The Complete Book of Home Management Elva Anson, Kathie Liden, 1985 You may think it impossible to bring order out of the chaos of your household, but, step by step, you can create a happy, healthy, organized, homelife. The Complete Book of Home Management is an A to Z guide for turning your family into the smooth-functioning unit God wants it to be. Learn to: budget and spend wisely; organize and streamline the space in your home; make the best of every minute; include your children in chores and general family maintenance; feed your family inexpensively but nutritionally; and, most important, become the good stewards of time, talents, and resources that God wants your family to be. - Back cover.

People and Predators Defenders of Wildlife, 2012-06-22 Carnivores provide innumerable ecological benefits and play a unique role in preserving and maintaining ecosystem services and function, but at the same time they can create serious problems for human populations. A key question for conservation biologists and wildlife managers is how to manage the world's carnivore populations to conserve this important natural resource while mitigating harmful impacts on humans. In People and Predators, leading scientists and researchers offer case studies of human-carnivore conflicts in a variety of landscapes, including rural, urban, and political. The book covers a diverse range of taxa, geographic regions, and conflict scenarios, with each chapter dealing with a specific facet of human-carnivore interactions and offering practical, concrete approaches to resolving the conflict under consideration. Chapters provide background on particular problems and describe how challenges

have been met or what research or tools are still needed to resolve the conflicts. People and Predators will help readers to better understand issues of carnivore conservation in the 21st century, and provides practical tools for resolving many of the problems that stand between us and a future in which carnivores fulfill their historic ecological roles.

Large Carnivore Conservation and Management Tasos Hovardas, 2018-07-11 Large carnivores include iconic species such as bears, wolves and big cats. Their habitats are increasingly being shared with humans, and there is a growing number of examples of human-carnivore coexistence as well as conflict. Next to population dynamics of large carnivores, there are considerable attitude shifts towards these species worldwide with multiple implications. This book argues and demonstrates why human dimensions of relationships to large carnivores are crucial for their successful conservation and management. It provides an overview of theoretical and methodological perspectives, heterogeneity in stakeholder perceptions and behaviour as well as developments in decision making, stakeholder involvement, policy and governance informed by human dimensions of large carnivore conservation and management. The scope is international, with detailed examples and case studies from Europe, North and South America, Central and South Asia, as well as debates of the challenges faced by urbanization, agricultural expansion, national parks and protected areas. The main species covered include bears, wolves, lynx, and leopards. The book provides a novel perspective for advanced students, researchers and professionals in ecology and conservation, wildlife management, human-wildlife interactions, environmental education and environmental social science.
