**Guns, Germs, and Steel: The Fates of Human Societies** Jared Diamond,1999-04-17 Fascinating.... Lays a foundation for understanding human history.—Bill Gates In this artful, informative, and delightful (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

Freedom of Expression® Kembrew McLeod,2007 In 1998 the author, a professional prankster, trademarked the phrase freedom of expression to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech.

**Digital Roots** Gabriele Balbi,Nelson Ribeiro,Valérie Schafer,Christian Schwarzenegger,2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

**Anti-media** Florian Cramer,2013 Book reflects on anti-copyright, porn, creative industries, post- punk, Arts and Crafts and constructivism, cooking as contemporary art, Oulipo, post-digitality, mezangelle, Anonymous and 4chan, Fluxus, amateurism, file sharing networks, pop culture, 17th century poetry, electroacoustic music, Neonazi communication guerilla, Rotterdam, romanticism, electronic literature, Mail Art, ontology, Super 8, Rosicrucianism and conceptual art.

International Encyclopedia of Information and Library Science John Feather,Paul Sturges,2003-09-02 The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

**Day of Empire** Amy Chua,2009-01-06 In this sweeping history, bestselling author Amy Chua explains how globally dominant empires—or hyperpowers—rise and why they fall. In a series of brilliant chapter-length studies, she examines the most powerful cultures in history—from the ancient empires of Persia and China to the recent global empires of England and the United States—and reveals the reasons behind their success, as well as the roots of their ultimate demise. Chua's analysis uncovers a fascinating historical pattern: while policies of tolerance and assimilation toward conquered peoples are essential for an empire to succeed, the multicultural society that results introduces new tensions and instabilities, threatening to pull the empire apart from within. What this means for the United States' uncertain future is the subject of Chua's provocative and surprising conclusion.

*The Mindful Hand* Lissa Roberts,Simon Schaffer,Peter Dear,2007 Although manual labour and theoretical invention might now seem separate ventures, history teaches us that they are closely linked processes. The Mindful Hand explores innovative areas of European society between the late Renaissance and the period of early industrialisation where the enterprise of knowledge and production relied on the most intimate connexions of thought and toil. This volume explains how philosophers and labourers collaborated in an environment where artisans and instrument-makers, administrators and entrepreneurs simultaneously pioneered technical change alongside knowledge formation. The essays gathered here help show how these projects were pursued together, yet why, in retrospect, the very categories of science and technology emerged as seemingly distinct endeavors.

Mind the Screen Jaap Kooijman,Patricia Pisters,Wanda Strauven,2008 Mind the Screen pays tribute to the work of the pioneering European film scholar Thomas Elsaesser, author of several volumes on media studies and cinema culture. Covering a full scope of issues arising from the author's work—from melodrama and mediated memory to avant-garde practices, media archaeology, and the audiovisual archive—this collection elaborates and expands on Elsaesser's original ideas along the topical lines of cinephilia, the historical imaginary, the contemporary European cinematic experience, YouTube, and images of terrorism and double occupancy, among other topics. Contributions from well-known artists and scholars such as Mieke Bal and Warren Buckland explore a range of media concepts and provide a mirror for the multi-faceted types of screens active in Elsaesser's work, including the television set, video installation, the digital interface, the mobile phone display, and of course, the hallowed silver screen of our contemporary film culture.

*Modality in Kazakh as Spoken in China* Aynur Abish,2016 This is a comprehensive study on modality in one of the largest Turkic languages, Kazakh, as it is spoken in China. Kazakh is the official language of the Republic of Kazakhstan and is furthermore spoken by about one and a half million people in China in the Xinjiang Uyghur Autonomous Region and in Aksai Kazakh Autonomous County in the Gansu Province. The method employed is empirical, i.e. data-oriented. Modal expressions in Kazakh are analyzed in a theoretical framework essentially based on the works of Lars Johanson in which semantic notions of modality are defined from a functional and typological perspective. The modal categories volition, deontic and epistemic evaluation express attitudes towards the propositional content and are conveyed in Kazakh by grammaticalized moods, particles and lexical devices, treated in detail in this book. Plenty of examples of their different usages are provided with interlinear annotation. The Kazakh expressions are compared with corresponding ones used in other Turkic languages. Contact influences of Uyghur and Chinese are also dealt with. The Appendix contains nine texts recorded by Aynur Abish in 2010-2012, mostly in the northern regions of Xinjiang.

**A History of the English Language** Elly van Gelderen,2014-04-03 The English language in its complex shapes and forms changes fast. This thoroughly revised edition has been refreshed with current examples of change and has been updated regarding archeological research. Most suggestions brought up by users and reviewers have been incorporated, for instance, a family tree for Germanic has been added, Celtic influence is highlighted much more, there is more on the origin of Chancery English, and internal and external change are discussed in much greater detail. The philosophy of the revised book remains the same with an emphasis on the linguistic history and on using authentic texts. My audience remains undergraduates (and beginning graduates). The goals of the class and the book are to come to recognize English from various time periods, to be able to read each stage with a glossary, to get an understanding of typical language change, internal and external, and to understand something about language typology through the emphasis on the change from synthetic to analytic.
