Hybrid Warfare Williamson Murray, Peter R. Mansoor, 2012-07-09 Hybrid warfare has been an integral part of the historical landscape since the ancient world, but only recently have analysts - incorrectly - categorised these conflicts as unique. Great powers throughout history have confronted opponents who used a combination of regular and irregular forces to negate the advantage of the great powers' superior conventional military strength. As this study shows, hybrid wars are labour-intensive and long-term affairs; they are difficult struggles that defy the domestic logic of opinion polls and election cycles. Hybrid wars are also the most likely conflicts of the twenty-first century, as competitors use hybrid forces to wear down America's military capabilities in extended campaigns of exhaustion. Nine historical examples of hybrid warfare, from ancient Rome to the modern world, provide readers with context by clarifying the various aspects of conflicts and examining how great powers have dealt with them in the past.

Fighter Pilot's Heaven Donald S. Lopez, Sr., 2012-01-11 Fighter Pilot's Heaven presents the dramatic inside story of the American military's transition into the jet age, as told by a flyer whose life depended on its success. With colorful anecdotes about fellow pilots as well as precise technical information, Donald S. Lopez describes how it was to be "behind the stick" as a test pilot from 1945 to 1950, when the U.S. military was shifting from war to peacetime operations and from propeller to jet aircraft. An ace pilot who had served with Gen. Claire Chennault's Flying Tiger Fighter Group, Lopez was assigned at the close of World War II to the elite Proof Test Group of the Air Proving Ground Command. Located at Eglin Field (later Eglin Air Force Base) in Florida, the group determined the operational suitability of Air Force weapons systems and aircraft and tested the first operational jet, the P-80 Shooting Star. Jet fighters required new techniques, tactics, and weaponry.

Lopez recounts historic test flights in the P-59, P-80, and P-84, among other planes, describing complex combat maneuvers, hair-raising landings in unusual positions, and disastrous crashes and near crashes. This memoir is peppered with lively accounts of many pilots and their colleagues, revealing how airmen coped with both exhilarating successes and sometimes tragic failures.

Worldwide Research Efforts in the Fighting Against Microbial Pathogens from Basic Research to Technological Developments A. Mendez-Vilas, 2013-06 This book aims to disseminate recent findings in the fight against microbial pathogens which were presented at the second edition of the ICAR Conference Series (ICAR2012) on Antimicrobial Research, held in Lisbon, Portugal, November 2012, which attracted about 425 scientists from 55 countries. This forum was the natural continuation of this new series of conferences: the first edition, held in Valladolid, Spain in 2010, gathered more than 500 researchers from nearly 60 countries. ICAR aims at establishing itself as a key forum in Europe for the presentation, exchange, and dissemination of information and experiences on anti-microbe strategies. Anti is here taken in the broadest sense as against cell cycle, adhesion, or communication, when harmful for the human health, industry or economy (e.g. infectious diseases, chemotherapy, food, biomedicine, agriculture, livestock, biotechnology, water systems). Topics on antimicrobial natural products, antimicrobial resistance, antimicrobial surfaces, as well as methods and techniques, are included. This volume is a compilation of chapters written by active researchers that will provide readers with an up-to-date information about the current knowledge on antimicrobials in a worldwide context marked by the threat posed by the increasing antimicrobial resistance of microbial pathogens.

Fighting for Empowerment in an Age of Violence Boskovic, Milica, Misev, Gordana, Putnik, Nenad, 2022-06-30 In today's modern world, persistent violence against vulnerable groups and

minorities permeates societies, making it difficult for them to flourish. Empowering these groups has never been more important as society attempts to evolve and focus on inclusion. To understand the best practices and challenges of empowerment for minorities, further study is required. *Fighting for Empowerment in an Age of Violence* analyzes the different forms of violence against vulnerable groups and minorities, states their civil rights, and illustrates the forms of weakening and violence supported by authorities against their own citizens. The book also highlights the challenges for people marked as unequal or weak and the possibilities that the 21st century offers to empower them. Covering topics such as gender roles, political violence, societal security, and globalization, this reference work is ideal for government officials, sociologists, psychologists, politicians, security experts, activists, researchers, academicians, practitioners, scholars, educators, and students.

