Dearest of Geniuses Sandra L. Katz, 2003 *Dearest of Geniuses* is the first definitive biography of one of America's first successful female architects, Theodate Pope Riddle (1867-1946). In addition to designing schools and private homes in Connecticut and New York, Theodate designed and supervised the reconstruction of President Theodore Roosevelt's Birthplace in New York City. Theodate's masterpiece is the unusual medieval campus of Connecticut's Avon Old Farms School, where she served as founder and pioneered a progressive curriculum far ahead of its time. The school continues to flourish today and receives ongoing acclaim as an architectural tour de force and as an innovative educational institution. According to writer and critic Brendan Gill, Theodate Pope Riddle was one of the ten most distinguished American women of the 20th century. Her friend, famed psychologist Carl Jung, saw her as an 'intuitive' woman who trusted her instincts, ignored raised eyebrows, and courageously forged ahead despite the restrictions of her day. Using Theodate's

extensive correspondence, girlhood diaries, journals, memoirs, transcripts of séances, and sittings with mediums, as well as interviews, family letters, and other sources, author Sandra L Katz re-creates the life of this extraordinary woman.

Endurance Rick Broadbent,2016-04-21 Shortlisted for the William Hill Sports Book of the Year A runner must run with dreams in his heart. Emil Zatopek. In the summer of 1952 Emil Zatopek became the king of the running world with an unprecedented distance treble at the Olympic Games in Helsinki. Together with his wife Dana, who won another gold medal in the javelin, they were the embodiment of sporting romance. Born on the same day, they were champions on the same day too. Yet in 1968 this affable but eccentric Czech solider was betrayed by his Communist paymasters and cast out into wilderness. Hidden from world view, monitored by the secret police and forced to live in a caravan in mining country, he became the invisible hero. 'Endurance' is the first biography to document the remarkable rise, fall and rehabilitation of a man voted the 'greatest runner of all time' by 'Runner's World' in 2013. It is also the story of a golden age of sport played out against a backdrop of Cold War politics and paranoia. From the London Olympics of 1948 to Czech

concentration camps, this is an uplifting and harrowing story of survival. As Emil rises to global fame, his old coach is locked up and tortured by StB henchmen. Their diverging paths expose the fickleness of popularity and eventually cross again when Zatopek's world is torn asunder. All both men can do is endure. The running world of this era is brought to life by dramatic accounts of Zatopek's great triumphs, manifold records and a rich collection of characters vying to dethrone him. In Britain the sharp-tongued Gordon Pirie falls foul of the media as he becomes obsessed with Zatopek and adopts increasingly-masochistic methods; mild-mannered marathon champion Jim Peters begins a quest that would make "women weep and grown men lose their lunch". In France Alain Mimoun crawls from the bloody carnage of his war-time exploits to overcome racial snubs and become known as Zatopek's Shadow; and in the Soviet Union, the tragic figure of Vladimir Kuts is moulded into a brutal running machine at huge cost. Only Zatopek manages to bridge this East-West divide as a savage power struggle is fought in both the Olympic arena and in the corridors of power. Due to extensive access to those involved, including Dana herself, award-winning Times author Rick Broadbent has written a vivid history involving blood and guns and a love that sustained the cruellest twists of fate. From heady nights at White City to the brave resistance during the Prague Spring, this is a book that plants the son of a carpenter at the very centre of a revolution. Whether talking to his rivals on the track or Red Army troops as tanks roll into Prague, Zatopek's humanity shines through and carries all. With traces of 'Chariots of Fire' and Laura Hillenbrand's 'Unbroken', Endurance is both a wonderful love story and a landmark tale of hope and strength in the face of crushing opposition. It's at the borders of pain and suffering that the men are

separated from the boys. Emil Zatopek

Queering Bathrooms Sheila L. Cavanagh,2010-10-30

The intersection of public washrooms and gender has become increasingly politicized in recent years: queer and trans folk have been harassed for allegedly using the 'wrong' washroom, while widespread campaigns have advocated for more gender-neutral facilities. In *Queering Bathrooms*, Sheila L. Cavanagh explores how public toilets demarcate the masculine and the feminine and condition ideas of gender and sexuality. Based on 100 interviews with

GLBT and/or intersex peoples in major North American cities, Cavanagh delves into the ways that queer and trans communities challenge the rigid gendering and heteronormative composition of public washrooms. Incorporating theories from queer studies, trans studies, psychoanalysis, and the work of Michel Foucault, Cavanagh argues that the cultural politics of excretion is intimately related to the regulation of gender and sexuality. Public toilets house the illicit and act as repositories for the social unconscious. Also offering suggestions for imagining a more inclusive public washroom, *Queering Bathrooms* asserts that although toilets are not typically considered within traditional scholarly bounds, they form a crucial part of our modern understanding of sex and gender.

