Exile Blues Douglas Gary Joseph Freeman, 2019 When Preston Downs, Jr., alias Prez, slides down the emergency chute onto the frozen tarmac at the Montreal airport, little does he know that returning home to Washington D.C. or to his adopted city, Chicago, would now be impossible. Events had sped by after a dust-up with the Chicago police. With a new name and papers, he finds himself in a foreign city where people speak French and life is douce compared to the one he fled. Son of a World War II vet, Prez grows up in the 50s in D.C., a segregated Southern city, and learns early that black lives don't much matter. As a leader in the streets, his journey from boyhood to manhood means acquiring fighting skills to lead and unify long before losing his virginity. Smart and skeptical, but with a code of ethics, he, like every black kid, wants to be Malcolm, Martin or at least a soul brother, which inspires fear among the powers that be. Spotted while an A student at Howard University in 1964, Prez is invited to do an interdisciplinary course with field work on Civil Rights in Chicago, a city as divided as Gettysburg was a hundred years earlier. Faced with police-state conditions, dubious armed gangs, spies and provocateurs, Prez and the young women and men he works with are propelled into a head-on fight with police. James Baldwin wrote that the blues began on the auction block, others say it started with their kidnapping from Africa. Prez was born in exile, with the blues. Only someone who has lived through that period can write an enthralling and passionate story like Exile Blues. Gary Freeman has done so with insight and sensitivity.

The Velvet Rope Economy Nelson D. Schwartz, 2021-02-09 From New York Times business reporter Nelson D. Schwartz comes a bold and urgent investigation of division between the wealthy and the middle class in every arena of American life. In nearly every realm of daily life--from health care to education, highways to home security--there is an invisible velvet rope that divides how Americans live. On one side of the rope, for a price, red tape is cut, lines are jumped, appointments are secured, and doors are opened. On the other side, middle- and working-class Americans fight to find an empty seat on the plane, a place in line with their kids at the amusement park, a college acceptance, or a hospital bed. We are all aware of the gap between the rich and everyone else, but when we weren't looking, business innovators stepped in to exploit it, shifting services away from the masses and finding new ways to profit by serving the privileged. And as decision-makers and corporate leaders increasingly live on the friction-free side of the velvet rope, they are less inclined to change--or even notice--the obstacles everyone else must contend with. Schwartz's must read book takes us on a behind-the-scenes tour of this new reality and shows the toll the velvet rope divide takes on society.

A History of Science in World Cultures Scott L. Montgomery, Alok Kumar, 2015-06-12 To understand modern science, it is essential to recognize that many of the most fundamental scientific principles are drawn from the knowledge of ancient civilizations. Taking a global yet comprehensive approach to this complex topic, A History of Science in World Cultures uses a broad range of case studies and examples to demonstrate that the scientific thought and method of the present day is deeply rooted in a pluricultural past. Covering ancient Egypt, Mesopotamia, India, Greece, China, Islam, and the New World, this volume discusses the scope of scientific and technological achievements in each civilization and how the knowledge it developed came to impact the European Renaissance. Themes covered include the influence these scientific cultures had upon one another, the power of writing and its technologies, visions of mathematical order in the universe and how it can be represented, and what elements of the distant scientific past we continue to depend upon today. Topics often left unexamined in histories of science are treated in fascinating detail, such as the chemistry of mummification and the Great Library in Alexandria in Egypt, jewellery and urban planning of the Indus Valley, hydraulic engineering and the compass in China, the sustainable agriculture and dental surgery of the Mayas, and algebra and optics in Islam. This book shows that scientific thought has never been confined to any one era, culture, or geographic region. Clearly presented and highly illustrated, A History of Science in World Cultures is the perfect text for all students and others interested in the development of science throughout history.

Women and Wealth in Late Medieval Europe T. Earenfight, 2010-03-15 The twelve essays in Women and Wealth in Late Medieval Europe re-examine the vexing issue of women, money, wealth, and power from distinctive perspectives - literature, history, architectural history - using new archival sources. The contributors examine how money and changing attitudes toward wealth affected power relations between women and men of all ranks, especially the patriarchal social forces that constrained the range of women's economic choices. Employing theories on gender, culture, and power, this volume reveals wealth as both the motive force in gender relations and a precise indicator of other, more subtle, forms of power and influence mediated by gender.

Financial Sorcery Jason Miller, 2012-07-22 This life-changing book goes far beyond simple “money magic.” This is a tome of true financial sorcery that will show you how to ensure success no matter what life throws at you. Financial Sorcery will give you the step-by-step instructions on how to improve your fiscal situation. You will learn how to: Stop using magic to fix emergency problems and start using it to build your dream life. Use times of economic uncertainty to create new opportunities rather than cause problems. Work joyfully with money as part of your spiritual discipline rather than as a necessary evil. Make offerings to help increase the flow of prosperity around you. Ditch old concepts and retrain your mind to make money in today’s world. Use the interplay of macro- and micro-enchantment to find jobs and get promoted. Deploy strategic sorcery to kill your debt. Create secondary income streams that will ensure continued revenue.

