International Financial Statistics, January 2018 International Monetary Fund.

Statistics Dept.,2017-12-28 This paper discusses that for countries that are members of the euro area, the exchange rates shown are expressed in national currency units per SDR or per US dollar through 1998, and in euros per SDR or per US dollar thereafter. Data on members' IMF accounts are presented in the Fund Position section in the country tables and in four world tables. Terms and concepts of IMF accounts and the time series in the country and world tables are explained below. When a country joins the IMF, it is assigned a quota that fits into the structure of existing quotas. Quotas are considered in light of the member's economic characteristics, and take into account quotas of similar countries. The size of the member's quota determines, among other things, the member's voting power, the size of its potential access to IMF resources, and its share in allocations of SDRs.

International Financial Statistics , August 2017 International Monetary Fund.

Statistics Dept.,2017-07-31 This paper discusses currencies' relative importance in international trade and finance, the weights are based on the value of the exports of goods and services of the members issuing these currencies and the balances of their currencies officially held by members of the IMF. From January 1981 to December 1985, the currencies and currency weights of the five members having the largest exports of goods and services during 1975-1979 were the US dollar, 42 percent; deutsche mark, 19 percent; French franc, Japanese yen, and pound sterling, 13 percent each. From January 1986 through December 1990, reflecting the 1980-1984, the weights had changed to US dollar, 42 percent; deutsche mark, 19 percent; Japanese yen, 15 percent; French franc and pound sterling, 12 percent each. From January 1991 to December 1995, reflecting the years 1985-1989, the weights were US dollar, 40 percent; deutsche mark, 21 percent; Japanese yen, 17 percent; French franc and pound sterling, 11 percent each.

Guernsey Breeders' Journal ,1915

Herd Register of the American Guernsey Cattle Club American Guernsey Cattle Club,1916

International Financial Statistics, April 2018 International Monetary Fund. Statistics Dept.,2018-03-28 This paper discusses that for each quarter, the IMF prepares a financial transactions plan, in which it indicates the amounts of particular currencies and SDRs to be used during the relevant period. The IMF selects the currencies of members with strong balance of payments and reserve positions. It also seeks to promote, over time, balanced positions in the IMF. The effects of IMF transactions and operations are summarized in the IMF's holdings of members' currencies and in two other measures: reserve position in the IMF, and total IMF credit and loans outstanding. The IMF's holdings of a member's currency reflect, among other things, the transactions and operations of the IMF in that currency. This concept is used in calculating the amounts that a member can draw under tranche policies and in respect to certain of its obligations to the IMF.
