Glacier systems and seasonal snow cover in six major Asian river basins: water storage properties under changing climate. Savoskul, O. S., Smakhtin, V., 2013 This paper presents a comprehensive assessment of the water storage properties of glaciers and seasonal snow, carried out for the first time at a major river basin scale, for the Indus, Ganges, Brahmaputra, Amu Darya, Syr Darya and Mekong basins. It analyzes the changes of glaciers and snow under recent climate change, i.e., between the baseline (1961-1990) and current (2001-2010) periods. The paper also addresses climate change sensitivity of glacier systems and the changes that might be expected under a warming scenario for the end of the twenty-first century.

**The Copyright / Trademark Interface** Martin Senftleben, 2020-12-10 The Copyright/Trademark Interface How the Expansion of Trademark Protection Is Stifling Cultural Creativity Martin Senftleben The registration of cultural icons as trademarks has become a standard protection strategy in the field of contemporary cultural productions and plays an ever-increasing role in the area of cultural heritage. Attempts to register and 'evergreen' the protection of cultural signs, ranging from 'Mickey Mouse' to the 'Mona Lisa', are no longer unusual. This phenomenon – characterized by the EFTA Court as trademark registrations motivated by 'commercial greed' – has become typical of an era where trademark law is employed strategically to withhold or remove cultural symbols from the public domain. In an extraordinary analysis of the

clash between culture and commerce, and imbalances caused by protection overlaps arising from cumulative copyright and trademark protection, this book draws attention to the corrosive effect of indefinitely renewable trademark rights and underscores the necessity to safeguard central preconditions for the proper functioning of the copyright system in society at large: the freedom to use pre-existing works as reference points for the artistic discourse and building blocks for new creations, and the need to ensure the constant enrichment of the public domain. Emphasizing how overlapping copyright and trademark protection endangers the proper functioning of intellectual property rights in the literary and artistic domain, the author examines whether the intellectual property system is capable of mitigating the risks arising from cumulative protection. Such issues and topics as the following are treated in depth: the different configuration of intellectual property rights in accordance with different policy objectives and societal functions, in particular the cultural imperative in copyright law and the market transparency imperative in trademark law; problems arising from the registration of cultural icons for use on souvenir and merchandising articles; lack of sufficient safeguards in trademark law against cultural heritage branding; current scope of trademark rights, including the protection of brand value and communication functions, and the deterrent effect of trademark protection on cultural creativity; possibility of a categorical exclusion of contemporary cultural icons and

cultural heritage material from trademark protection; development of a strict gatekeeper requirement of 'use as a mark' to prevent unjustified trademark infringement claims; development of robust, culturally based defences against trademark infringement claims; and general guidelines for the regulation of protection overlaps in intellectual property law, based on insights derived from the analysis of copyright/trademark overlaps. Drawing on aesthetic, sociological and economic theories that support initiatives to safeguard the autonomy of the literary and artistic domain and support remix activities of artists, the author suggests sound criteria for identifying signs with cultural significance that should be excluded from trademark registration. The book shows how intellectual property law can make rights cumulation strategies less attractive and avoid the loss of inner consistency and social legitimacy, easing the tension between indefinitely renewable trademark rights and the need to preserve and cultivate the public domain of cultural expressions and other intellectual creations that enjoy protection for a limited period of time, such as industrial designs and technical know-how. Its assessment criteria will assist and enable trademark examiners and judges to identify relevant cultural signs, and its proposals for regulatory responses to protection overlaps in intellectual property law will prove of great and lasting value to lawyers, policymakers, and scholars dealing with intellectual property law.

**Climate Impacts on the Baltic Sea: From Science to Policy** Marcus

Reckermann,2012-04-23 The Baltic Sea area is an old cultural landscape with a well developed international framework for monitoring, assessing and managing its marine ecosystems. It provides a good case study for other regions where such management is being set up. The chapters in this book are based on lectures given at a summer school on the Baltic Sea island of Bornholm in the summer of 2009. They cover a range of topics, spanning from detailed descriptions of political agreements that protect the marine environment, to basic modelling instructions, to an assessment of the possible impacts of climate change on the marine ecosystem, to a reflection on the role of climate scientists and their responsibility in society. This interdisciplinary book is primarily directed at students and lecturers of the environmental disciplines to provide an overview of the possible impacts of climate change on the Baltic Sea. It is also intended to serve as a background reference for scientists and policy makers, both for the Baltic Sea area and more generally. The book is a contribution to the BALTEX programme and to the BONUS+ projects ECOSUPPORT and Baltic-C.

