This is the story of Jason Chaser, a talented young racer selected to attend the Race School. He's younger than the other students. He's smaller. His trusty car, the Argonaut, is older. The Hovercraft Ashley Hollebhone,2012-08 The hovercraft was first created in 1959, when Sir Christopher Cockerell came up with a prototype that crossed the English Channel. The SRN1, the first ever hovercraft, is now proudly housed by the Science Museum and this very British invention enjoys an active role in many arenas, from travel, leisure cruising and racing to lifesaving and transporting goods. This detailed book delves into the history of the hovercraft, from the early days of its development through to the commercial and military applications of the craft. It looks into the exciting world of hovercraft leisure, cruising and racing from amateur to Formula 1, and also explores the important role the hovercraft plays in rescues whether on water or delivering aid around the world in places that helicopters can't reach. Finally, it details the types of hovercraft in use today, and what the future holds. The hovercraft is more than a product of 1960s Britain: it is one that has pushed the boundaries of transport as we look into the future and we have the back-shed culture of Britain to thank for its invention.

**Race, Racism and Psychology** Graham Richards,2003-09-02 Topics with racial implications have been hotly debated in the psychological literature for most of this century and are often in the news. Graham Richards takes a historical look at how the concepts of race and racism emerged within the discipline and charts the underlying premises of some famous studies in their social and political contexts. No-one is allowed to be objective in this arena, as opponents will always argue that they are not. This account is bound therefore to be controversial and excite interest whether or not readers agree with Richards' stance.

*Critical Race* Martin Hancock,2007-09-01 Tom Harris, spying at Churchill's behest on Germany's pre-war scientific programme, is a good man who finds himself in a bad place. A place where friend and foe, good and bad, right and wrong become hopelessly confused. But it is also a place where a genius named Zuse creates a technology of world-changing potential.The Nazis came within a whisker of having this technology, years before anyone else, and it would have won them the war. But the arrogance of the Third Reich was blind to its potential and now Harris knows that he must get Zuse's ideas into the hands of the Allies.The story of Tom Harris is a jigsaw puzzle based on facts and factual events, but also about real people and how the concept of the digital computer escaped the darkness of Nazi Germany, made the atomic bomb a reality and changed all of our lives - forever.

**Romantic Education in Nineteenth-Century American Literature** Monika M Elbert,Lesley Ginsberg,2014-12-05 American publishing in the long nineteenth century was flooded with readers, primers, teaching-training manuals, children's literature, and popular periodicals aimed at families. These publications attest to an abiding faith in the power of pedagogy that has its roots in transatlantic Romantic conceptions of pedagogy and literacy. The essays in this collection examine the on-going influence of Romanticism in the long nineteenth century on American thinking about education, as depicted in literary texts, in historical accounts of classroom dynamics, or in pedagogical treatises. They also point out that though this influence was generally progressive, the benefits of this social change did not reach many parts of American society. This book is therefore an important reference for scholars of Romantic studies, American studies, historical pedagogy and education.
