*Social Torture* Chris Dolan, 2009 As Director of the Refugee Law Project at the University of Makerere, Kampala, Uganda, Dolan offers a behind-the-scenes, cross-disciplinary study of one of Africa's longest running and most intractable conflicts. This book shows how, alongside the activities of the Lord's Resistance Army, government decisions and actions on the ground, consolidated by humanitarian interventions and silences, played a central role in creating a massive yet only very belatedly recognized humanitarian crisis. Not only individuals, but society as a whole, came to exhibit symptoms typical of torture, and the perpetrator-victim dichotomy became blurred. It is such phenomena, and the complex of social, political, economic and cultural dynamics which underpin them, which the author describes as social torture. Building

on political economy, social anthropology, discourse analysis, international relations and psychoanalytic approaches to violence, this book offers an important analytical instrument for all those seeking entry points through which to address entrenched conflicts, whether from a conflict resolution, post-conflict recovery or transitional justice perspective.

*The Aid Trap* R. Glenn Hubbard,William Duggan,2009-08-31 Over the past twenty years more citizens in China and India have raised themselves out of poverty than anywhere else at any time in history. They accomplished this through the local business sector the leading source of prosperity for all rich countries. In most of Africa and other poor regions the business sector is weak, but foreign aid continues to fund government and NGOs. Switching aid to the local business sector in order to cultivate a middle class is the oldest, surest, and only way to eliminate poverty in poor countries. A bold fusion of ethics and smart business, *The Aid Trap* shows how the same energy, goodwill, and money that we devote to charity can help local business thrive. R. Glenn Hubbard and William Duggan, two leading scholars in business and finance, demonstrate that by diverting a major share of charitable aid into the local business sector of poor countries, citizens can take the lead in the growth of their own economies. Although the aid system supports noble

goals, a local well-digging company cannot compete with a foreign charity that digs wells for free. By investing in that local company a sustainable system of development can take root.

*The River of Fire* Patrick Easter, 2012-03-01 It is March 1799. A sunken lugger in the Pool of London reveals a grisly secret: The bodies of two men entombed in the crew's cabin. Suspicion falls on a third member of the crew seen fleeing the scene. He had a known motive for murder. Against the background of a nation at war with Napoleon, River Surveyor Tom Pascoe finds his own life under threat as he digs deeper into the case. He uncovers the existence of French agents in London whose task is to strike a deadly blow to the heart of the capital and undermine England's ability to continue the war. Tom's job is further complicated by the presence of a new member of the police crew with a shocking secret of his own...

*Doing Critical Ethnography* Jim Thomas, 2021-04-23 The book offers communication researchers some of the best recent work on qualitative inquiry in the human disciplines. . . . Published by Sage, the leading publisher of qualitative research in the social sciences today. . . . Jim Thomas's method, well displayed in illustrations drawn from his emancipatory work in prisons, has important connections to the participatory action (Friere) and critical theory traditions. . . . This work brings the communication scholar up-to-date on where qualitative methods are in current sociological and educational discourse. --Norman K. Denzin in *Journal of Communication* If a researcher's responsibility entails the righting of social wrongs and producing valid research results, how is it possible to juxtapose these two goals? Representing the marriage of two traditions in social science, critical theory and qualitative research, *Doing Critical Ethnography* applies a critical worldview to the

conventional logic of cultural inquiry. This innovative volume does not oppose conventional ethnography; rather, it offers a style of thinking about the direct relationship between knowledge, society, and political action. The author defines the rules and guidelines for a praxis-oriented ethnographic tradition, one both ideologically engaged and scientifically valid. He also outlines the various types of critical ethnography and explains the tenets of each and how research can be carried out under these frameworks. This challenging volume will be useful to students and professionals in qualitative research in social theory, and critical studies.

**The Uncertain Universe** Bruce Kriger, 2008-09 What is the problem with cosmology? As a science cosmology is limited to the study of the universe as a whole, drawing conclusions based on astronomical observation and mathematical models. Over time cosmology has evolved from a speculative enterprise into a data-driven science; however, even in this new cosmology of facts and figures the origins of our universe remain a mystery, one that will perhaps never be solved. Every day new theories on the birth and evolution of the universe are made without the support of scientific observation-theories that may never be proven by hard evidence. And so cosmology remains a principle driven enterprise, with its roots deeply planted in the soil of uncertainty and wonder, in many ways completely contradictory to the definition of science as we know it today. Bruce Kriger takes readers on a breathtaking journey from the hallowed halls of Harvard to the Isle of Freedom and into the roots of the philosophy of cosmology, deploying an understanding of physics and philosophy to mount a serious challenge to the dominant cosmologist

view, expose the politics behind conventional scientific theories (proving that in many cases it isn't the science but the funding behind it that dictates which direction scientific discovery and cosmology itself will take) and define the ultimate limits of human knowledge to form a sober view of what we can know and what will always remain a mystery. Bruce Kriger is a prolific scientific writer whose work has been published in a number of languages. He is a member of several associations including: the Canadian Science Writers' Association, the Canadian Philosophical Association, the International Academy of Science, the World Future Society, the National Space Society and the Royal Astronomical Society of Canada and Planetary Society. In 1996 he has formed his own organization called the Kriger Research Group. Through this organization Kriger has been instrumental in bringing together other research organizations and training institutions for different scientific projects.

**The Keepers of Heaven's Gate** William Henry, 1997  
The Keepers of Heaven's Gate: The Millennial Madness (the Religion Behind the Rancho Santa Fe Suicides) is an attempt to elucidate the mystical and prophetic happenings which are fueling the furor of new millennial cultists. The end of the last millennium brought suicides and a rash of prophetic ideas surrounding the end of the world. Today history is again repeating this pattern. Is this the age of the end as some are suggesting, or the beginning of a new heaven and a new earth as others believe? Only history will reveal the actuality of future events as yet unwritten. This book represents the time line of escalating events that led to the suicides in Rancho Santa Fe, California. The time line

begins in November, 1996, with the first radio talk show and news reports about a space ship hiding behind the comet Hale-Bopp. The author presents the facts behind this new millennial end of the world thinking. Through painstaking research conducted throughout the 1990's, the author presents a thorough understanding of the belief structures of these new millennial groups. This book includes: The complete Hale-Bopp story. The core beliefs behind the root idea of ancient astronauts inhabiting a space ship trailing the comet Hale-Bopp. The ancient basis for the mystical teachings of the Heaven's Gate cult. This book brings to light the truth behind the religion which led to the Rancho Santa Fe suicides.
