### **A Guidebook to South Carolina Historical Markers**

, 2021-02-19 The South Carolina Historical Marker Program, established in 1936, has approved the installation of more than 1,700 interpretive plaques, each highlighting how places both grand and unassuming have played important roles in the history of the Palmetto State. These roadside markers identify and interpret places valuable for understanding South Carolina's past, including sites of consequential events and buildings, structures, or other resources significant for their design or their association with institutions or individuals prominent in local, state, or national history. This volume includes a concise history of the South Carolina Historical Marker Program and an overview of the marker application process. For those interested in specific historic periods or themes, the volume features condensed lists of markers associated with broader topics such as the American Revolution, African American history, women's history, the Civil War, and Reconstruction. While the program is administered by the South Carolina Department of Archives and History, most markers are proposed by local organizations that serve as a marker's official sponsor, paying its cost and assuming responsibility for its upkeep. In that sense, this inventory is a record not just of places and subjects that the state has deemed worthy of acknowledgment, but of those that South Carolinians themselves have worked to enshrine.

How to Protect Your Children on the Internet Gregory S. Smith, 2007-08-30 Parents and teachers are often ill-equipped to

deal with the variety of devices and applications such as email, instant messaging, browsing, blogs, cell phones, and personal digital assistant devices (PDAs) that can facilitate the dangers lurking online. *How to Protect Your Children on the Internet* offers a comprehensive overview of the ways in which youth use such technologies and exposes the risks they represent. At the same time, it provides a roadmap that will enable parents and teachers to become more engaged in children's online activities, arming them with techniques and tips to help protect their children. Smith underscores his arguments through chilling, real-life stories, revealing approaches people are using to deceive and to conceal their activities online. Filled with practical advice and recommendations, his book is indispensable to anyone who uses the Internet and related technologies, and especially to those charged with keeping children safe.

### **Transliteracy in Complex Information Environments**

Suzana Sukovic,2016-10-24 Transliteracy in Complex Information Environments considers this relatively new concept, which has attracted a great deal of interest in the library and information field, particularly among practitioners. The notion of transliteracy arises in the context of increasingly complex information and communication environments characterised by multimodality and new roles of creators and consumers. Transliteracy concerns the ability to apply and transfer a range of skills and contextual insights to a variety of settings. Rather than focusing on any one skillset or technology, transliteracy is about fluidity of movement

across a range of contexts. This book is concerned with processes of learning and knowledge creation. An understanding of transliteracy emerges from research data gathered in university and high school settings. Transliteracy is considered in relation to other literacies as an overarching framework. Applications in education and lifelong learning are discussed. Social aspects of transliteracy are considered in relation to academic cultures and broader social trends, particularly hybrid cultures. Provides an overarching model of transliteracy based on the well-established information literacy. Relates to a number of professional and academic fields, such as library and information, education, communication, media, and cultural studies. Integrates both professional and academic perspectives.

### **Adding Value to Libraries, Archives, and Museums**

Joseph R. Matthews, 2016-03-28 This book explains the concept of adding value and shows staff at libraries and other organizations why they need to take steps now to ensure they are adding new value to their communities—whether it be a local town or neighborhood, a faculty and student body, or a school. Value is at the core of every organization's purpose. Without value, organizations die. Libraries—as well as museums, archives, and galleries—have traditionally added value to their communities through their collections and services, but yesterday's collections and services are no longer enough. In order to remain sustainable, today's libraries, archives, museums, and galleries must explore new ways to add value that resonate in the lives of their customers. This unique book explains how addressing the 5 C's of adding value—content, context, connection, collaboration, and community—enables organizations to find new ways to invigorate their services, better serve their communities, and thrive today and tomorrow. It addresses adding value in the context of other key topics, such as crowdsourcing, embedded librarianship,

makerspaces, self publishing, and repurposing spaces. Filled with charts, tables, screenshots, and other visual representation, this is a useful and provocative guide that anyone interested in vesting in the successful future of libraries, archives, and museums needs to read.
