*The Huey Long Murder Case* Hermann B. Deutsch,2020-09-04 Until I undertook to gather all available evidence for what I hoped to make a definitive inquiry into the circumstances of Huey Long's assassination, I had no idea of how many gaps there were in my knowledge of what took place. Yet except for the actual shooting, which fewer than a dozen persons were present to see, and for what then took place in the operating room of Our Lady of the Lake Sanitarium, most of what had any bearing on the circumstances took place before my eyes. Consequently I am so deeply indebted to so many who were good enough to fill those gaps with eyewitness reports, that no words of mine could begin to settle the score. Chief among those whose claims on my gratitude I can never wholly acquit are Dr. Cecil A. Lorio of Baton Rouge, one of the only two surviving physicians who played any part in the pre-operative, operative, and post-operative treatment of the dying Senator; Dr. Chester Williams, the present coroner of East Baton Rouge parish, who made it possible for me to see, study and understand the microfilmed hospital chart sketchily covering the thirty hours that elapsed between the time of the shooting and its fatal termination; Col. Murphy J. Roden, retired head of the Louisiana State police, who was the only person to grapple with Dr. Weiss; my friend and for many years colleague, Charles E. Frampton; Sheriff Elliott Coleman of Tensas parish; Chief Justice John B. Fournet of the Supreme Court of Louisiana; and Juvenile Court Judge James O'Connor, who carried the stricken Kingfish to the hospital after the shooting. No less am I under obligations to Earle J. Christenberry, [x] Seymour Weiss, and Richard W. Leche, to whom I owe so much of the information on background elements that alone make intelligible some of the otherwise enigmatic phases of what actually occupied no more than a fractional moment of crisis. My thanks are likewise tendered to Captain Theophile Landry, formerly an officer of the state police; to General Louis Guerre who was that organization's first commandant; to Adjutant-General Raymond Fleming of Louisiana; to Charles L. Bennett, managing Editor of the Oklahoma City Times; and particularly to Dr. James D. Rives and Dr. Frank Loria of New Orleans. To my one time professional competitor but always close friend, Congressman F. Edw. Hebert, I tender this inadequate word of appreciation for the assistance so freely rendered by him in gathering material. To another friend and colleague, Charles L. Dufour, I am deeply indebted for assistance in proofreading. And finally, I am more grateful than I can say to my brother Eberhard, an unfaltering--and what is more, successful--champion before the courts of the principle of press freedom, for advice in preparing the final draft of this manuscript; to LeBaron Barker for invaluable suggestions in revising the original draft; and to all others who, in ways great and small, have been of assistance in making possible the completion of this task. Hermann B. Deutsch.

**Modern U.S. Tanks and AFVs** Michael Green Greg Stewart, Conceived during World War I, tanks still play a crucial role on the modern battlefield providing excellent mobility, sophisticated communications, lethal firepower, and effective armor protection. Together, these assets provide the shock effect necessary to close with and destroy the enemy in most any condition. Modern U.S. Tanks & AFVs examines the development, capabilities, and service histories of some of the most important and interesting tanks, armored fighting vehicles (AFVs), wheeled armored firepower, and indirect armored fire-support vehicles used by the U.S. military today, including: amphibious assault vehicles (AAVP), the full range of M1 Abrams tanks, Bradleys, armored Humvees, and Strykers. Color photographs depict each type in training exercises. There will also be discussions of how the 1999 Army Vision transformation strategy calling for lighter and more maneuverable armed forces precipitated the development of some of the weapons covered.

*Airmobility 1961-1971* Ltg John J. Tolson,2011-09-26 This is the exciting story of the development of U.S. airmobile power from theory to practice, involving air transport, fixed wing aircraft, and attack helicopters culminating in Vietnam War operations. It includes analysis of airmobile combat operations; doctrinal and interservice disputes; equipment descriptions; and the organization of combat and support units. It also includes data about airmobility in South Vietnam's army and it features personal reflections of the author, who was at the center of airmobility development and who commanded large airmobile units. John J. Tolson in June 1939 participated in the first tactical air movement of ground forces by the U.S. Army. He was in all combat jumps of the 503d Parachute Infantry Regiment during World War II, became an Army aviator in 1957, and served as Director of Army Aviation and Commandant of the Army Aviation School. **Vegetation Dynamics** Derek Eamus, Alfredo Huete, Qiang Yu,2016-03-31 Understanding ecosystem structure and function requires familiarity with the techniques, knowledge and concepts of the three disciplines of plant physiology, remote sensing and modelling. This is the first textbook to provide the fundamentals of these three domains in a single volume. It then applies cross-disciplinary insights to multiple case studies in vegetation and landscape science. A key feature of these case studies is an examination of relationships among climate, vegetation structure and vegetation function, to address fundamental research questions. This book is for advanced students and researchers who need to understand and apply knowledge from the disciplines of plant physiology, remote sensing and modelling. It allows readers to integrate and synthesise knowledge to produce a holistic understanding of the structure, function and behaviour of forests, woodlands and grasslands.

The contributors have put forward holistic information regarding current research scenario of bryology in a range of environments to readers learning about research in applied bryology. The compilation of reviews presents reported findings related to various aspects of the subject, such as, conservation, diversity, tissue culture, bio-monitoring, computational bryology, molecular bryology, and species. Botanists and bryologists will receive updated information that will be valuable for their research work. The reader-friendly text is also suitable for beginners in applied plant science.
