for ambiguity Explains how organizational cultures differ from national cultures—and how they can be managed Analyzes stereotyping, differences in language, cultural roots of the 2008 economic crisis, and other intercultural dynamics

Cultures and Organizations: Software for the Mind Geert Hofstede,Gert Jan Hofstede,2004-10-03 The landmark study of cultural differences across 70 nations, Cultures and Organizations helps readers look at how they think—and how they fail to think—as members of groups. Based on decades of painstaking field research, this new edition features the latest scientific results published in Geert Hofstede's scholarly work Culture's Consequences, Second Edition. Original in thought and profoundly important, Cultures and Organizations offers vital knowledge and insight on issues that will shape the future of cultures and nations in a globalized world.

Cultures and Organizations Geert H. Hofstede,1997

Cultures and Organizations Geert Hofstede,1997 Levels of culture - More equal than others - I, we, and they - He, she, and (s)he - What is different, is dangerous - Pyramids, machines, markets, and families - Virtue versus truth - From fad to management tool - Intercultural encounters - Surviving in a multicultural world.

Cultures and Organizations Geert Hofstede,2003 Intercultural cooperation and its importance for survival. People of other countries, of another generation, social class, job or organization, often think and act in ways that puzzle us. To these people, of course, we are the ones who behave in a surprising manner. What separates them from us is the culture in which we grew up. 'Culture' in this sense is not the same as 'civilization'; it encompasses much more. Deeply-rooted and, therefore, often unconscious values lead us to consider as normal what others think abnormal, as polite what to others is rude, and as rational what others find irrational. Organizational cultures are a different phenomenon; they do not follow the same dimensions, are more manageable, and in fact offer an opportunity to bridge national cultures. Following twenty-five years of research into multinational companies, Geert Hofstede and Bob Garrett reveal the circumstances in which organizational cultures can be managed effectively, and outline ways of learning intercultural communication which are essential more essential than ever.

Exploring Culture Gert Jan Hofstede,Paul B. Pedersen,Geert Hofstede,2002-09-24 A masterpiece in intercultural training! Exploring Culture brings Geert Hofstede's five dimensions of national culture to life. Gert Jan Hofstede and his co-authors Paul Pedersen and Geert Hofstede introduce synthetic cultures, the ten pure cultural types derived from the extremes of the five dimensions. The result is a playful book of practice that is firmly rooted in theory. Part light, part serious, but always thought-provoking, this unique book approaches training through the three-part process of building awareness, knowledge, and skills. It leads the reader through the first two components with more than 75 activities, dialogues, stories, and incidents. The Synthetic Culture Laboratory and two full simulations fulfill the skill-building component. Exploring Culture is suitable for students, trainers, coaches and educators. It can be used for individual study or as a text, and it serves as an excellent partner to Geert Hofstede's popular Cultures and Organizations.

Culture's Consequences Geert Hofstede,1984 In his bestselling book Culture's Consequences, Geert Hofstede proposed four dimensions on which the differences among national cultures can be understood: Individualism, Power Distance, Uncertainty Avoidance and Masculinity. This volume comprises the first in-depth discussion of the masculinity dimension and how it can help us to understand differences among cultures. The book begins with a general explanation of the masculinity dimension, and discusses how it illuminates broad features of different cultures. The following parts apply the dimension more specifically to gender (and gender identity), sexuality (and sexual behaviour) and religion, probably the most influential variable of all. Hofstede closes the book

Culture's Software Dorota Brzozowska,Władysław Chłopicki,2015-09-10 When Geert Hofstede famously defined culture as collective programming of the mind, the definition broadly referred to culture as such, including all the layers in his "onion" model. The title of this volume, Culture's Software, represents a development of this original idea and was inspired by none other than Professor Hofstede himself. He used this phrase over thirty years later when lecturing to an international group of scholars gathered in Poland to debate the idea of cultural communication styles, which has, in recent years, been fruitfully discussed from a fresh perspective by scholars working within cognitive and cultural linguistics. The debate has given rise to this book, which will inspire further research into this fascinating subject.

