A grammar of Komnzo Christian Döhler, Komnzo is a Papuan language of Southern New Guinea spoken by around 250 people in the village of Rouku. Komnzo belongs to the Tonda subgroup of the Yam language family, which is also known as the Morehead Upper-Maró group. This grammar provides the first comprehensive description of a Yam language. It is based on 16 months of fieldwork. The primary source of data is a text corpus of around 12 hours recorded and transcribed between 2010 and 2015. Komnzo provides many fields of future research, but the most interesting aspect of its structure lies in the verb morphology, to which the two largest chapters of the grammar are dedicated. Komnzo verbs may index up to two arguments showing agreement in person, number and gender. Verbs encode 18 TAM categories, valency, directionality and deictic status. Morphological complexity lies not only in the amount of categories that verbs may express, but also in the way these are encoded. Komnzo verbs exhibit what may be called ‘distributed exponence’, i.e. single morphemes are underspecified for a particular grammatical category. Therefore, morphological material from different sites has to be integrated first, and only after this integration can one arrive at a particular grammatical category. The descriptive approach in this grammar is theory-informed rather than theory-driven. Comparison to other Yam languages and diachronic developments are taken into account whenever it seems helpful.

Clause Structure Elly van Gelderen,2013-07-18 Clause structure is the most widely-studied phenomenon within syntactic theory, because it refers to how words and phrases are embedded within a sentence, their relationships to each other within a sentence, and ultimately, how sentences are layered and represented in the human brain. This volume presents a clear and up-to-date overview of the Minimalist Program, synthesizes the most important research findings, and explores the major shifts in generative syntax. As an accessible topic book, it includes chapters on framework, the clause in general, and the semantic, grammatical and pragmatic layers. Designed for graduate students and researchers interested in syntactic theory, this book includes a range of examples taken from data acquisition, typology and language change, alongside discussion questions, helpful suggestions for further reading and a useful glossary.

Parameters in the grammar of Basque Jon Ortiz de Urbina,2019-11-18 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century. This branch of linguistics, broadly known as Generative Grammar, is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the 'language organ'. The series comprises high quality monographs and collected volumes that address such issues. The topics in this series range from phonology to semantics, from syntax to information structure, from mathematical linguistics to studies of the lexicon.

Ouachita and Ozark Mountains Symposium ,2004 This volume presents 5-year results of silvicultural treatments associated with ecosystem management research in the Ouachita Mountains of Arkansas. Results from stand-level treatments include regeneration dynamics of pine and hardwood species, effects of treatment on birds and small mammals, mast production, visual quality, oak decline, and organic matter. Pretreatment landscape findings include measurements of woody vegetation; birds, mammals, and herpetofauna; fish communities and trophic structure; hydrology; and evaluation of susceptibility to gypsy moth outbreaks.

Hydraulic Fluid Power Andrea Vacca,Germano Franzoni,2021-04-12 HYDRAULIC FLUID POWER LEARN MORE ABOUT HYDRAULIC TECHNOLOGY IN HYDRAULIC SYSTEMS DESIGN WITH THIS COMPREHENSIVE RESOURCE Hydraulic Fluid Power provides readers with an original approach to hydraulic technology education that focuses on the design of complete hydraulic systems. Accomplished authors and researchers Andrea Vacca and Germano Franzoni begin by describing the foundational principles of hydraulics and the basic physical components of hydraulics systems. They go on to walk readers through the most practical and useful system concepts for controlling hydraulic functions in modern, state-of-the-art systems. Written in an approachable and accessible style, the book’s concepts are classified, analyzed, presented, and compared on a system level. The book also provides readers with the basic and advanced tools required to understand how hydraulic circuit design affects the operation of the equipment in which it’s found, focusing on the energy performance and control features of each design architecture. Readers will also learn how to choose the best design solution for any application. Readers of Hydraulic Fluid Power will benefit from: Approaching hydraulic fluid power concepts from an “outside-in” perspective, emphasizing a problem-solving orientation Abundant numerical examples and end-of-chapter problems designed to aid the reader in learning and retaining the material A balance between academic and practical content derived from the authors’ experience in both academia and industry Strong coverage of the fundamentals of hydraulic systems, including the equations and properties of hydraulic fluids Hydraulic Fluid Power is perfect for undergraduate and graduate students of mechanical, agricultural, and aerospace engineering, as well as engineers designing hydraulic components, mobile machineries, or industrial systems.

Complementizer Semantics in European Languages Kasper Boye,Petar Kehayov,2016-07-11 Complementizers may be defined as conjunctions that have the function of identifying clauses as complements. In recent years, it has become increasingly clear that they have additional functions. Some of these functions are semantic in the sense that they represent conventional contributions to the meanings of the complements. The present book puts a focus to these semantic complementizer functions.

