Historical Painting Techniques, Materials, and Studio Practice Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled *Historical Painting Techniques, Materials, and Studio Practice* at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch,

supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Archaeology Anthropology and Interstellar Communication Douglas A. Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should

that day ever come.

Microsoft Windows Vista Unleashed Paul McFedries, 2004-04-03 Microsoft® Windows Vista™ Unleashed, Second Edition Paul McFedries Second Edition Includes coverage of Windows Vista Service Pack 1! Microsoft Windows Vista Unleashed, Second Edition, is a book for people, like you, who don't consider themselves to be "average users." It's a book for anyone who finds that doing things the official way is slower, less efficient, and less powerful because Windows Vista was designed from the ground up to avoid confusing novice users. The result is default settings that restrict flexibility, interminable wizards that turn 2-step tasks into 12-step sagas, and the hiding of powerful and useful programs behind layers of menus and dialog boxes. To unleash the potential of Windows Vista, you need a different approach that blows away Vista's novice features and scorns the standard way of doing things. This book goes beyond the standard-issue techniques sanctioned by Microsoft and parroted in other Windows Vista books. Instead, this book offers shortcuts for boosting your productivity, customizations for making Windows Vista work the way you do, workarounds for known Windows Vista problems, and warnings for avoiding Windows Vista pitfalls. Along the way, you'll learn about all kinds of insider details, undocumented features, powerful tools, and background facts that help put everything into perspective. Paul McFedries is the president of Logophilia Limited, a technical writing company. He has been working with computers for more than 30

years and has been using Microsoft Windows since version 1. Paul has written more than 50 books that have sold more than 3 million copies worldwide.
