This allows learners to acquire the language more effectively by accurately learning Korean pronunciation and intonation and deeply understanding the meaning of words. In addition, the MP3 files are divided into single words (sentences) so that you can memorize words and sentences, so individual learning is possible by allowing learners to skip words they already know and listen to words they do not know repeatedly. It is designed to first memorize noun and verb words, and then memorize sentences using these words. There are 5 sentences for each verb. Copyright and the Music Marketplace United States

United States Copyright Office, 2015-12-21 The Copyright Office has previously highlighted the outmoded rules for the licensing of musical works and sound recordings as an area in significant need of reform. Moreover, the Office has underscored the need for a comprehensive approach to copyright review and revision generally. This is especially true in the case of music licensing the problems in the music marketplace need to be evaluated as a whole, rather than as isolated or individual concerns of particular stakeholders.

Anarchism Paul Eltzbacher, 1908

Digitalization and Asia-Pacific Business Models Tachia Chin, Chris Rowley, Shouyang Wang, 2023-02-21 Owing to the convergence of multiple cultures coupled with the unprecedented rapid development in the decades since the late 1990s, the value creation and innovation logic of Asia Pacific business models (BMs) has been constantly altered by cultural heterogeneity. As a result, a more complex and diverse landscape relative to Western developed economy BMs evolved. Moreover, the digitalization has fundamentally changed the way people do business, which has promoted a new wave of BM evolution. Unlike a typical linear mode of innovation driven by market demands in many Western cultures, a large number of entrepreneurial enterprises from the Asia Pacific with eastern religions and philosophies have tended to adopt unconventional, culturally grounded strategies of value creation and innovation in their BMs. However, it is difficult to find a Western equivalent to the value-creating route that embodies the humanitarian spirit of Confucianism accommodating simultaneously social and economic values to accelerate innovation during internationalization in existing literatures. This book offers a more holistic picture and contemporary interpretation for identifying and characterizing the unorthodox innovation patterns and the perplexing value-creating logic of Asia Pacific BMs at the crossroads of diverse cultures. It was originally published as a special issue of the Asia Pacific Business Review. This book is supported by the National Natural Science Foundation of China (No. 72272136; 71988101).

Tuning, Timbre, Spectrum, Scale William A.

Sethares, 2013-06-05 Tuning, Timbre, Spectrum, Scale focuses on perceptions of consonance and dissonance, and how these are dependent on timbre. This also relates to musical scale: certain timbres sound more consonant in some scales than others. Sensory consonance and the ability to measure it have important implications for the design of audio devices and for musical theory and analysis. Applications include methods of adapting sounds for arbitrary scales, ways to specify scales for nonharmonic sounds, and techniques of sound manipulation based on maximizing (or minimizing) consonance. Special consideration is given here to a new method of adaptive tuning that can automatically adjust the tuning of a piece based its timbral character so as to minimize dissonance. Audio examples illustrating the ideas presented are provided on an accompanying CD. This unique analysis of sound and scale will be of interest to physicists and engineers working in acoustics, as well as to musicians and psychologists.
