The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Confluence of AI, Machine, and Deep Learning in Cyber Forensics Misra, Sanjay, Arumugam, Chamundeswari, Jaganathan, Suresh, S., Saraswathi, 2020-12-18 Developing a knowledge model helps to formalize the difficult task of analyzing crime incidents in addition to preserving and presenting the digital evidence for legal processing. The use of data analytics techniques to collect evidence assists forensic investigators in following the standard set of forensic procedures, techniques, and methods

used for evidence collection and extraction. Varieties of data sources and information can be uniquely identified, physically isolated from the crime scene, protected, stored, and transmitted for investigation using AI techniques. With such large volumes of forensic data being processed, different deep learning techniques may be employed. Confluence of AI, Machine, and Deep Learning in Cyber Forensics contains cutting-edge research on the latest AI techniques being used to design and build solutions that address prevailing issues in cyber forensics and that will support efficient and effective investigations. This book seeks to understand the value of the deep learning algorithm to handle evidence data as well as the usage of neural networks to analyze investigation data. Other themes that are explored include machine learning algorithms that allow machines to interact with the evidence, deep learning algorithms that can handle evidence acquisition and preservation, and techniques in both fields that allow for the analysis of huge amounts of data collected during a forensic investigation. This book is ideally intended for forensics experts, forensic investigators, cyber forensic practitioners, researchers, academicians, and students interested in cyber forensics, computer science and engineering, information technology, and electronics and communication.

Constitution 3.0 Jeffrey Rosen, Benjamin Wittes, 2011-11-11 At the beginning of the twenty-first century, breathtaking changes in technology are posing stark challenges to our constitutional values. From free speech to privacy, from liberty and personal autonomy to the right against self-incrimination, basic constitutional principles are under stress from technological advances unimaginable even a few decades ago, let alone during the founding era. In this provocative collection, America's leading scholars of technology, law, and ethics imagine how to translate and preserve constitutional and legal values at a time of dizzying technological change. Constitution 3.0 explores some of the most urgent constitutional questions of the near future. Will privacy become

obsolete, for example, in a world where ubiquitous surveillance is becoming the norm? Imagine that Facebook and Google post live feeds from public and private surveillance cameras, allowing 24/7 tracking of any citizen in the world. How can we protect free speech now that Facebook and Google have more power than any king, president, or Supreme Court justice to decide who can speak and who can be heard? How will advanced brain-scan technology affect the constitutional right against self-incrimination? And on a more elemental level, should people have the right to manipulate their genes and design their own babies? Should we be allowed to patent new forms of life that seem virtually human? The constitutional challenges posed by technological progress are wide-ranging, with potential impacts on nearly every aspect of life in America and around the world. The authors include Jamie Boyle, Duke Law School; Eric Cohen and Robert George, Princeton University; Jack Goldsmith, Harvard Law School; Orin Kerr, George Washington University Law School; Lawrence Lessig, Harvard Law School; Stephen Morse, University of Pennsylvania Law School; John Robertson, University of Texas Law School; Christopher Slobogin, Vanderbilt Law School; O. Carter Snead, Notre Dame Law School; Jeffrey Rosen, George Washington University Law School; Benjamin Wittes, Brookings Institution; Tim Wu, Columbia Law School; and Jonathan Zittrain, Harvard Law School.

Chronic Aftershock Jean-Philippe Mathy, 2021-09-10 The terrorist attacks of 11 September 2001 were a local event that nevertheless elicited strong reactions throughout the world. The unprecedented strike on the continental United States, its instantaneous broadcast, and its global stakes placed 9/11 at the centre of ideological debates that still rage today. The impact was especially felt in France. *Chronic Aftershock* looks at the significance of 9/11 in France as documented by prominent politicians, public intellectuals, journalists, sociologists, political scientists, philosophers, novelists, and conspiracy theorists. In his comprehensive account Jean-Philippe Mathy addresses the rise of a small but influential group of self-described “anti-anti-Americans” who shared the views of American neoconservatives in support of regime change in Iraq; the media controversy involving French Evangelical churches’ response to the religious views of George W. Bush; the widespread “I am Charlie” movement following the attacks against the offices of Charlie Hebdo; and the unending French national debate on the place of the Muslim community in a secular, universalist republic. The book also considers the November 2015 Islamist attacks in Paris, often described as “the French September 11.” Combining approaches from intellectual history, cultural studies, and literary criticism, *Chronic Aftershock* explores the legacy of 9/11 and recent instances of transatlantic divide to provide an innovative and timely assessment of the radicalized violence that remains a major threat in today’s world.