**Remote Sensing of Land Use and Land Cover** Chandra P. Giri,2016-04-19 Filling the need for a comprehensive book that covers both theory and application, Remote Sensing of Land Use and Land Cover: Principles and Applications provides a synopsis of how remote sensing can be used for land-cover characterization, mapping, and monitoring from the local to the global scale. With contributions by leading scientists from aro

**Geospatial Technologies in Environmental Management** Nancy Hoalst-Pullen, Mark W. Patterson, 2010-09-27 Geotechnologies and the Environment: Environmental Applications and Management presents an engaging and diverse array of physically-oriented GIScience applications that have been organized using four broad themes. While the book's themes are by no means mutually exclusive, Hoalst-Pullen and Patterson provide an elegant overview of the field that frames the collection's subsequent thematic structure – Wilderness and Wildlife Response; Glaciers; Wetlands and Watersheds; and Human Health and the Environment. Over the course of the volume, the contributing authors move beyond basic (and in some respects clichéd) landscape ecology of land use change to explore human-environment dynamics heretofore not emphasized in the applied literature. In doing so, the collection presents a compelling case for the importance of developing new physically-oriented GIScience applications that reside at the nexus of social and natural systems with the explicit intent of informing public policy and/or the decision making practices of resource managers. Individually, the chapters themselves are intentionally diverse. The diversity of the approaches, their spatial context, and emphases on management applications demonstrate the many ways in which geotechnologies can be used to address small and big problems in both developed and developing regions. The collection's internal coherence is derived – like the book series – from its explicit appeal to a wide variety of human-environment interactions with potential policy linkages.

Pensions at a Glance 2009 Retirement-Income Systems in OECD Countries

OECD,2009-10-15 This third edition of Pensions at a Glance updates in-depth information on the key features of mandatory pension systems—both public and private—in the 30 OECD countries, including projections of retirement income for today's workers.

*Applications of Case Study Research* Robert K. Yin,2011-06-21 Designed to help both graduate students and start-up researchers with their own case study research, this book presents 21 individual applications of the case study method together with cross-referenced discussions of key methodological issues. Many of the applications—including a wide array of single-case studies useful as examples for solo researchers—have been shortened or re-written expressly for this book.

*From the Great Recession to Labour Market Recovery* I. Islam,S.

Verick,2010-12-14 This book sheds light on the impact of the Great Recession from the perspective of both developing and developed countries. It traces the complex and multiple causes of the Great Recession, delineates the diversity in the macroeconomic and labour market consequences, and highlights the effectiveness of policy responses undertaken so far.

*Advances in Business, Operations, and Product Analytics* Matthew J.

Drake,2015-08-13 If you're seeking to master business analytics, case studies offer invaluable help: they expose you to the entire decision-making process, helping you practice an active role in both performing analysis and using its

output to recommend optimal decisions. Now, drawing on his extensive teaching and consulting experience, Prof. Matthew Drake has created the ideal new casebook for all analytics students and practitioners. Drake, author of the widely-praised Applied Business Analytics Casebook, now presents a collection of up-to-date cases that are longer and more detailed than those typically presented in undergraduate texts, but concise and focused enough to be taught in a single classroom session. Organized by analytical technique, Advances in Business, Operations, and Product Analytics covers: Descriptive analytics: descriptive statistics, sampling/inferential statistics, statistical quality control, and probability Predictive analytics: forecasting, demand managing, data and text mining Prescriptive analytics: optimization-based modeling, simulation-based modeling, decision analysis, and multi-criteria decision making Industry-specific analytics: HR and managerial analytics, financial analytics, and healthcare/life sciences In addition to practitioners, this casebook will be especially valuable to students and faculty in undergraduate and masters' courses that cover topics in business analytics, and courses applying analytics to specific industries such as healthcare, or specific business functions such as marketing.

