Pig Earth John Berger,2011-07-13 With this haunting first volume of his Into Their Labours trilogy, John Berger begins his chronicle of the eclipse of peasant cultures in the twentieth century. Set in a small village in the French Alps, Pig Earth relates the stories of skeptical, hard-working men and fiercely independent women; of calves born and pigs slaughtered; of summer haymaking and long dark winters f rest; of a message of forgiveness from a dead father to his prodigal son; and of the marvelous Lucie Cabrol, exiled to a hut high in the mountains, but an inexorable part of the lives of men who have known her. Above all, this masterpiece of sensuous description and profound moral resonance is an act of reckoning that conveys the precise wealth and weight of a world we are losing.

Eilean Donan Castle Cecily Shakespeare,Jonathan Clark,Justin Garner-Lahire,Richard Oram,Nicola Toop,2023-11-15 Now hard to believe, Eilean Donan Castle was once one of the largest castles in the west Highlands, known to have featured seven towers, the remains of which lie buried on the island. This book provides a refreshed view of the lost medieval guise of the castle, of its 13th-century origins and form, and of who was responsible for building it, allowing the castle to be positioned accurately in the complex dynamics of powerholding and display of the earls of Ross and associated militarized kindreds of the west Highlands during six centuries of change up to the castle’s destruction in 1719. A new history and the details of the below-ground archaeology allow us to see the lost medieval castle in our mind’s eye 500 years after it vanished. Focusing on the huge amount of archaeological material unearthed during the campaign shows the castle hosted master craftspeople including goldsmiths, shipwrights and hereditary swordsmiths. Exquisite personal items, decorative mail armor and weapons, musical instruments, gaming pieces, imported pottery and animal bones bring the castle and its inhabitants back to life.

Political Ecologies of Meat Jody Emel,Harvey Neo,2015-05-15 Livestock production worldwide is increasing rapidly, in part due to economic growth and demand for meat in industrializing countries. Yet there are many concerns about the sustainability of increased meat production and consumption, from perspectives including human health, animal welfare, climate change and environmental pollution. This book tackles the key issues of contemporary meat production and consumption through a lens of political ecology, which emphasizes the power relations producing particular social, economic and cultural interactions with non-human nature. Three main topics are addressed: the political ecology of global livestock production trends; changes in production systems around the world and their implications for environmental justice; and existing and emerging governance strategies for meat production and consumption systems and their implications. Case studies of different systems at varying scales are included, drawn from Asia, Africa, the Americas and Europe. The book includes an editorial introduction to set the context and synthesize key messages for the reader.