Challenges in Strategic Communication and Fighting Propaganda in Eastern Europe D. Sultănescu, 2019-02-08 In 2019, Eastern Europe will celebrate 30 years since the fall of communism, but this celebration takes place in a context of increased geopolitical competition in the region. The Western democratic model is under attack, not only in the countries of Eastern and Central Europe, but also in the core countries of the EU, and even in the United States. The messages and methods of dissemination used by anti-Western propaganda may differ with each national context, but the effect is the same – the slow, but progressive erosion of trust in democratic values and the institutions which embody them. This book presents papers from the NATO Advanced Research Workshop “Challenges in strategic communication and fighting propaganda in Eastern Europe. Solutions for a future common project” held in Chisinau, Moldova, on 25-27 April 2018. The workshop brought together institutional, academic and civic experts from the social sciences, journalism, computer science, and international relations to share insights into security and

strategic communication, as well as research results and expertise on the impact of social media and technological innovation, with the aim of shaping a new project with a common methodology to monitor, collect, process and interpret data on strategic communication and devise efficient tools to counteract anti-Western propaganda. With contributions about Romania, Moldova, Ukraine, the Western Balkans and the USA highlighting challenges such as detecting propaganda, identifying the groups most vulnerable to its influence and building mechanisms to strengthen trust, the book will be of value to all those with an interest in defending the Western democratic model.

Fighting at the Legal Boundaries Kenneth Watkin OMM, CD, QC, 2016-05-03 The international law governing armed conflict is at a crossroads, as the formal framework of laws designed to control the exercise of self-defense and conduct of inter-state conflict finds itself confronted with violent 21st Century disputes of a very different character. Military practitioners who seek to stay within the bounds of international law often find themselves applying bodies of law-IHRL, IHL, ICL-in an exclusionary fashion, and adherence to those boundaries can lead to a formal and often rigid application of the law that does not adequately address contemporary security challenges. *Fighting at the Legal Boundaries* offers a holistic approach towards the application of the various constitutive parts of international law. The author focuses on the interaction between the applicable bodies of law by exploring whether their boundaries are improperly drawn, or are being interpreted in too rigid a fashion. Emphasis is placed on the disconnect that can occur between theory and practice regarding how these legal regimes are applied and interact with one another. Through a number of case studies, *Fighting at the Legal Boundaries* explores how the threat posed by insurgents, terrorists, and transnational criminal gangs often occurs not only at the point where these bodies of law interact, but also in situations where there is significant overlap. In this regard, the exercise of

the longstanding right of States to defend nationals, including the conduct of operations such as hostage rescue, can involve the application of human rights based law enforcement norms to counter threats transcending the conflict spectrum. This book has five parts: Part I sets out the security, legal, and operational challenges of contemporary conflict. Part II focuses on the interaction between the jus ad bellum, humanitarian law and human rights, including an analysis of the historical influences that shaped their application as separate bodies of law. Emphasis is placed on the influence the proper authority principle has had in the human rights based approach being favored when dealing with criminal non-State actors during both international and non-international armed conflict. Part III analyzes the threats of insurgency and terrorism, and the state response. This includes exploring their link to criminal activity and the phenomenon of transnational criminal organizations. Part IV addresses the conduct of operations against non-State actors that span the conflict spectrum from inter-state warfare to international law enforcement. Lastly, Part V looks at the way ahead and discusses the approaches that can be applied to address the evolving, diverse and unique security threats facing the international community.

Proven Successes in Agricultural Development David J. Spielman,Rajul Pandya-Lorch,2010-01-01 The world has made enormous progress in the past 50 years toward eliminating hunger and malnutrition. While, in 1960, roughly 30 percent of the world's population suffered from hunger and malnutrition, today less than 20 percent do. Some five billion people now have enough food to live healthy, productive lives. Agricultural development has contributed significantly to these gains by increasing food supplies, reducing food prices, and creating new income and employment opportunities for some of the world's poorest people. This book examines where, why, and how past interventions in agricultural development have succeeded. It carefully reviews the policies, programs, and investments in agricultural development that have reduced hunger and poverty across Africa, Asia, and Latin America over the past half century. The 19 successes included here

are described in in-depth case studies that synthesize the evidence on the intervention's impact on agricultural productivity and food security, evaluate the rigor with which the evidence was collected, and assess the tradeoffs inherent in each success. Together, these chapters provide evidence of what works in agricultural development.