Solid Waste Landfilling Raffaello Cossu, Rainer Stegmann, 2018-11-29 Solid Waste Landfilling: Concepts, Processes, Technology provides information on technologies that promote stabilization and minimize environmental impacts in landfills. As the main challenges in waste management are the reduction and

proper treatment of waste and the appropriate use of waste streams, the book satisfies the needs of a modern landfill, covering waste pre-treatment, in situ treatment, long-term behavior, closure, aftercare, environmental impact and sustainability. It is written for practitioners who need specific information on landfill construction and operation, but is also ideal for those concerned about the possible return of these sites to landscapes and their subsequent uses for future generations. Includes input by international contributors from a vast number of disciplines Provides worldwide approaches and technologies Showcases the interdisciplinary nature of the topic Focuses on sustainability, covering the lifecycle of landfills under the concept of minimizing environmental impact Presents knowledge of the legal framework and economic aspects of landfilling

Studies in Law, Politics and Society Austin Sarat, 2015-01-12 The articles in this volume of Studies in Law, Politics, and Society cover an exciting and diverse range of topics, from immigration and human rights policies to same-sex marriage and capital punishment debates.

*Dictionary of Information Science and Technology* Mehdi Khosrowpour, 2012-12-31 The 2nd edition of the Dictionary of Information Science and Technology is an updated compilation of the latest terms and definitions, along with reference citations, as they pertain to all aspects of the information and technology field--Provided by publisher.

Biology of Polar Benthic Algae Christian Wiencke, 2010-12-20 This work

synthesizes the current state of knowledge on the biology of polar benthic marine algae and presents an outlook on their responses to changing environmental conditions in polar regions. Topics treated include environment, biodiversity and biogeography of micro- and macroalgae, including an update of the knowledge of the red algal flora of Antarctica. It treats the chemical ecology as well as the primary production and ecophysiology of polar benthic algae with new information on the important contribution of benthic microalgae to the productivity in coastal areas.

**Comprehensive Remote Sensing** ,2017-11-08 Comprehensive Remote Sensing covers all aspects of the topic, with each volume edited by well-known scientists and contributed to by frontier researchers. It is a comprehensive resource that will benefit both students and researchers who want to further their understanding in this discipline. The field of remote sensing has quadrupled in size in the past two decades, and increasingly draws in individuals working in a diverse set of disciplines ranging from geographers, oceanographers, and meteorologists, to physicists and computer scientists. Researchers from a variety of backgrounds are now accessing remote sensing data, creating an urgent need for a one-stop reference work that can comprehensively document the development of remote sensing, from the basic principles, modeling and practical algorithms, to various applications. Fully comprehensive coverage of this rapidly growing discipline, giving readers a detailed overview of all aspects of Remote Sensing principles and

applications Contains 'Layered content', with each article beginning with the basics and then moving on to more complex concepts Ideal for advanced undergraduates and academic researchers Includes case studies that illustrate the practical application of remote sensing principles, further enhancing understanding

The Daily Show and Rhetoric Trischa Goodnow Knapp, 2011 The Daily Show and Rhetoric: Arguments, Issues, and Strategies examines the popular Comedy Central program from a rhetorical perspective to uncover the ways in which Jon Stewart, the cast, and writers critique mainstream media and politicians. This volume analyzes the nature of The Daily Show, the arguments the program makes about the media and politics, the strategies that are used, and some of the particular issues about which the program makes arguments. Overall, the contributors skillfully demonstrate that The Daily Show is more than just a show designed to make the audience laugh. Rather, the show provides useful information and arguments so that the audience can make informed decisions about the world around them.

**The Right to Regulate in International Investment Law** Catharine Titi, 2014-12-01 Since the inception of the international investment law system, investment promotion and protection have been the *raison d'être* of investment treaties and states have confined their policy space in order to attract foreign investment and protect their investors abroad. Languishing in relative obscurity until recently, the right to regulate has gradually come

to the spotlight as a key component of negotiations on new generation investment agreements around the globe. States and regional organisations, including, notably, the European Union and the United States, have started to examine ways in which to safeguard their regulatory power and guide - and delimit - the interpretive power of arbitral tribunals, by reserving their right to pursue specific public policy objectives. The monograph explores the status quo of the right to regulate, in order to offer an appraisal and a reference tool for treaty-makers, thus contributing to a better understanding of the concept and the broader discourse on how to enhance the investment law system's legitimacy.

