*Responding in Conversation* Marja-Leena Sorjonen, 2001 This book concerns particles that are used as responses in conversations. It provides much needed methodological tools for analyzing the use of response particles in languages, while its particular focus is Finnish. The book focuses on two Finnish particles, *nii(n)* and *joo*, which in some of their central usages have *yeah* and *yes* as their closest English counterparts. The two particles are discussed in a number of sequential and activity contexts, including their use as answers to yes-no questions and directives, as responses to a stance-taking by the prior speaker, and in the midst of an extended telling by the co-participant. It will be shown how there is a fine-grained division of labor between the particles, having to do with the epistemic and affective character of the talk and the continuation vs. closure-relevance of the activity. The book connects the interactional usages of the particles with what is known about their historical origins, and in this fashion it is also of interest to linguists doing research on processes of grammaticalization and lexicalization.

2 Billion Under 20 Stacey Ferreira, Jared Kleinert, 2015-07-28 Of the roughly 6.97 billion people on Earth today, approximately 2 billion of them are under 20 years old. Millennials have a lot of reputations these days, but powerful, smart, and affective are not usually the adjectives used to describe them. Jared Kleinert and Stacey Ferreira want to change that and empower these young people to follow their dreams, set goals, and achieve success. Both young successful entrepreneurs themselves, they believe in breaking down age barriers to make a difference. Jared, best-known as the Founder and CEO of Synergist, and Stacey, best-known as the Co-Founder of

MySocialCloud.com met in 2012 at the Under 20 Thiel Fellowship Summit. After speaking with their equally impressive peers, they realized that these 2 billion young voices have inspiring stories to share with the world and they wanted to bring them to life through 2 Billion Under 20. Jared and Stacey also decided to start an online community, [www.2BillionUnder20.com](http://www.2BillionUnder20.com) where young people could help each other grow and develop their dreams into reality. They've curated an anthology of amazing stories from their peers. Contributors like Paige McKenzie who started her own YouTube channel at the age of 16 that now has more than 55 million views and Jack Andraka who created an early detection Pancreatic cancer test at age 14 have joined forces to show the world that age is just a number.

Studies in Interactional Linguistics Margret Selting, Elizabeth Couper-Kuhlen, 2001-01-01 Current interactional linguistic research appears to be crystallizing around systematic themes, which are all represented in this collection of papers. In the first section, where the relation between language and interaction is viewed from the perspective of language structure, several articles deal with the potential of a single structure for both turn and sequence construction, revealing a play-off between planned and occasioned syntax with potentially far-reaching consequences for language development. Other articles deal with lexical expressions as resources for the conduct of interaction, showing how they are heavily dependent on turn position and sequential context for their meaning potential. In the second section, with a view from the perspective of the interactional order, a systematic focus of interest lies on three different conversational tasks: projecting turn and turn-unit completion, starting up turns with 'non-beginnings' and self-repairing. The cross-linguistic studies here all agree that common interactional tasks may well be carried out by quite different linguistic practices and that

these practices are dependent to a certain extent on language features which are typologically distinct.
