Compiler Compilers and High Speed Compilation Dieter Hammer,1989 Advances and problems in the field of compiler compilers are the subject of the 2nd CCHSC Workshop which took place in Berlin, GDR, in October 1988. The 18 papers which were selected for the workshop are now included in this volume, among them three invited papers. They discuss the requirements, properties and theoretical aspects of compiler compilers as well as tools and metatools for software engineering. The papers cover a wide spectrum in the field of compiler compilers ranging from overviews of existing compiler compilers and engineering of compiler compilers to special problems of attribute evaluation generation and code generation. In connection with compiler compiler projects means of supporting high speed compilation are pointed out. Special attention is given to problems of incremental compilation.

Social Insecurity George Perry,2000-06 Social Security is sacrosanct and few politicians risk the ire of the believers by questioning its adequacy or solvency. At a time of unprecedented prosperity and prospects for an even better 21st century, Social Security is, in fact, the greatest barrier between much of the nation and a comfortable retirement. At the same time, Medicare costs are growing steadily. In several other countries, government sponsored pension plans return 2-3 times as much as Social Security. A simple change in attitudes plus an understanding of the 'time value of money' would allow most Americans to fully participate in the growing prosperity and narrow the ever widening gap between the very rich and the rest of us. Social InSecurity delves into the misconceptions that give our misbegotten public pension system a 'Teflon' aura, and exposes many other government programs and statistical analyses that are actually counterproductive rather than help us cope with the arduous task of providing for our families and our own elder years. It presents reforms that require no increase in taxes, nor reduced Social Security benefits to achieve the goal of retiring at twice your final salary, plus outlines an approach that could help solve the medical care problem.