Elements of Robotics Mordechai Ben-Ari, Francesco Mondada, 2017-10-25 This open access book bridges the gap between playing with robots in school and studying robotics at the upper undergraduate and graduate levels to prepare for careers in industry and research. Robotic algorithms are presented formally, but using only mathematics known by high-school and first-year college students, such as calculus, matrices and probability. Concepts and algorithms are explained through detailed diagrams and calculations. *Elements of Robotics* presents an overview of different types of robots and the components used to build robots, but focuses on robotic

algorithms: simple algorithms like odometry and feedback control, as well as algorithms for advanced topics like localization, mapping, image processing, machine learning and swarm robotics. These algorithms are demonstrated in simplified contexts that enable detailed computations to be performed and feasible activities to be posed. Students who study these simplified demonstrations will be well prepared for advanced study of robotics. The algorithms are presented at a relatively abstract level, not tied to any specific robot. Instead a generic robot is defined that uses elements common to most educational robots: differential drive with two motors, proximity sensors and some method of displaying output to the user. The theory is supplemented with over 100 activities, most of which can be successfully implemented using inexpensive educational robots. Activities that require more computation can be programmed on a computer. Archives are available with suggested implementations for the Thymio robot and standalone programs in Python.

Last Call for Lisbon? Magnus Lemmel, Andrea Renda, 2005 The book includes suggestions on how to promote investment in next-generation networks and promote broadband takeup. It makes recommendations on the transition from ex ante regulation to ex post competition policy.

Robotics in Education Wilfried Lepuschitz, Munir Merdan, Gottfried Koppensteiner, Richard Balogh, David Obdržálek, 2018-09-01 This proceedings volume comprises the latest achievements in research and development in educational robotics presented at the 9th International Conference on Robotics in Education (RiE) held in Qawra, St. Paul's Bay, Malta, during April 18-20, 2018. Researchers and educators will find valuable methodologies and tools for robotics in education that encourage learning in the fields of

science, technology, engineering, arts and mathematics (STEAM) through the design, creation and programming of tangible artifacts for creating personally meaningful objects and addressing real-world societal needs. This also involves the introduction of technologies ranging from robotics platforms to programming environments and languages. Extensive evaluation results are presented that highlight the impact of robotics on the students' interests and competence development. The presented approaches cover the whole educative range from elementary school to the university level in both formal as well as informal settings.

Google SketchUp 6 3DVinci,2007-01 Even though SketchUp is one of the most user-freindly interfaces, some users still need some assistance to use the program. Most of the the information in this book is taken from the online tutorials, but most people don;t learn easily from watching a movie, so the author has put it on paper and designed it to get you to perform the steps yourself. The 'Miscellaneous basic exercises' outlines some of the handy methods devised by expert Google SketchUp users as well as some Google SketchUp developers. This information can be found on the SketchUp User Forum, but the author has sifted through all the forum posts and come up with the short exercises that demonstrate these useful bits.

Roboethics Spyros G. Tzafestas,2015-07-27 This volume explores the ethical questions that arise in the development, creation and use of robots that are capable of semiautonomous or autonomous decision making and human-like action. It examines how ethical and moral theories can and must be applied to address the complex and critical issues of the application of these intelligent robots in society. Coverage first presents fundamental concepts and provides a general overview of ethics, artificial intelligence and robotics. Next, the book studies all

principal ethical applications of robots, namely medical, assistive, socialized and war roboethics. It looks at such issues as robotic surgery, children-robot and elderly-robot therapeutical/social interactions and the use of robots, especially autonomous lethal ones, in warfare. In addition, a chapter also considers Japanese roboethics as well as key intercultural and robot legislation issues. Overall, readers are provided with a thorough investigation into the moral responsibility (if any) of autonomous robots when doing harm. This volume will serve as an ideal educational source in engineering and robotics courses as well as an introductory reference for researchers in the field.

Ladies and Gents Olga Gershenson, Barbara Penner, 2009-07-15 Public toilets provide a unique opportunity for interrogating how conventional assumptions about the body, sexuality, privacy, and technology are formed in public spaces and inscribed through design across cultures. This collection of original essays from international scholars is the first to explore the cultural meanings, histories, and ideologies of public toilets as gendered spaces. *Ladies and Gents* consists of two sets of essays. The first, *Potty Politics: Toilets, Gender and Identity*, establishes the importance of accessible, secure public toilets to the creation of inclusive cities, work, and learning environments. The second set of essays, *Toilet Art: Design and Cultural Representations*, discusses public toilets as spaces of representation and representational spaces, with reference to architectural design, humor, film, theater, art, and popular culture. Compelling visual materials and original artwork are included throughout, depicting subjects as varied as female urinals, art installations sited in public restrooms, and the toilet in contemporary art. Taken together, these seventeen essays demonstrate that public toilets are often sites where gendered bodies compete for

resources and recognition—and the stakes are high. Contributors include: Nathan Abrams, Jami L. Anderson, Johan Andersson, Kathryn H. Anthony, Kathy Battista, Andrew Brown-May, Ben Campkin, Meghan Dufresne, Peg Fraser, Deborah Gans, Clara Greed, Robin Lydenberg, Claudia Mitchell, Alison Moore, Frances Pheasant-Kelly, Bushra Rehman, Alex Schweder, Naomi Stead, and the editors.
