A Guidebook to South Carolina Historical Markers ,2021-02-19 The South Carolina Historical Marker Program, established in 1936, has approved the installation of more than 1,700 interpretive plaques, each highlighting how places both grand and unassuming have played important roles in the history of the Palmetto State. These roadside markers identify and interpret places valuable for understanding South Carolina's past, including sites of consequential events and buildings, structures, or other resources significant for their design or their association with institutions or individuals prominent in local, state, or national history. This volume includes a concise history of the South Carolina Historical Marker Program and an overview of the marker application process. For those interested in specific historic periods or themes, the volume features condensed lists of markers associated with broader topics such as the American Revolution, African American history, women's history, the Civil War, and Reconstruction. While the program is administered by the South Carolina Department of Archives and History, most markers are proposed by local organizations that serve as a marker's official sponsor, paying its cost and assuming responsibility for its upkeep. In that sense, this inventory is a record not just of places and subjects that the state has deemed worthy of acknowledgment, but of those that South Carolinians themselves have worked to enshrine.

Information Literacy Beyond Library 2.0 Peter Godwin,Jo Parker,2012-03-23 This book offers practical strategies for all library and information practitioners and policy makers with responsibility for developing and delivering information literacy programmes to their users. This new book picks up where the best-selling Information Literacy meets Library 2.0 left off. In the last three years the information environment has changed dramatically, becoming increasingly dominated by the social and the mobile. This new book asks where we are now, what is the same and what has changed, and, most crucially, how do we as information professionals respond to the new information literacy and become a central part of the revolution itself? The book is divided into three distinct sections. Part 1 explores the most recent trends in technology, consumption and literacy, while Part 2 is a resource bank of international case studies that demonstrate the key trends and their effect on information literacy and offer innovative ideas to put into practice. Part 3 assesses the impact of these changes on librarians and what skills and knowledge they must acquire to evolve alongside their users. Some of the key topics covered are: • the evolution of 'online' into the social web as mainstream • the use of social media tools in information literacy • the impact of mobile devices on information literacy delivery • shifting literacies, such as metaliteracy, transliteracy and media literacy, and their effect on information literacy. Readership: This is essential reading for all library and information practitioners and policy makers with responsibility for developing and delivering information literacy programmes to their users. It will also be of great interest to students of library and information studies particularly for modules relating to literacy, information behaviour and digital technologies.

Essential GPS Jamie Alan Belanger,Lee Patterson,Richard Veysey,Cynthia Ravinski,Steven Inman,D.L. Harvey,Timothy Lynch,Shelli-Jo Pelletier,Matthew Stephen D.,Robin Hansen,2015-11-30 The Greater Portland Scribists writing group first formed in July 2010 and published their first anthology the following June. Since then, they have been publishing an anthology every summer. After the publication of their fifth volume in 2015, they decided it would be fun to look back over the years and choose the best stories from each author. With the help of fans in autumn 2015, they have selected one story each from current and previous members. This collection is a great sampler of work spanning the years that we've been working together. Stories contained in this volume: – What Time Is Our Torture Session? by Lee Patterson (from Vol 1) – In the Business of Rotting by Cynthia Ravinski (from Vol 1) – Secret Under the Sand by Jamie Alan Belanger (from Vol 2: Lost Civilizations) – Otherkin by Steven Inman (from Vol 3: Metamorphosis) – Breed by Timothy Lynch (from Vol 4: Miscreations) – The Joke by Richard Veysey (from Vol 4: Miscreations) – Sand Fleas by D.L. Harvey (from Vol 5: Inversions) – Wolf and Raven by Shelli-Jo Pelletier (from Vol 5: Inversions) – Repurposed by Matthew Stephen D. (from Vol 5: Inversions) – Better Alive Than Dead by Robin Hansen (an all-new story exclusive to this volume)