Cultural Dimensions: The Five-Dimensions-Model according to Geert Hofstede Anja Dellner,2014-09-03 Seminar paper from the year 2009 in the subject Cultural Studies - Basics and Definitions, grade: 1,3, Dresden Technical University, language: English, abstract: Be it in the business world, as a traveller, trying to master a foreign language, or to teach it, nowadays we meet people of foreign cultures more frequently than this was the case just 50 or even 100 years ago. Even though linguistic difficulties are often surmountable through English as lingua franca, meeting people from cultures we are unfamiliar with bears the potential for many misunderstandings. These in turn quite often lead to lack of understanding, conflict, even political disaster, like in 2005 with the Danish caricature scandal involving the newspaper Jyllands Posten, when a fundamentalist Muslim cleric from Egypt living in Denmark felt offended and ridiculed in his religious beliefs by caricatures featuring Mohammed. The Islamic world thereby rallied to the case, and did not only react with outrage and boycott, but with violent attacks, in the course of which 140 people lost their lives and several hundred were injured. Milder reactions, like rejection and hidden resentment are, however, the more common outcomes due to intercultural misunderstandings. How otherwise would there be stereotypes mostly carrying negative connotations, like the obedient Chinese, the superficial American, or the super-punctual German lacking humor? The Dutch anthropologist and cultural scientist Geert Hofstede suggests that the reason for such misunderstandings is a culturally divergent, often concealed moral concept with a direct impact on human actions and thinking. Hofstede has devoted himself to this issue and has developed a model based on a long-time study, elucidating peculiarities of and differences between national cultures in comparison. Thereby Hofstede classified national cultures according to five pillars, also called dimensions, which dependent on the nation vary markedly and in his study are set in relation to each other. The subject and the goal of this assignment is to present the main features of Hofstede's Model of the Five Dimensions of National Cultures. Following, the practical applicability of this model is briefly discussed.

Lean and Agile Software Development Adam Przybyłek,Aleksander Jarzębowicz,Ivan Luković,Yen Ying Ng,2022-01-18 This book constitutes the proceedings of the 6th International Conference on Lean and Agile Software Development, LASD 2022, which was held online on January 22, 2022. The conference received a total of 29 submissions, of which 9 full papers, 1 short paper and 1 position paper are included in this volume. In addition, the volume contains one keynote paper in full paper length. Topics discussed in this volume cover various aspects of agile software development and range from agile

testing, to agile effort estimation, an agile approach to model-driven development, and remotely working agile teams.

Culture's Consequences Geert Hofstede,2001 'The publication of this second edition of Culture's Consequences marks an important moment in the field of cross-cultural studies . Hofstede's framework for understanding national differences has been one of the most influential and widely used frameworks in cross-cultural business studies, in the past ten years' - Australian Journal of Management

The New Global Road Map Pankaj Ghemawat,2018-05-01 What Globalization Now Means for Your Business Executives can no longer base their strategies on the assumption that globalization will continue to advance steadily. But how should they respond to the growing pressures against globalization? And what can businesses do to control their destinies in these times of uncertainty? In The New Global Road Map, Pankaj Ghemawat separates fact from fiction by giving readers a better understanding of the key trends affecting global business. He also explains how globalization levels around the world are changing, and where they are likely to go in the future. Using the most up-to-date data and analysis, Ghemawat dispels today's most dangerous myths and provides a clear view of the most critical issues facing policy makers in the years ahead. Building on this analysis, with examples from a diverse set of companies across industries and geographies, Ghemawat provides actionable frameworks and tools to help executives revise their strategies, restructure their global footprints, realign their organizations, and rethink how they work with local governments and institutions. In our era of rising nationalism and increased skepticism about globalization's benefits, The New Global Road Map delivers the definitive guide on how to compete profitably across borders.

Doing Business in ASEAN Markets Peter Verhezen,Ian Williamson,Mark Crosby,Natalia Soebagjo,2016-10-18 The authors of this important book analyse the pitfalls and risks of doing business in ASEAN countries that are mostly absent in Western markets, covering various strategic, external, operational, and legal-cultural challenges for international companies. Doing Business in ASEAN Emerging Markets crucially addresses how to resolve those barriers. Encompassing issues of governance and leadership standards, the authors present case studies and practical solutions underpinned by academic research. Helping executives learn how to implement high international standards and maintain sensitivity to socio-cultural and political Asian contexts, the book highlights the need to create an international diverse and unified leadership team that will take better decisions and effectively deal with risks, and apply best corporate governance practices within an Asian context.

Culture's Consequences Katherine Erdman,2018-02-21 The Dutch anthropologist Geert Hofstede is recognized as a pioneer in the fields of international management and social psychology – and his work is a perfect example of the ways in which interpretative skills can help solve problems and provide the foundation for strong thinking and understanding both in business and beyond. Hofstede's central achievement was setting up an efficient interpretative framework for understanding the cultural differences between one country and another. Working for the international computing company IBM in the late 1960s, Hofstede noted that such cultural differences had huge consequences for international organizations. Up until then, while many inside and outside of business recognized the importance of these differences, little had been done to define precisely what cultural difference was and in what areas of life it was expressed. Hofstede's insight was that if one could interpret and define the dimensions of cultural difference, it would be possible to measure them and act accordingly. From a vast survey of IBM's employees in several countries, Hofstede originally defined five dimensions of culture: every society could be rated for each dimension, providing a useful guide to the kinds of cultural differences at play. As ever, good interpretative skills provided the basis for better understanding.
