IT Essentials, 2013 Cisco's IT Essentials: PC Hardware and Software curriculum introduces the skills needed to help meet growing demand for entry-level information and communication technology (ICT) professionals. It covers the fundamentals of PC technology, networking, and security, and also introduces advanced concepts. While extensive online study resources are available, many have requested a low-cost printed resource for study offline. This booklet is that resource. Drawn directly from the online curriculum, it covers every skill and competency required by the new A+ exams (220-801 and 220-802): * Define IT and describe a computer's components * Protect self, equipment, and the environment * Assemble a desktop computer step-by-step, and install and navigate an operating system * Explain and perform preventive maintenance and basic troubleshooting * Upgrade or replace components of laptops and peripherals * Connect computers to networks * Implement basic security * Communicate well and behave professionally * Assess customer needs, analyze possible configurations, and recommend solutions This booklet enables students to study offline, highlight key points, and take handwritten notes. Its text is extracted word-for-word, from the online course, and headings with exact page correlations link to the online course for classroom discussions and exam preparation. Icons direct readers to the online Cisco Networking Academy curriculum to take full advantage of the images, labs, and activities provided there.

Naqvi,2020-07-01 State-owned enterprises (SOEs) play significant roles in developing economies in Asia and SOE performance remains crucial for economy-wide productivity and growth. This book looks at SOEs in Azerbaijan, Indonesia, Kazakhstan, the People's Republic of China, and Viet Nam, which together present a panoramic view of SOEs in the region. It also presents insights from the Republic of Korea on the evolving role of the public sector in various stages of development. It explores corporate governance challenges and how governments could reform SOEs to make them efficient drivers of the long-term productivity-induced growth essential to Asia's transition to high-income status.

Breaking the Phalanx Douglas A. Macgregor,1997-01-30 This work proposes the reorganization of America's ground forces on the strategic, operational and tactical levels. Central to the proposal is the simple thesis that the U.S. Army must take control of its future by exploiting the emerging revolution in military affairs. The analysis argues that a new Army warfighting organization will not only be more deployable and effective in Joint operations; reorganized information age ground forces will be significantly less expensive to operate, maintain, and modernize than the Army's current Cold War division-based organizations. And while ground forces must be equipped with the newest Institute weapons, new technology will not fulfill its promise of shaping the battlefield to American advantage if new devices are merely grafted on to old organizations that are not specifically designed

to exploit them. It is not enough to rely on the infusion of new, expensive technology into the American defense establishment to preserve America's strategic dominance in the next century. The work makes it clear that planes, ships, and missiles cannot do the job of defending America's global security issues alone. The United States must opt for reform and reorganization of the nation's ground forces and avoid repeating Britain's historic mistake of always fielding an effective army just in time to avoid defeat, but too late to deter an aggressor.

Youth in Africa's Labor Market Marito H. Garcia, Jean Fares, 2008-04-01 The authors examine the challenges facing Africa's youth in their transition from school to working life, and propose a policy framework for meeting these challenges. Topics covered include the effect of education on employment and income, broadening employment opportunities, and enhancing youth capabilities. The book includes a CD-ROM of case studies of four countries and household data on 13 countries.

A Reference Grammar of Russian Alan Timberlake, 2004-01-22 This book describes and systematizes all aspects of the grammar of Russian: the patterns of orthography, sounds, inflection, syntax, tense-aspect-mood, word order, and intonation. It is especially concerned with the meaning of combinations of words (constructions). The core concept is that of the predicate history: a record of the states of entities through time and across possibilities. Using predicate histories, the book presents an integrated account of the semantics of verbs, nouns, case, and aspect. More attention is paid to syntax than in any other grammars of Russian written in English or in other languages of Western Europe. Alan Timberlake refers to the literature on variation and trends in development, and makes use of contemporary data from the internet. This book will appeal to students, scholars and language professionals interested in Russian.

Tobacco And Cancer: The Science And The Story Stephen S Hecht, Dorothy K Hatsukami, 2022-01-17 This book tells the fascinating story of the relationship of tobacco products to cancer, from the first discoveries to the present day cancer pandemic and regulatory activities. Although there are already excellent books and monographs on this topic, both in the popular press and as government summaries, none relate the scientific story at the level of non-specialist graduate and medical students, researchers, or educated popular science readers. In this book, with a primary focus on the United States, the editors — Stephen S Hecht and Dorothy K Hatsukami — bring together 24 renowned experts on the subject of tobacco and cancer to summarize specific aspects of this critical topic in relatively non-technical terms while also incorporating some personal insights related to the story of the discovery process. This highly authoritative book is also expected to be an excellent teaching tool and basis for a course for graduate and medical students on this important topic.

Pinson Mounds Robert C. Mainfort Jr., 2013-10-01 Pinson Mounds: Middle Woodland Ceremonialism in the Midsouth is a comprehensive overview and reinterpretation of the largest Middle Woodland mound complex in the Southeast. Located in west Tennessee about ten miles south of Jackson, the Pinson Mounds complex includes at least thirteen mounds, a geometric earthen embankment, and contemporary short-term occupation areas within an area of about four hundred acres. A unique feature of Pinson Mounds is the presence of five large, rectangular platform mounds from eight to seventy-two feet in height. Around A.D. 100, Pinson Mounds was a pilgrimage center that drew visitors from well beyond the local population and accommodated many distinct cultural groups and people of varied social stations. Stylistically nonlocal ceramics have been found in virtually every excavated locality, all together representing a large portion of the Southeast. Along with an overview of this important and unique mound complex, Pinson Mounds also provides a reassessment of roughly contemporary centers in the greater Midsouth and Lower Mississippi Valley and challenges past interpretations of the Hopewell phenomenon in the region.
