High-Dimensional Single Cell Analysis Harris G. Fienberg, Garry P. Nolan, 2014-04-22 This volume highlights the most interesting biomedical and clinical applications of high-dimensional flow and mass cytometry. It reviews current practical approaches used to perform high-dimensional experiments and addresses key bioinformatic techniques for the analysis of data sets involving dozens of parameters in millions of single cells. Topics include single cell cancer biology; studies of the human immunome; exploration of immunological cell types such as CD8⁺ T cells; decipherment of signaling processes of cancer; mass-tag cellular barcoding; analysis of protein interactions by proximity ligation assays; Cytobank, a platform for the analysis of cytometry data; computational analysis of high-dimensional flow cytometric data; computational deconvolution approaches for the description of intracellular signaling dynamics and hyperspectral cytometry. All 10 chapters of this book have been written by respected experts in their fields. It is an invaluable reference book for both basic and clinical researchers.

Electric Energy Systems Antonio Gomez-Exposito, Antonio J. Conejo, Claudio

Canizares, 2018-06-14 *Electric Energy Systems, Second Edition* provides an analysis of electric generation and transmission systems that addresses diverse regulatory issues. It includes fundamental background topics, such as load flow, short circuit analysis, and economic dispatch, as well as advanced topics, such as harmonic load flow, state estimation, voltage and frequency control, electromagnetic transients, etc. The new edition features updated material throughout the text and new sections throughout the chapters. It covers current issues in the industry, including renewable generation with associated control and scheduling problems, HVDC transmission, and use of synchrophasors (PMUs). The text explores more sophisticated protections and the new roles of demand, side management, etc. Written by internationally recognized specialists, the text contains a wide range of worked out examples along with numerous exercises and solutions to enhance understanding of the material. Features Integrates technical and economic analyses of electric energy systems. Covers HVDC transmission. Addresses renewable generation and the associated control and

scheduling problems. Analyzes electricity markets, electromagnetic transients, and harmonic load flow. Features new sections and updated material throughout the text. Includes examples and solved problems.

Biology of the Tapeworm Hymenolepis Diminuta Hisao Arai, 2012-12-02 Biology of the Tapeworm *Hymenolepis diminuta* covers the physiological and biochemical aspects of the tapeworm *Hymenolepis diminuta*. This book relates past and present knowledge in the field of parasitology. This reference is organized into 12 chapters, starting with a brief discussion on life history and taxonomy of the species. This is followed by the developmental biology of the fertilized ovum to the formation of the cysticercoids in an insect host. Discussions on the embryological, biochemical, and physiological aspects of *H. diminuta*, the intestinal helminth infections, and procedures for in vitro cultivation of various tapeworm species are provided. Chapter 7 presents a review of molecular DNA and RNA of *H. diminuta* and the results of isolation and characterization of these macromolecules. This is followed by

a discussion on energy metabolism of adult *H. diminuta* in chapter 8. The latter four chapters focus on biochemical aspects of *H. diminuta*, including its membrane biology, immunity, and migratory and chemotherapeutic activities. This book encourages diversity among future studies in helminth ecology, physiology, immunology, and biochemistry. It will serve its purpose and ensure that parasitology field continues.

Recent Advances in Flowering Time Control Christian Jung, Klaus Pillen, Dorothee Staiger, George Coupland, Maria von Korff, 2017-03-10 The onset of flowering is an important step during the lifetime of a flowering plant. During the past two decades, there has been enormous progress in our understanding of how internal and external (environmental) cues control the transition to reproductive growth in plants. Many flowering time regulators have been identified from the model plant *Arabidopsis thaliana*. Most of them are assembled in regulatory pathways, which converge to central integrators which trigger the transition of the vegetative into an inflorescence meristem. For crop cultivation, the

time of flowering is of utmost importance, because it determines yield. Phenotypic variation for this trait is largely controlled by genes, which were often modified during domestication or crop improvement. Understanding the genetic basis of flowering time regulation offers new opportunities for selection in plant breeding and for genome editing and genetic modification of crop species.

Ultra-High Performance Concrete UHPC Ekkehard Fehling, Michael Schmidt, Joost

Walraven, Torsten Leutbecher, Susanne Fröhlich, 2015-04-20 Selected chapters from the German concrete yearbook are now being published in the new English Beton-Kalender Series for the benefit of an international audience. Since it was founded in 1906, the Ernst & Sohn Beton-Kalender has been supporting developments in reinforced and prestressed concrete. The aim was to publish a yearbook to reflect progress in ferro-concrete structures until - as the book's first editor, Fritz von Emperger

(1862-1942), expressed it - the tempestuous development in this form of construction came to an end. However, the Beton-Kalender quickly became the chosen work of reference for civil and structural engineers, and apart from the years 1945-1950 has been published annually ever since. Ultra high performance concrete (UHPC) is a milestone in concrete technology and application. It permits the construction of both more slender and more durable concrete structures with a prolonged service life and thus improved sustainability. This book is a comprehensive overview of UHPC - from the principles behind its production and its mechanical properties to design and detailing aspects. The focus is on the material behaviour of steel fibre-reinforced UHPC. Numerical modelling and detailing of the connections with reinforced concrete elements are featured as well. Numerous examples worldwide - bridges, columns, facades and roofs - are the basis for additional explanations about the benefits of UHPC and how it helps to realise several architectural requirements. The authors are extensively involved in the testing, design, construction and monitoring of UHPC structures. What they provide here is therefore a unique synopsis of the state of the art with a view to practical applications.

