Assistive Technology for Blindness and Low Vision Roberto Manduchi,Sri Kurniawan,2018-09-03 Assistive technology has made it feasible for individuals with a wide range of impairments to engage in many activities, such as education and employment, in ways not previously possible. The key factor is to create consumer-driven technologies that solve the problems by addressing the needs of persons with visual impairments. Assistive Technology for Blindness and Low Vision explores a broad range of technologies that are improving the lives of these individuals. Presenting the current state of the art, this book emphasizes what can be learned from past successful products, as well as what exciting new solutions the future holds. Written by world-class leaders in their field, the chapters cover the physiological bases of vision loss and the fundamentals of orientation, mobility, and information access for blind and low vision individuals. They discuss technology for multiple applications (mobility, wayfinding, information

access, education, work, entertainment), including both established technology and cutting-edge research. The book also examines computer and digital media access and the scientific basis for the theory and practice of sensory substitution. This volume provides a holistic view of the elements to consider when designing assistive technology for persons with visual impairment, keeping in mind the need for a user-driven approach to successfully design products that are easy to use, well priced, and fill a specific need. Written for a broad audience, this book provides a comprehensive overview and in-depth descriptions of current technology for designers, engineers, practitioners, rehabilitation professionals, and all readers interested in the challenges and promises of creating successful assistive technology.

Stories at the Edge of Time Alan Robbins, 2007-10
A family on the last starship finds that stories themselves may very well save a dying world. In one of those stories, a man dies of radio while another finds a new lease on life in an ancient dingus. A phone that can be used to call a few minutes into the future leads to unexpected turmoil. An anthroid on trial for a murder may be the victim of a faulty linguistic circuit. A retired astronaut who cannot get his footing, the last librarian on earth, tales of a future ghetto where surprise is still a possibility, and a mathematician whose brilliant insight continually slips his mind. These are few of the themes to be found in this collection of mystery science fiction tales in the speculative tradition of the satires of Kurt Vonnegut and the ironies of Jorge Luis Borges from the author of *A Small Box of Chaos* and the award-winning *An Interlude in Dreamland*.

An Interlude in Dreamland Alan Robbins, 2005-09
Her name is Mama Nostromento and someone close to her has been murdered. She may be the only one who knows why. But the truth is locked inside her mind, lost in a tangle of thoughts as a neurovirus ravages her memory. Enterman, expert in intuition and reluctant investigator of strange events, is called in to find the answer and Rita St. John, a

beautiful and very uncommon bodyguard, is there to protect him. It is 2050 and the worldwide communications net known as the Glob ties everyone together. But can all the technology of the near future, instant information at the merest whisper, help them to solve this mystery before time runs out? The answer lies in a secret world, hidden from outsiders, under the ruins of old Coney Island. It is a world of mythic forces and dark rituals that threatens to overpower even the latest high-tech wizardry. Because Mama Nostromento is no ordinary witness; she is a banshee, gatekeeper for the dead.

Chariot Bright P R Adams, 2018-05-16 The war for survival has begun. In the struggle against the AI that intends to wipe out all human life, Colonel Lonny Meyers must must work with a military coalition led by generals who seem to be more concerned about prestige than the mission. The target: a starship production facility deep in uncharted space. The payload: a devastating nuclear bomb. But something about the mission is wrong from the start, and if Meyers can't figure out what, the human race is doomed. For another exciting chapter in the Elite Response Force saga, pick up *Chariot Bright* today!
