Exxon Neela Banerjee,John H. Cushman (Jr.),David Hasemyer,Lisa Song,2015 Relying on primary sources dating back to the 1970s, describes how Exxon conducted cutting-edge climate research and then, without revealing what it had learned, worked at the forefront of climate-change denial, manufacturing doubt about the scientific consensus that its own research had confirmed.--Adapted from publisher's description.

The Construction of the Self Susan Harter,2001-08-02 Drawing upon extensive theoretical knowledge and decades of empirical research by the author and others, this volume traces changes in the structure and content of self-representations from the preschool years through late adolescence. Harter provides a trenchant analysis of the cognitive and social processes responsible for the development of each person's unique sense of self. Throughout, normative-developmental and individual difference variables are clearly identified and clinical applications spotlighted. Social Consequences of Internet Use James E. Katz,Ronald E. Rice,2002-08-30 A study of the impact of Internet use on American society, based on a series of nationally representative surveys conducted from 1995 to 2000. Drawing on nationally representative telephone surveys conducted from 1995 to 2000, James Katz and Ronald Rice offer a rich and nuanced picture of Internet use in America. Using quantitative data, as well as case studies of Web sites, they explore the impact of the Internet on society from three perspectives: access to Internet technology (the digital divide), involvement with groups and communities through the Internet (social capital), and use of the Internet for social interaction and expression (identity). To provide a more comprehensive account of Internet use, the authors draw comparisons across media and include Internet nonusers and former users in their research. The authors call their research the Syntopia Project to convey the Internet's role as one among a host of communication technologies as well as the synergy between people's online activities and their real-world lives. Their major finding is that Americans use the Internet as an extension and enhancement of their daily routines. Contrary to media sensationalism, the Internet is neither a utopia, liberating people to form a global egalitarian community, nor a dystopia-producing armies of disembodied, lonely individuals. Like any form of communication, it is as helpful or harmful as those who use it.
