House and Street Sandra Lauderdale Graham,1992 During the later half of the nineteenth century, a majority of Brazilian women worked, most as domestic servants, either slave or free. House and Street re-creates the working and personal lives of these women, drawing on a wealth of documentation from archival, court, and church records. Lauderdale Graham traces the intricate and ambivalent relations that existed between masters and servants. She shows how for servants the house could be a place of protection—as well as oppression—while the street could be dangerous—but also more autonomous. She integrates her discoveries with larger events taking place in Rio de Janeiro during the period, including the epidemics of the 1850s, the abolition of slavery, the demolition of slums, and major improvements in sanitation during the first decade of the 1900s. House and Street was originally published by Cambridge University Press in 1988. For this paperback edition, Lauderdale Graham has provided a new introduction.

Millennials in America 2017 Robert L. Scardamalia,2017-10-06 This publication provides a wide range of characteristics profiling the demographic, social, and economic status of the Millennial generation. While the Baby Boom generation occupies much of our social and political dialogue, the Millennial generation is actually a larger generation. As the Boomers age, their numbers will decrease while the Millennials will be the driving social and political force in the coming decades. Millennials in America focuses on the those born between 1982–2001. Millennials in America is

an invaluable source for helping people understand what the census data tells us about who we are, what we do, and where we live. Benefits of this publication include: It will fill an information gap due to the difficulty in extracting comparative data from the Census Bureau's American FactFinder dissemination system. Users will have comparative data in a single reference volume. It will eliminate the need for the data user to understand and manipulate detailed census data files and consolidate disparate tables in AFF. This publication utilizes the PUMS data which is the ONLY source of data that can be used to define precise age ranges for the Millennial generation. The age detail available for census summary data simply aren't adequate for defining the Millennials and therefore prohibit compilation of characteristics specific to this important generation. Features of this publication include: Detailed data on 11 subject areas including race, educational attainment, field of study, income, mobility status, employment status, housing, and more Each subject area includes data for the United States, the 50 states and the District of Columbia, 622 counties, 331 cities, 381 metropolitan areas and 34 micropolitan areas. Each part is preceded by highlights, maps, and figures illustrating how areas diverge from the national norm as well as differences among areas.
