Logo Design Workbook Sean Adams,Noreen Morioka,Terry Lee Stone,2006-03-01 Logo Design Workbook focuses on creating powerful logo designs and answers the question, What makes a logo work? In the first half of this book, authors Sean Adams and Noreen Morioka walk readers step-by-step through the entire logo-development process. Topics include developing a concept that communicates the right

message and is appropriate for both the client and the market; defining how the client's long-term goals might affect the look and needs of the mark; choosing colors and typefaces; avoiding common mistakes; and deciphering why some logos are successful whereas others are not. The second half of the book comprises in-depth case studies on logos designed for various industries. Each case study explores the design brief, the relationship with the client, the time frame, and the results.

Body My House Paul Crumbley, Patricia M Gantt, 2015-09-01 The first collection of critical essays on May Swenson and her literary universe, *Body My House* initiates an academic conversation about an unquestionably major poet of the middle and late twentieth century. Between the 1950s and the 1980s, May Swenson produced eleven volumes of poetry, received many major awards, was elected chancellor of the Academy of American Poets, and was acclaimed by writers in virtually every school of American poetry. Essays here address the breadth of Swenson's literary corpus and offer varied scholarly approaches to it. They reference Swenson manuscripts---poems, letters, diaries, and other prose---some of which have not been widely available before. Chapters focus on Swenson's work as a nature writer; the literary and social contexts of her writing; her national and international acclaim; her work as a translator; associations with other poets and writers (Bishop, Moore, and others); her creative process; and her profound explorations of gender and sexuality. The first full volume of scholarship on May Swenson, *Body My House* suggest an ambitious agenda for further work. Contributors include Mark Doty, Gudrun Grabher, Cynthia Hogue, Suzann Juhasz, R.R. Knudson, Alicia Ostriker, Martha Nell Smith, Michael Spooner, Paul Swenson, and Kirstin Hotelling Zona.

**Deep Learning Techniques for Music Generation** Jean-Pierre Briot, Gaëtan Hadjeres, François-David Pachet, 2019-11-08 This book is a survey and analysis of how deep learning can be used to generate musical content. The authors offer a comprehensive presentation of the foundations of deep learning techniques for music generation. They also develop a conceptual framework used to classify and analyze various types of architecture, encoding models, generation strategies, and ways to control the generation. The five dimensions of this framework are: objective (the kind of musical content to be generated, e.g., melody, accompaniment); representation (the musical elements to be considered and how to encode them, e.g., chord, silence, piano roll, one-hot encoding); architecture (the structure organizing neurons, their connexions, and the flow of their activations, e.g., feedforward, recurrent, variational autoencoder); challenge (the desired properties and issues, e.g., variability, incrementality, adaptability); and strategy (the way to model and control the process of generation, e.g., single-step feedforward, iterative feedforward, decoder feedforward, sampling). To illustrate the possible design decisions and to allow comparison and correlation analysis they analyze and classify more than 40 systems, and they discuss important open challenges such as interactivity, originality, and structure. The authors have extensive knowledge and experience in all related research, technical, performance, and business aspects. The book is suitable for students, practitioners, and researchers in the artificial intelligence, machine learning, and music creation domains. The reader does not require any prior knowledge about artificial neural networks, deep learning, or computer music. The text is fully supported with a comprehensive table of acronyms, bibliography, glossary, and index, and supplementary material is available from the authors' website.

This book demonstrates that Alexandria became - through the contemporary reputation of its library - a point of confluence for Greek, Roman, Jewish and Syrian culture that drew scholars and statesmen from throughout the ancient world. It also explores the histories of Alexander the Great and of Alexandria itself, the greatest city of the ancient world. This new paperback edition offers general readers an accessible introduction to the history of this magnificent yet still mysterious institution from the time of its foundation up to its tragic destruction.

Because hostile forces are waiting inside. Among the President's helicopter crew, however, is a young Marine. He is quiet, enigmatic, and he hides his eyes behind a pair of silver sunglasses. His name is Schofield. Call-sign: Scarecrow. Rumor has it, he's a good man in a storm. Judging by what the President has just walked into, he'd better be... Matthew Reilly dazzled the world with his electrifying thrillers Ice Station and Temple. And now, Shane Scarecrow Schofield returns with his most harrowing and explosive adventure yet.

Toward an Anthropological Theory of Value D. Graeber, 2001-12-13 Now a widely cited classic, this innovative book is the first comprehensive synthesis of economic, political, and cultural theories of value. David Graeber reexamines a century of anthropological thought about value and exchange, in large measure to find a way out of ongoing quandaries in current social theory, which have become critical at the present moment of ideological collapse in the face of Neoliberalism. Rooted in an engaged, dynamic realism, Graeber argues that projects of cultural comparison are in a sense necessarily revolutionary projects: He attempts to synthesize the best insights of Karl Marx and Marcel Mauss, arguing that these figures represent two extreme, but ultimately complementary, possibilities in the shape such a project might take. Graeber breathes new life into the classic anthropological texts on exchange, value, and economy. He rethinks the cases of Iroquois wampum, Pacific kula exchanges, and the Kwakiutl potlatch within the flow of world historical processes, and recasts value as a model of human meaning-making, which far exceeds rationalist/reductive economist paradigms.

*A Cold Case* Philip Gourevitch, 2002-07-10 A tale of crime and punishment from a prizewinning writer. A few years ago, Andy Rosenzweig, an inspector for the Manhattan District Attorney's office, was abruptly reminded of an old, unsolved double homicide. It bothered him that Frankie Koehler, the notoriously dangerous suspect, had eluded capture and was still at large. Rosenzweig had known the victims of the crime, for they were childhood friends from the South Bronx: Richie Glennon, a Runyonesque ex-prizefighter at home with both cops and criminals, and Pete McGinn, a spirited restaurateur and father of four. Rosenzweig resolved to find the killer and close the case. In a surprising,

intensely dramatic narrative, Philip Gourevitch brings together the story of Rosenzweig's pursuit with a mesmerizing account of Koehler's criminal personality and years on the lam. *A Cold Case* carries us deep into the lives and minds, the passions and perplexities, of an extraordinary cop and an extraordinary criminal whose lives were entwined over three decades. Set in a New York City that has all but disappeared, and written with a keen ear for the vibrant idiom of the colorful men and women who peopled its streets, this is nonetheless a book for our times. Gourevitch masterfully transforms a criminal investigation into a searching literary reckoning with the forces that drive one man to murder and another to hunt murderers.
