The Art of Hypnosis C Roy Hunter,2010-05-30 Crown House is pleased to announce the publication of the third edition of The Art of Hypnosis: Mastering Basic Techniques by Roy Hunter. This updated third edition includes a new introduction by Conrad Adams PhD together with a revised Chapter 1. Roy Hunter is an expert in the field of hypnosis. He was specially selected to carry on the work of the 'Grand Master of Hypnotherapy', the late Charles Tebbetts, who was a master teacher and contributor to the art/science of hypnosis and hypnotherapy. This book is based upon the training course of Tebbetts, which has been updated by Roy Hunter. Tebbetts' training has formed the basis of a large number of hypnotherapy courses taught in America and Europe. The Art of Hypnosis is well-written and easy to read and understand, even for the novice. In-depth and practical information is given on how to achieve maximum results in a hypnotic session by phrasing suggestions properly and by using various techniques to determine which approach is best for each individual client.

The Clinical Use of Hypnosis in Cognitive Behavior Therapy Robin A. Chapman, PsyD, ABPP,2005-08-22 Integrating cognitive behavior therapy (CBT) with hypnosis may increase benefits to clients suffering from a broad range of mental and physical health problems. This practitioner's guide, written by some of the most influential clinical psychologists, educators, and hypnotists, brings together these two methods of treatment and provides a theoretical framework for this integration. By thoroughly reviewing the evidence-based research for the addition of hypnosis to cognitive behavioral treatments and illustrating a variety of clinical applications, the contributors show how the integration can mean productive treatment of clients who might otherwise not have progressed as quickly or successfully. A useful final chapter addresses the process of becoming a practitioner of both CBT and hypnosis.

Anxiety 101 Moshe Zeidner, PhD,Gerald Matthews, PhD,2010-10-20 This is the book I've been waiting for. The field has needed a clear and thorough review of anxiety, and now it exists. Joseph LeDoux, PhD, author, The Emotional Brain and Synaptic Self Center for Neural Science, New York University Anxiety 101, written by two prominent figures in the field of anxiety research, provides a thorough introduction to the concept of anxiety, placing it in the broad matrix of human concerns. The authors address evolutionary origins of anxiety, functions that anxiety and fear play in maintaining life, and ways in which these emotions can get out of control. An excellent introduction to students who want to understand the many ways in which scientists have approached the topic of anxiety. Charles S. Carver , PhD, Distinguished Professor of Psychology. Department of Psychology, University of Miami What are the origins of anxiety? How do we best assess anxiety? How does anxiety affect cognitive outcomes? Does intervention help? This book provides students with a clear understanding of anxiety research and practice. It reflects the substantial progress recently made in research in the areas of differentiation, new theoretical approaches, advances in locating the neurobiological underpinnings of anxiety and anxiety disorders, assessment, and treatment techniques. It covers many of the major contexts that produce anxiety in modern society, including tests, sports performance, social interaction, and more. The authors have culled vast amounts of up-to-date information on anxiety, including theory, research, assessment, individual differences, and interventions. Anxiety 101 draws upon contributions from the fields of personality and social psychology, stress, coping and emotions, psychobiology, and neuroscience in order to provide the most comprehensive information available. Key Features: Provides a historical and theoretical approach to the study of anxiety Presents a unified conceptual and research framework based on current transactional and cognitive-motivational views of stress and anxiety Includes a state-of-the-art review of current theories, research findings, assessment, and treatment The Psych 101 Series Short, reader-friendly introductions to cutting-edge topics in psychology. Psychiatry Konstantinos N. Fountoulakis,2021-11-26 This book was the end product of life experiences, thoughts and intellectual wanderings of the author, who through his career and for the last twenty years was always serving all the three aspects of a Psychiatrist: He is a clinician, a researcher and an academic teacher. The book includes a comprehensive history of Psychiatry since antiquity and until today, with an emphasis not only on main events but also specifically and with much detail and explanations, on the chain of events that led to a particular development. At the center of this work is the question 'What is mental illness?' and 'Does free will exist?'. These are questions which tantalize Psychiatrists, neuroscientists, psychologists, philosophers, patients and their families and the sensitive and educated lay persons alike. Thus, the book includes a comprehensive review and systematic elaboration on the definition and the concept of mental illness, a detailed discussion on the issue of free will as well as the state of the art of contemporary Psychiatry and the socio-political currents it has provoked. Finally the book includes a description of the academic, social and professional status of Psychiatry and Psychiatrists and a view of future needs and possible developments. A last moment addition was the chapter on conspiracy theories, as a consequence of the experience with the social media and the public response to the COVID-19 outbreak which coincided with the final stage of the preparation of the book. Their study is an excellent opportunity to dig deep into the relation among human psychology, mental health, the society and politics and to swim in intellectually dangerous waters.

Non-Pharmacological Interventions Gregory Ninot,2020-11-27 Non-pharmacological interventions (NPIs) have become essential solutions for better living, preventing disease, and self-care, in addition to biomedical treatments, and for increasing longevity without loss of quality of life. Over the past 20 years, these practices have gone from general diet and hygiene advice to targeted and personalized solutions for prevention, care optimization, and curative treatments. Selected empirically for centuries or recently with the help of technological innovations and epigenetic, interventional, and medico-economic studies, their development is growing and diversifying around the world. Today an NPI ecosystem is made up of a myriad of public and private actors. As interest in NPIs grows, so do questions about safety, effectiveness, standardization, ethical practice, and surveillance. In this book, the author answers these questions with a scientific approach, because evidence-based science, evidence-based practice, clinical research, and data monitoring have revolutionized this field. Topics explored among the chapters include: · Defining Non-Pharmacological Interventions · The Benefits and Dangers of Non-Pharmacological Interventions · Motives and Facilitators of Non-Pharmacological Intervention Use · The Market for Non-Pharmacological Interventions · Evaluation of Non-Pharmacological Interventions · The Future of Non-Pharmacological Interventions Non-Pharmacological Interventions: An Essential Answer to Current Demographic, Health, and Environmental Transitions is a must-have resource for clinicians and other health professionals, researchers, students, health insurers, policy-makers, caregivers, and entrepreneurs in the health and wellness space, as well as any users who wish to inform themselves about NPIs.

This book seeks to remedy this situation by gathering together all of the relevant insights into a single authoritative source gathered from the leading specialists in the field. It aims to cover all of the main relevant issues including the assessment, care, management and treatment of mental health problems, as well as the prevention of mental health problems among this occupational group.