Agriculture and Climatic Issues in South Asia Rukhsana Sarkar, Asraful Alam, Azizur Rahman Siddiqui, 2023-12-22 This book presents focussed information related to dynamic cropland transformation, agriculture development, climate change, and environment with the application of advance geospatial technology. It describes research using geospatial tools and techniques to develop the models, design, and planning for agricultural land use optimization especially in south Asian countries. It covers agriculture production, water scarcity, industrial development, natural resources, environmental degradation, and sustainable development. Features: Provides the adaptation strategy from a multidisciplinary resilience perspective Addresses contemporary agricultural resilience to various climate change issues Develops novel approaches for sustainability with environmentally

sound practices Discusses methodological and innovative approaches at local to global perspective Reports research using geospatial tools and techniques to develop the models, design, and planning for agricultural land use optimization The book is aimed at researchers, professionals, and graduate students in GIS, environmental engineering, geography, agriculture, and climate studies.

**The First Farmers of Central Europe** Penny Bickle, Alasdair Whittle, 2013-07-09 From about 5500 cal BC to soon after 5000 cal BC, the lifeways of the first farmers of central Europe, the LBK culture (Linearbandkeramik), are seen in distinctive practices of longhouse use, settlement forms, landscape choice, subsistence, material culture and mortuary rites. Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in, for instance, the expansion and increasing density of settlement, progressive regionalisation in pottery decoration, and at the end some signs of stress or even localised crisis. Although showing many features in common across its very broad distribution, however, the LBK phenomenon was not everywhere the same, and there is a complicated mixture of uniformity and diversity. This major study takes a strikingly large regional sample, from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley, and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities, through a wide-ranging study of diet, lifetime mobility, health and physical

condition, the presentation of the bodies of the deceased in mortuary ritual. It uses an innovative combination of isotopic (principally carbon, nitrogen and strontium, with some oxygen), osteological and archaeological analysis to address difference and change across the LBK, and to reflect on cultural change in general.

Climate Change 2013: The Physical Science Basis Intergovernmental Panel on Climate Change, 2014-03-24 The Fifth Assessment Report of the IPCC is the standard scientific reference on climate change for students, researchers and policy makers.

**Community/Public Health Nursing Practice** Frances A. Maurer, Claudia M. Smith, 2012-10-01 Focusing on practical, need-to-know information, Community/Public Health Nursing Practice helps you learn how to apply the nursing process at the community and family level. It features an engaging, easy-to-understand writing style, as well as assessment tools, detailed case studies, and clinical examples that demonstrate how key concepts apply to real-world practice. Additional resources on the companion Evolve website expand and enhance content within the text. Practical features including Case Studies, Ethics in Practice, and The Nursing Process in Practice illustrate real-world applications of key community/public health nursing concepts. A complete unit on the community as client helps you understand how the assessment, diagnosis, planning, intervention, and evaluation steps of the nursing process apply to the community, as opposed to an individual. A

chapter devoted to community assessment provides a complete assessment tool and shows you how the tool applies to two different types of communities. UNIQUE! A chapter on screening and referral promotes population-focused practice, which is the crux of community/public health nursing. A separate unit on the family emphasizes the importance of viewing the family as a singular client. A complete discussion of the Minnesota Wheel helps you better understand this widely-accepted framework for community/public health nursing practice. Helpful sections such as Focus Questions, Chapter Outlines, Key Ideas, and Learning by Experience and Reflection help you pinpoint essential information. NEW! Healthy People 2020 objectives throughout the text help you identify common health risk factors in populations and families. NEW! Coverage of health care reform, including the Patient Protection and Affordable Care Act of 2010 (PPACA), explores how current health care legislation impacts community/public health nursing. NEW! Discussions of community health hot button issues, such as human trafficking, genital circumcision, and bullying, introduce you to today's health care challenges. NEW! Information on weather-related disaster fatalities, bioterrorism, and national and state planning responses familiarize you with current, relevant issues which affect the health of populations worldwide and shape the role of the community/public health nurse.
