Code Breaking in the Pacific Peter Donovan,John Mack,2014-08-14 This book reveals the historical context and the evolution of the technically complex Allied Signals Intelligence (Sigint) activity against Japan from 1920 to 1945. It traces the all-important genesis and development of the cryptanalytic techniques used to break the main Japanese Navy code (JN-25) and the Japanese Army's Water Transport Code during WWII. This is the first book to describe, explain and analyze the code breaking techniques developed and used to provide this intelligence, thus closing the sole remaining gap in the published accounts of the Pacific War. The authors also explore the organization of cryptographic teams and issues of security, censorship, and leaks. Correcting gaps in previous research, this book illustrates how Sigint remained crucial to Allied planning throughout the war. It helped direct the advance to the Philippines from New Guinea, the sea battles and the submarine onslaught on merchant shipping. Written by well-known authorities on the history of cryptography and mathematics, Code Breaking in the Pacific is designed for cryptologists, mathematicians and researchers working in communications security. Advanced-level students interested in cryptology, the history of the Pacific War, mathematics or the history of computing will also find this book a valuable resource.

The Nature of Creation Mark Harris,2014-09-19 It is generally assumed that science and religion are at war. Many now claim that science has made religious belief redundant; others have turned to a literalist interpretation of biblical creation to reject or revise science; others try to resolve Darwin with Genesis. The Nature of Creation addresses this complex debate by engaging with both modern science and biblical scholarship together. Creation is central to Christian theology and the Bible, and has become the chosen battleground for scientists, atheists and creationists alike. The Nature of Creation presents a sustained historical investigation of what the creation texts of the Bible have to say and how this relates to modern scientific ideas of beginnings. The book aims to demonstrate what science and religion can share, and how they differ and ought to differ.

Tower of Lies Barbara A. Res,2020-10-20 Barbara A. Res worked directly with Donald Trump for eighteen years on some of his biggest projects and had nearly unlimited access to him. Trump selected Res to be in charge of construction of Trump Tower, his greatest success as a developer. In this insider's look at how the ambitious real estate developer became the most divisive president in recent U.S. history, Res takes us into closed-door meetings, boardrooms, limo rides, and helicopter flights to really understand what makes him tick and show us why his claim to be a great dealmaker and savvy businessman is just a mirage. No one with this kind of access to Trump during his formative years as a developer has ever written so completely about who he is away from the cameras. It's no wonder that when the media are looking for someone who really understands Trump, they turn to Res. Candid, personal, and deeply perceptive, Res shines new light on the man whose depravity has put us all—and democracy itself—in danger. Includes a 16-page photo insert featuring images from the author's personal collection.
