This report seeks to help governments assess the maturity of a country's ID system and integrate it with development activities. A maturity model for a country's ID management is developed and applied to seven countries in Asia to assess the maturity of their ID systems. This report also provides a way forward for multilateral institutions---including ADB---to make the best use of ID systems in their operations.

Di?erent blends of theory and practice are represented, with an inclination towards theory with a practical motivation on one hand and soundly-based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.