Adding Value to Libraries, Archives, and Museums Joseph R. Matthews,2016-03-28 This book explains the concept of adding value and shows staff at libraries and other organizations why they need to take steps now to ensure they are adding new value to their communities—whether it be a local town or neighborhood, a faculty and student body, or a school. Value is at the core of every organization's purpose. Without value, organizations die. Libraries—as well as museums, archives, and galleries—have traditionally added value to their communities through their collections and services, but yesterday's collections and services are no longer enough. In order to remain sustainable, today's libraries, archives, museums, and galleries must explore new ways to add value that resonate in the lives of their customers. This unique book explains how addressing the 5 C's of adding value—content, context, connection, collaboration, and community—enables organizations to find new ways to invigorate their services, better serve their communities, and thrive today and tomorrow. It addresses adding value in the context of other key topics, such as crowdsourcing, embedded librarianship, makerspaces, self publishing, and repurposing spaces. Filled with charts, tables, screenshots, and other visual representation, this is a useful and provocative guide that anyone interested in vesting in the successful future of libraries, archives, and museums needs to read.

Teaching Green – The High School Years Tim Grant,Gail Littlejohn,2013-09-23 This resource is ideal for anyone working with young people in grades 9-12, whether in schools or in non-formal educational settings. Richly illustrated, it offers fifty teaching strategies that promote learning about natural systems and foster critical thinking about environmental issues, both local and global. It contains new approaches to learning, strategies for

living sustainably, and numerous activities that promote interdisciplinary learning. In addition, the book provides suggestions for how best to green individual subject areas, develop integrated learning programs, or replicate exemplary programs created by innovative schools and communities. Containing contributions from over sixty educators from across North America, the book's strength lies in its diverse content. Readers learn how best to apply systems thinking, teach about controversial issues, and use a step-by-step approach to creative problem-solving in environmental projects. Also provided are instructions for measuring the ecological footprint of a high school, creating an indoor "living system" that cleans water, monitoring air quality with lichens, and using green technologies to help green school campuses. Many articles and activities engage teenagers in outdoor learning and community restoration projects. Suggestions are included for connecting students with special needs to the environment around them. Readers will find accessible background information and suggestions for many practical projects and activities. It is sure to appeal to a wide range of teachers, educators, and parents seeking innovative ideas for incorporating green themes into their programs. Tim Grant and Gail Littlejohn are the editors of Green Teacher magazine, North America's award-winning environmental teaching resource.

  Technology for the School Librarian William O. Scheeren,2010-01-22 The world of the school librarian has changed significantly over the past ten years with the proliferation of technology into all phases of education; this book attempts to address these issues. What does a school librarian need to know about technology? Technology for the School Librarian: Theory and Practice is an introduction to all aspects of technology in the school library and provides a starting point for further study of this wide-ranging—and critically important—field. The only book that addresses both the theoretical and the practical aspects of the subject, Technology for the School Librarian is organized into 13 chapters describing the most vital topics in technology for school librarians. Within these chapters, school librarians (whether practicing or prospective) will be introduced to the practical aspects of

technology in the school library and presented with a theoretical framework that will allow them to continue their research and learning. Case studies facilitate understanding, as do the study questions included with each chapter.

Growing Community Health Literacy through Libraries Prudence W. Dalrymple,Brian Galvin,2020-08-24 The capacity to understand and communicate health information is a major international health concern. Sponsored by the Health and Biosciences Section of International Federation of Library Associations, this book highlights the contribution that librarians are making to improving health literacy and enabling citizens to be active participants in the management of their own health. Knowledge is power and the World Health Organization recognizes that health literacy, involving effective access to and understanding of health information, is essential to health and well-being in society by empowering and enabling citizens to participate in their own healthcare. The book presents inspiring studies from an international group of authors showing how libraries and librarians are partnering with diverse sectors of society including universities, hospitals, public health clinics, community-based organisations, voluntary bodies and government agencies, to help citizens understand and manage their health. It provides guidance by example to suggest how libraries can help citizens participate in their healthcare and their communities by collaborating with others to increase health literacy in society.
