Weathering as a Predisposing Factor to Slope Movements Domenico Calcaterra, Mario Parise, 2010 This volume is intended to provide an up-to-date overview of the approaches, methodologies and techniques devoted to better understanding of the weathering conditions of rock masses on slopes. According to the local conditions, a variety of slope movements may take place and involve weathered rock masses. Shallow and rapid soil slips evolving to debris flows are probably the most common type of slope movement. At the same time, deep-seated, intermittent landslides can also affect large volumes of weathered rocks and soils. Despite the high frequency of landslides in weathered materials, and the damage and casualties they repeatedly cause, little is known about the relationship between weathering and slope movements. This book presents worldwide case studies, where a variety of geological and geomorphological settings are discussed. The content is divided into three sections: the first is devoted to broad aspects of the weathering/landslide processes; the second and third sections include papers dealing with igneous/metamorphic and sedimentary weathered rocks, respectively.

Democratic Justice: Felix Frankfurter, the Supreme Court, and the Making of the Liberal Establishment Brad Snyder,2022-08-23 The definitive biography of Felix Frankfurter, Supreme Court justice and champion of twentieth-century American liberal democracy. The conventional wisdom about Felix Frankfurter—Harvard law professor and Supreme Court justice—is that he struggled to fill the seat once held by Oliver Wendell Holmes. Scholars have portrayed Frankfurter as a judicial failure, a liberal lawyer turned conservative justice, and the Warren Court’s principal

villain. And yet none of these characterizations rings true. A pro-government, pro-civil rights liberal who rejected shifting political labels, Frankfurter advocated for judicial restraint—he believed that people should seek change not from the courts but through the democratic political process. Indeed, he knew American presidents from Theodore Roosevelt to Lyndon Johnson, advised Franklin Roosevelt, and inspired his students and law clerks to enter government service. Organized around presidential administrations and major political and world events, this definitive biography chronicles Frankfurter's impact on American life. As a young government lawyer, he befriended Theodore Roosevelt, Louis Brandeis, and Holmes. As a Harvard law professor, he earned fame as a civil libertarian, Zionist, and New Deal power broker. As a justice, he hired the first African American law clerk and helped the Court achieve unanimity in outlawing racially segregated schools in *Brown v. Board of Education*. In this sweeping narrative, Brad Snyder offers a full and fascinating portrait of the remarkable life and legacy of a long misunderstood American figure. This is the biography of an Austrian Jewish immigrant who arrived in the United States at age eleven speaking not a word of English, who by age twenty-six befriended former president Theodore Roosevelt, and who by age fifty was one of Franklin Roosevelt's most trusted advisers. It is the story of a man devoted to democratic ideals, a natural orator and often overbearing justice, whose passion allowed him to amass highly influential friends and helped create the liberal establishment.

XML Topic Maps Jack Park, Sam Hunting, 2003 *XML Topic Maps* is designed to be a living document for managing information across the Web's interconnected resources. The book begins with a broad introduction and a tutorial on topic maps and XTM technology. The focus then shifts to strategies for creating and deploying the technology. Throughout, the latest theoretical perspectives are offered, alongside discussions of the challenges developers will face as the Web continues to

evolve. Looking forward, the book's concluding chapters provide a road map to the future of topic map technology and the Semantic Web in general.

Parallel Trade in Europe Christopher Stothers, 2007-04-02 Are parallel importers the key to unlocking the single European market, breaking down long-established national barriers for the benefit of all? Or do they instead just operate in a dubious grey market, free-loading on the investment of innovators and brand owners to the ultimate detriment of future investment? Parallel importers are in turn lionized and demonized, both in legal commentary and in the mainstream press. Trade is economically possible whenever the price of a particular product is higher in one area than in another. However, in the real world, trade will only occur if this price differential is sufficient to cover the costs of the trader together with a sufficiently attractive margin of profit. Some costs can be viewed as barriers to trade which result in an economically imperfect allocation of resources across the world. They can also operate as a waste of resources. Various attempts have

been made to reduce unnecessary barriers, encouraging trade, and reducing waste - the clearest example being the WTO, which is dedicated to eliminating barriers to trade. Regional trading areas, such as the European Community share these goals, along with certain other aims. Although many barriers have already been removed, the process is far from complete. Parallel trade occurs when goods are manufactured by one party (the manufacturer) and put onto the market in country A but are then imported into country B by a second party (the parallel importer). The manufacturer may have manufactured the goods and/or put them on the market in country A directly or through third parties, but the distinguishing feature of parallel trade is that the manufacturer did not intend the goods to end up in country B. Parallel trade normally occurs when the manufacturer sells the goods in question in both countries (thus the trade is parallel to the main trade organized by the manufacturer) but the price of the goods in country A is lower than the price in country B. However, it may also occur when the manufacturer does not sell in country B at all, or does not sell sufficient quantities there. The goods are typically described in country B as parallel imports or grey market goods. Understanding how EC law operates to restrict parallel trade involves exploring a complex matrix of different rules derived from the different fields of competition, free movement, and intellectual property, together with their corresponding private and public enforcement regimes, as well as the relationship with other external regimes. Author Christopher Stothers' comprehensive treatment of the subject successfully casts light on this difficult topic and is set to become the definitive work of reference in the area.
