Remote Sensing and Image Interpretation Thomas Lillesand, Ralph W. Kiefer, Jonathan Chipman, 2015-02-18 Remote Sensing and Image Interpretation, 7th Edition is designed to be primarily used in two ways: as a textbook in the introductory courses in remote sensing and image interpretation, and as a reference for the burgeoning number of practitioners who use geospatial information and analysis in their work. Because of the wide range of academic and professional settings in which this book might be used, we have made the discussion “discipline neutral.” In short, anyone involved in geospatial data acquisition and analysis should find this book to be a valuable text and reference.

Undocumented Immigrants in the United States [2 volumes] Anna Ochoa O'Leary, 2014-02-25 This two-volume reference work addresses the dynamic lives of undocumented immigrants in the United States and establishes these individuals' experiences as a key part of our nation's demographic and sociological evolution. This two-volume work supplies accessible and comprehensive coverage of this complex subject by consolidating the insights of hundreds of scholars who have studied the issues of undocumented immigration in the United States for years. It provides a historical perspective that underscores the exponential growth of the undocumented population in the last three decades and presents a more nuanced, more detailed, and therefore more accurate portrait of undocumented immigrants than is available in general media. Also included are recommended resources that will serve researchers seeking more information on topics regarding undocumented immigrants.

Images of Organization Gareth Morgan, 2006-04-15 Since its first publication over twenty years ago, Images of Organization has become a classic in the canon of management literature. The book is based on a very simple premise—that all theories of organization and management are based on implicit images or metaphors that stretch our imagination in a way that can create powerful insights, but at the risk of distortion. Gareth Morgan provides a rich and comprehensive resource for exploring the complexity of modern organizations internationally, translating leading-edge theory into leading-

edge practice.

The Rise of Islam and the Bengal Frontier, 1204-1760 Richard M. Eaton,2023-07-28 In all of the South Asian subcontinent, Bengal was the region most receptive to the Islamic faith. This area today is home to the world's second-largest Muslim ethnic population. How and why did such a large Muslim population emerge there? And how does such a religious conversion take place? Richard Eaton uses archaeological evidence, monuments, narrative histories, poetry, and Mughal administrative documents to trace the long historical encounter between Islamic and Indic civilizations. Moving from the year 1204, when Persianized Turks from North India annexed the former Hindu states of the lower Ganges delta, to 1760, when the British East India Company rose to political dominance there, Eaton explores these moving frontiers, focusing especially on agrarian growth and religious change.