Business Process Management Workshops Niels Lohmann,Minseok Song,Petia Wohed,2014-05-09 This book constitutes the refereed proceedings of nine international workshops held in Beijing, China, in conjunction with the 11th International Conference on Business Process Management, BPM 2013, in August 2013. The nine workshops comprised Business Process Intelligence (BPI 2013), Business Process Management and Social Software (BPMS2 2013), Data- and Artifact-Centric BPM (DAB 2013), Decision Mining and Modeling for Business Processes (DeMiMoP 2013), Emerging Topics in Business Process Management (ETBPM 2013), Process-Aware Logistics Systems (PALS 2013), Process Model Collections: Management and Reuse (PMC-MR 2013), Security in Business Processes (SBP 2013) and Theory and Applications of Process Visualization (TAProViz 2013). The 38 revised full papers presented were carefully reviewed and selected from 74 submissions.

Diversity in African languages Doris L. Payne,Sara Pacchiarotti,Mokaya Bosire ,2016-12-31 Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics, held at the University of Oregon. Most chapters focus on single languages, addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation, in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daats’iin (Gumuzic) stands out as the first-ever published article on this hitherto unknown and endangered language found in the Ethiopian-Sudanese border lands.

A Typology of Reference Systems Zygmunt Frajzyngier,2023-01-20 This volume offers a typology of reference systems across a range of

typologically and genetically distinct languages, including English, Mandarin, non-literary varieties of Russian, Chadic languages, and a number of understudied Sino-Russian idiolects. The term 'reference system' designates all functions within the grammatical system of a given language that indicate whether and how the addressee(s) should identify the referents of participants in the proposition. In this book, Zygmunt Frajzyngier explores the major functional domains, subdomains, and individual functions that determine the identification of participants in a given language, and outlines which are the most and least frequently found crosslinguistically. The findings reveal that bare nouns, pronouns, demonstratives and determiners, and coding on the verb ('agreement') have different functions in different languages. The concluding chapters offer explanations for these differences and explore their implications for the theory and methodology of syntactic analysis, for linguistic typology, and for syntactic theories.

Parameter Hierarchies and Universal Grammar Ian Roberts,2019-06-20 This book develops a minimalist approach to cross-linguistic morphosyntactic variation. Ian Roberts argues that the essential insight of the principles-and-parameters approach to variation can be maintained - albeit in a somewhat different guise - in the context of the minimalist programme for linguistic theory. The central idea is to organize the parameters of Universal Grammar (UG) into hierarchies that define the ways in which properties of individually variant categories and features may act in concert. A further leading idea, which is consistent with the overall goal of the minimalist programme to reduce the content of UG, is that the parameter hierarchies are not directly determined by UG, and are instead emergent properties stemming from the interaction of the three factors in language design. Cross-linguistic variation in word order, null subjects, incorporation, verb-movement, case/alignment, wh-movement, and negation are all analysed in the light of this approach. This book represents a significant new contribution to the formal study of cross-linguistic morphosyntactic variation on both the empirical and theoretical levels, and will appeal to researchers and students in all areas of theoretical linguistics and comparative syntax.

Reflexive constructions in the world's languages Katarzyna Janic,Nicoletta Puddu,Martin Haspelmath ,2023-07-11 This landmark publication brings together 28 papers on reflexive constructions in languages from all continents, representing very diverse language types. While reflexive constructions have been discussed in the past from a variety of angles, this is the first edited volume of its kind. All the chapters are based on original data, and they are broadly comparable through a common terminological framework. The volume opens with two introductory chapters by the editors that set the stage and lay out the main comparative concepts, and it concludes with a chapter presenting generalizations on the basis of the studies of individual languages.

Differential Object Marking in Romance Monica Alexandrina Irimia,Alexandru Mardale,2023-12-15 Differential marking as applied to direct objects has long been discussed as one of the characterizing traits of many Romance languages. There is, however, wide consensus that a detailed investigation into the nature of this phenomenon raises numerous challenges both at the empirical and theoretical level. Many questions are still being raised regarding which precise morpho-syntactic strategies count as differential object marking, whether the data can be unified, and, subsequently, how they are to be unified formally and theoretically. Additionally, a thorough investigation of this phenomenon is still needed for many Romance languages and especially at the micro-variation level. This volume brings together original papers addressing various aspects of differential object marking in Romance languages, focusing on micro-variation, from both a descriptive and formal perspective, touching on diachrony, language contact, synchrony, and using a large set of methodologies.
