Turbulent Boundary-layer Temperature Recovery Factors in Two-dimensional Supersonic Flow Maurice Tucker,1951 An analytical method is presented for obtaining turbulent temperature recovery factors for a thermally insulated surface in supersonic flow. The method is an extension of Squire's analysis for incompressible flow. The boundary layer velocity profile is represented by a power law and a similarity is postulated for squared-velocity the static-temperature-difference profiles.

*Trauma and Recovery in the Twenty-First-Century Irish Novel* Kathleen Costello-Sullivan,2018-05-07 The desire to engage and confront traumatic subjects was a facet of Irish literature for much of the twentieth century. Yet, just as Irish society has adopted a more direct and open approach to the past, so too have Irish authors evolved in their response to, and literary uses of, trauma. In Trauma and Recovery in the Twenty-First-Century Irish Novel, Costello-Sullivan considers the ways in which the Irish canon not only represents an ongoing awareness of trauma as a literary and cultural force, but also how this representation has shifted since the end of the twentieth and beginning of the twenty-first century. While earlier trauma narratives center predominantly on the role of silence and the individual and/or societal suffering that traumas induce, twenty-first-century Irish narratives increasingly turn from just the recognition of traumatic experiences toward exploring and representing the process of healing and recovery both structurally and narratively. Through a series of keenly observed close readings, Costello-Sullivan explores the work of Colm Tóibín, John Banville, Anne Enright, Emma Donohue, Colum McCann, and Sebastian Barry. In highlighting the power of narrative to amend and address memory and trauma, Costello-Sullivan argues that these works reflect a movement beyond merely representing trauma toward also representing the possibility of recovery from it.

*Road to Recovery* Sanchita Basu Das,2010-08-03 Singapore had been one of the nations severely affected by the 2008-09 global financial and economic crisis. The city state came under pressure through the financial, trade, and confidence channels. To counter these shocks, Singapore

policymakers undertook unprecedented monetary and fiscal policy measures. They subsequently charted a revival strategy that would help the country emerge stronger after the crisis. These all-encompassing policies together with the global economic recovery in 2009 helped the city state bounce back faster and stronger than many other regional economies. This book provides an insight into the events that occurred during the crisis and Singapore's successful navigation to economic recovery. Although much has been written about the global financial crisis of 2008-09, not enough has been said about how it affected Singapore and the policy response. In this highly readable book, Sanchita Basu Das fills this gap, explaining how the crisis rippled through the Singapore economy via trade channels, the financial sector, and asset markets. But the greatest strength of this volume is its comprehensive account of the extraordinary measures Singapore put in place to deal pre-emptively with what could have been huge declines in output and employment in the face of the collapse of trade and credit flows. Singapore's multi-pronged approach, and especially the fiscal support and loan guarantees contained in the 2009 budget, must go down as one of the boldest and most creative policy responses to a crisis. It is a valuable lesson to economics students and practitioners alike. This book gives you the full story. -Vikram Khanna, Associate Editor, The Business Times Sanchita Basu Das is to be congratulated for providing a fascinating, accessible, and forward-looking analysis of Singapore's response to the global economic crisis of 2008-09. As a highly trade-dependent economy, Singapore was hit hard by these events. But the government was nimble and quick to react. The author describes and evaluates this response, and draws out general lessons for crisis management and mitigation in small open economies. Highly recommended. -Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Australian National University.This is a comprehensive account of the impact of the global financial crisis on Singapore -- one of the most open economies in the world -- and policy responses by the government and central bank. The book identifies the need to move to a more knowledge-intensive economy as the key policy challenge for post-crisis Singapore. -Masahiro Kawai, Dean and CEO, Asian Development Bank Institute Singapore was affected disproportionately by the global economic crisis of 2008-09. While it is currently rebounding impressively, government officials and the private sector would do well to learn from the crisis experience in devising future policies. Moreover, the Singapore experience is instructive as to how external economic shocks can be transmitted to open economies and, hence, has great relevance beyond its borders. This book by Sanchita Basu Das gives a comprehensive survey of Singapore in crisis and provides a wealth of information and insightful analysis, using clear, non-technical language. It is extremely useful contribution to scholars, policymakers, and other students of Asian economics. -Michael G. Plummer, Organisation for Economic Co-operation and Development (OECD)

Security Technology, Disaster Recovery and Business Continuity Wai-chi Fang,Muhammad Khurram Khan,Kirk P. Arnett,Heau-jo Kang,Dominik Ślęzak,2010-11-25 Welcome to the proceedings of the 2010 International Conferences on Security Te- nology (SecTech 2010), and Disaster Recovery and Business Continuity (DRBC 2010) – two of the partnering events of the Second International Mega-Conference on Future Generation Information Technology (FGIT 2010). SecTech and DRBC bring together researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of security and disaster recovery methodologies, including their links to c- putational sciences, mathematics and information technology. In total, 1,630 papers were submitted to FGIT 2010 from 30 countries, which - cludes 250 papers submitted to SecTech/DRBC 2010. The submitted papers went through a rigorous reviewing process: 395 of the 1,630 papers were accepted for FGIT 2010, while 57 papers were accepted for SecTech/DRBC 2010. Of the 250 papers 10 were selected for the special FGIT 2010 volume published by Springer in the LNCS series. 34 papers are published in this volume, and 13 papers were wi- drawn due to technical reasons. We would like to acknowledge the great effort of the SecTech/DRBC 2010 Int- national Advisory Boards and members of the International Program Committees, as well as all the organizations and individuals who supported the idea of publishing this volume of proceedings, including SERSC and Springer. Also, the success of these two conferences would not have been possible without the huge support from our sponsors and the work of the Chairs and Organizing Committee.