The Mac Almanac Sharon Zardetto Aker,1994 Written in the same conversational tone that made The Macintosh Bible such a success, this book takes the concept of the ultimate reference book one step further. With completely updated information, more graphics, and dramatically improved internal design, this book is destined to become the premiere general reference book for today's Mac enthusiasts.

Germline Development Joan Marsh,Jamie A. Goode,2008-04-30 Connects classical cellular descriptive studies with more recent work on the molecular and genetic aspects regarding germline development. Prominent scientists discuss research on a range of organisms including insects, worms, birds, fish, amphibia, mammals and green algae. Specification of germ cells, their migration to the gonads and subsequent interactions with the soma and evolutionary factors of their segregation are among the topics covered.

Cross Cultural Issues in Consumer Science and Consumer Psychology Hester van Herk,Carlos J.

Torelli, 2017-10-17 This integrative volume identifies and defines cross-cultural issues in consumer psychology and consumer science as the world becomes an increasingly global marketplace. An international panel of experts analyzes current trends in consumer behavior across diverse countries worldwide and across cultural groups within countries, depicting commonly-used cross-cultural frameworks and research methods. Beginning with conceptualizing and quantifying culture at the national level, the volume then moves to individual levels of analysis of consumer decision-making, examining consumer data as they affect business decisions in marketing products internationally. The resulting work synthesizes the consumer science, international business, and consumer psychology literatures for a deeper understanding of all three disciplines and pathways to future research as cultures interact and tastes evolve. Among the topics covered: Culture as a driver of individual and national consumer behavior. Consumer culture-based attitudes toward buying foreign versus domestic products. Country-of-origin effects: consumer perceptions of international products. The roles of cultural influences in product branding. Cultural aspects of consumer-brand relationships. Consumer behavior

in the emerging marketplace of subsistence countries. This attention to both national detail and individual nuance makes *Cross-Cultural Issues in Consumer Science and Consumer Psychology* an instructive and highly useful reference for scholars and students in consumer psychology, cross-cultural psychology, marketing, international business, as well as professionals in these areas.

Corrosion L L Shreir, 2013-10-22 *Corrosion, Volume 2: Corrosion Control* deals with corrosion and corrosion control. Topics covered range from the design and economic aspects of corrosion to cathodic and anodic protection; pretreatment and design for metal finishing; protective action of metallic coatings; and methods of applying metallic coatings. Corrosion testing, monitoring, and inspection are also considered. This volume is comprised of 13 chapters; the first of which provides an overview of corrosion control, with emphasis on the classification of practical methods of corrosion control. Attention then turns to the economic aspects of corrosion; how corrosion control is implemented in chemical and petrochemical plants; and design considerations to prevent corrosion in buildings and structures. Design in marine engineering and in relation to welding and joining is also

discussed. The chapters that follow focus on the principles and practical applications of cathodic and anodic protection; chemical and mechanical pretreatments for metal finishing; and design for corrosion protection by electroplated and paint coatings. Chemical conversion coatings and miscellaneous coatings such as vitreous enamel coatings are also considered. Finally, this book describes the conditioning of the atmosphere to reduce corrosion. Tables and specifications as well as terms and abbreviations are included. This book will be of value to students as well as workers and engineers involved in corrosion and corrosion control.

The Bios Companion Phil Croucher, 2001 This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

Brand Meaning Management ,2015-05-05 Noted authors discuss how and why consumers identify with and become attached to brands and the challenges marketers face in creating and sustaining

these states. Other meaning makers (e.g., celebrities, culture, consumers themselves) can facilitate or detract from the brand meanings marketers aim to create.

The Heart of Hearts of Rumi's Mathnawi - Vol 1 Mawlana Husayn Wa'iz-e Kashifi, 2017-02-15 In Persian-speaking Sufi circles it is almost as famous as the Mathnawi itself. Surprisingly enough, it has never been published in the West. But now it is available to students of mysticism and the many lovers of Rumi's work.

Limits to Privatization Marianne Beishem, 2012 Limits to Privatization is the first thorough audit of privatizations from around the world. It outlines the historical emergence of globalization and liberalization, and from analyses of over 50 case studies of best- and worst-case experiences of privatization, it provides guidance for policy and action that will restore and maintain the right balance between the powers and responsibilities of the state, the private sector and the increasingly important role of civil society. The result is a book of major importance that challenges one of the orthodoxies of our day and provides a benchmark for future debate.

Authenticity James H. Gilmore, B. Joseph Pine II, 2007-10-18 Contrived. Disingenuous. Phony.

Inauthentic. Do your customers use any of these words to describe what you sell—or how you sell it? If so, welcome to the club. Inundated by fakes and sophisticated counterfeits, people increasingly see the world in terms of real or fake. They would rather buy something real from someone genuine rather than something fake from some phony. When deciding to buy, consumers judge an offering's (and a company's) authenticity as much as—if not more than—price, quality, and availability. In *Authenticity*, James H. Gilmore and B. Joseph Pine II argue that to trounce rivals companies must grasp, manage, and excel at rendering authenticity. Through examples from a wide array of industries as well as government, nonprofit, education, and religious sectors, the authors show how to manage customers' perception of authenticity by: recognizing how businesses fake it; appealing to the five different genres of authenticity; charting how to be true to self and what you say you are; and crafting and implementing business strategies for rendering authenticity. The first to explore what authenticity really means for businesses and how companies can approach it both thoughtfully and thoroughly, this book

is a must-read for any organization seeking to fulfill consumers' intensifying demand for the real deal.