"Only the Super-Rich Can Save Us!" Ralph Nader, 2011-01-04 In the cozy den of the large but modest house in Omaha where he has lived since he started on his first billion, Warren Buffett watched the horrors of Hurricane Katrina unfold on television in early September 2005. . . . On the fourth day, he beheld in disbelief the paralysis of local, state, and federal authorities unable to commence basic operations of rescue and sustenance, not just in New Orleans, but in towns and villages all along the Gulf Coast. . . He knew exactly what he had to do. . . So begins the vivid fictional account by political activist and bestselling author Ralph Nader that answers the question, What if? What if a cadre of superrich individuals tried to become a driving force in America to organize and institutionalize the interests of the citizens of this troubled nation? What if some of America's most powerful individuals decided it was time to fix our government and return the power to the people? What if they focused their power on unionizing Wal-Mart? What if a national political party were formed with the sole purpose of advancing clean elections? What if these seventeen superrich individuals decided to galvanize a movement for alternative forms of energy that will effectively clean up the environment? What if together they took on corporate goliaths and Congress to provide the necessities of life and advance the solutions so long left on the shelf by an avaricious oligarchy? What could happen? This extraordinary story, written by the author who knows the most about citizen action, returns us to the literature of American social movements—to Edward Bellamy, to Upton Sinclair, to John Steinbeck, to Stephen Crane—reminding us in the process that changing the body politic of America starts with imagination.

Imagine Sissa Marquardt, Markus Schmölz, 2002-08 India offers the western traveller an assault on all senses. Presenting these impressions in images gathered over the years, this striking, colourful and virtually text-free book refuses to draw academic correlations between images. Rather than offering a false completeness of one idea of India, this original collection rejects clichéd images of graceful Indian women and sadhus sunk in meditation wearing colourful garments, which have come to typify the Western conception of contemporary Indian art and life. With over 75 full-colour and b/w illustrations.

The Journal of Helene Berr Helene Berr, 2009-10-27 Not since The Diary of Anne Frank has there been such a book as this: The joyful but ultimately heartbreaking journal of a young Jewish woman in occupied Paris, now being published for the first time, 63 years after her death in a Nazi concentration camp. On April 7, 1942, Hélène Berr, a 21-year-old Jewish student of English literature at the Sorbonne, took up her pen and started to keep a journal, writing with verve and style about her everyday life in Paris – about her studies, her friends, her growing affection for the “boy with the grey eyes,” about the sun in the dewdrops, and about the effect of the growing restrictions imposed by France’s Nazi occupiers. Berr brought a keen literary sensibility to her writing, a talent that renders the story it relates all the more rich, all the more heartbreaking. The first day Berr has to wear the yellow star on her coat, she writes, “I held my head high and looked people so straight in the eye they turned away. But it’s hard.” More, many more, humiliations were to follow, which she records, now with a view to posterity. She wants the journal to go to her fiancé, who has enrolled with the Free French Forces, as she knows she may not live much longer. She was right. The final entry is dated February 15, 1944, and ends with the chilling words: “Horror! Horror! Horror!” Berr and her family were arrested three weeks later. She went – as was discovered later – on the death march from Auschwitz to Bergen-Belsen, where she died of typhus in April 1945, within a month of Anne Frank and just days before the liberation of the camp. The journal did eventually reach her fiancé, and for over fifty years it was kept private. In 2002, it was donated to the Memorial of the Shoah in Paris. Before it was first published in France in January 2008, translation rights had already been sold for twelve languages.

༡༡༡༡༡༡༡༡ Sarat Chandra Das, 1902 A Tibetan-English Dictionary, With Sanskrit Synonyms by Sarat Das Chandra, first published in 1902, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. The Cognitive Science of Religion James A. Van Slyke, 2011 The cognitive science of religion is a relatively new academic field in the study of the origins and causes of religious belief and behaviour. The focal point of empirical research is the role of basic human cognitive functions in the formation and transmission of religious beliefs. However, many theologians and religious scholars are concerned that this perspective will reduce and replace explanations based in religious traditions, beliefs, and values. This book attempts to bridge the reductionist divide between science and religion through examination and critique of different aspects of the cognitive science of religion and offers a conciliatory approach that investigates the multiple causal factors involved in the emergence of religion.

Tiger Moon Fiona Sunquist,Mel Sunquist,2002-06 Tiger Moon is the powerful, poetic story of the Sunquists' two years studying tigers in Nepal–traveling by elephant, avoiding a rhino attack, and learning to recognize individual tigers by roar. A new afterword tells the story of promising efforts to reconnect fractured Nepalese tiger habitats.
