Categories, Constructions, and Change in English

Syntax Nuria Yáñez-Bouza, Emma Moore, Linda van Bergen, Willem B. Hollmann, 2022-06-09 A pioneering collection of new research that explores categories, constructions, and change in the syntax of the English language. The volume, with contributions by world-renowned scholars as well as some emerging scholars in the field, covers a wide variety of approaches to grammatical categories and categorial change, constructions and constructional change, and comparative and typological research. Each of the fourteen chapters, based on the analysis of authentic data, highlights the wealth and breadth of the study of English syntax (including morphosyntax), both theoretically and empirically, from Old English through to the present day. The result is a body of research which will add substantially to the current study of the syntax of the English language, by stimulating further research in the field.

Analysis and Synthesis of Nonlinear Control Systems
Miguel Bernal, Antonio Sala, Zsófia Lendek, Thierry Marie Guerra, 2022-02-05 This book presents a modern perspective on the modelling, analysis, and synthesis ideas behind convex-optimisation-based control of nonlinear systems: it embeds them in models with convex structures.

Analysis and Synthesis of Nonlinear Control Systems begins with an introduction to the topic and a discussion of the problems to be solved. It then explores modelling via convex structures, including quasi-linear parameter-varying, Takagi-Sugeno models, and linear fractional transformation structures. The authors cover stability analysis, addressing Lyapunov functions and the stability of polynomial models, as well as the performance and robustness of the models. With detailed examples, simulations, and programming code, this book will be useful to instructors, researchers, and graduate students interested in nonlinear control systems.

Design Guide, 2010-11 Deals with all the aspects of the application of column and mass stabilisation. It provides a description of the best practice, mainly based on the experiences at seven test sites of the European project EuroSoilStab.

1001 Walks Barry Stone, 2018-10-04 1001 Walks You Must Experience Before You Die is the perfect guide to the world's most exhilarating walks. The ever-increasing passion for recreational walking is given fresh impetus with the creation of each new national park and wilderness area, the construction of every new walkway and the clearing of another fresh trail. The growth in popularity of pathways and woodland walks, and the conversion of canal banks and disused railways around the world to mixed-use walk and cycle-ways, means we now have unprecedented access to our cities and to ever-increasing tracts of our rural heritage. The wide-ranging, carefully chosen featured routes vary from the rugged delights of Wales's Pembrokeshire Coastal Path to the lush wilderness of Jamaica and the Harz Witches' Trail high in the German mountains. The hand-picked excursions cover overland paths, urban trails, mountain passes, coastal and shoreline strolls, and walks that explore the heritage of the world's most culturally rich destinations. There are gentle walks for beginners - some lasting barely an hour - and more demanding challenges for seasoned enthusiasts that will take months to achieve. Every page provides a wealth of

information about a must-try walk, including start and end points, overall distance, difficulty rating, terrain and an estimation of the time it should take to complete, along with links to specially commissioned digital route maps. In short, 1001 Walks You Must Experience Before You Die is an essential reference guide for all those who love to get out of their cars, get off their bikes and lace up their walking shoes.

Maternal Divinity, Yemonja Lloyd Weaver, Olurunmi Egbelade, 1998 As there are spirits in the earth, so the Yoruba believe that there are spirits dwelling in the rivers, lagoons and the sea. These spirits are revered principally by those who dwell near rivers, lagoons or the sea and who believe that the spirits, if suitably provided can in return provide man's needs. They control abundance of fish, they prevent the capsizing of canoes and river accidents; some of the spirits supply children to the barren. Yemonja, for example, is believed to be the goddess of waters generally and from her body, according to the people's belief, all rivers, lagoons and the sea flow out. Today she is associated with the Ogun River and is given elaborate worship in those areas through which it flows, particularly in Abeokuta.
