The Photoshop Elements 11 Book for Digital Photographers Scott Kelby,Matt Kloskowski,2012-11-13 This book (for Windows and Mac) breaks new ground by doing something for digital photographers that's never been done before–it cuts through the bull and shows exactly how to do it. It's not a bunch of theory; it doesn't challenge readers to come up with their own settings or figure things out on their own. Instead, it tells readers flat-out which settings to use, when to use them, and why. This book gives the inside tips and tricks of the trade for organizing, correcting, editing, sharpening, retouching, and presenting photos like a pro. Readers will be absolutely amazed at how easy and effective these techniques are–once they know the secrets. This book covers: -The real secrets of how the pros retouch portraits -How to color correct any photo without breaking a sweat -How to use Camera Raw for processing not only RAW photos, but JPEGs and TIFFs, too! -The sharpening techniques the pros really use -How to deal with common digital camera image problems, including removing noise and avoiding halos -The most requested photographic special effects -All the brand new features of Elements 11, which offers better ways to manage photos, map images, share memories, use templates, and easily create pro-quality photographic effects And the book's secret weapon: It also covers slick workarounds, cheats, and some fairly ingenious ways to replicate many Photoshop CS6 features from right within Elements 11. -And much more!

Advanced Deep Learning Strategies for the Analysis of Remote Sensing Images Yakoub Bazi,Edoardo Pasolli,2021-06-15 The rapid growth of the world population has resulted in an exponential expansion of both urban and agricultural areas. Identifying and managing such earthly changes in an automatic way poses a worth-addressing challenge, in which remote sensing technology can have a fundamental role to answer—at least partially—such demands. The recent advent of cutting-edge processing facilities has fostered the adoption of deep learning architectures owing to their generalization capabilities. In this respect, it seems evident that the pace of deep learning in the remote sensing domain remains somewhat lagging behind that of its computer vision counterpart. This is due to the scarce availability of ground truth information in comparison with other computer vision domains. In this book, we aim at advancing the state of the art in linking deep learning methodologies with remote sensing image processing by collecting 20 contributions from different worldwide scientists and laboratories. The book presents a wide range of methodological advancements in the deep learning field that come with different applications in the remote sensing landscape such as wildfire and postdisaster damage detection, urban forest mapping, vine disease and pavement marking detection, desert road mapping, road and building outline extraction, vehicle and vessel detection, water identification, and text-to-image matching.

Introduction to Information Retrieval Christopher D. Manning,Prabhakar Raghavan,Hinrich Schütze,2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents;

methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.
