Intelligent Techniques in Signal Processing for Multimedia Security Nilanjan Dey,V.

Santhi,2016-10-18 This book proposes new algorithms to ensure secured communications and prevent unauthorized data exchange in secured multimedia systems. Focusing on numerous applications' algorithms and scenarios, it offers an in-depth analysis of data hiding technologies including watermarking, cryptography, encryption, copy control, and authentication. The authors present a framework for visual data hiding technologies that resolves emerging problems of modern multimedia applications in several contexts including the medical, healthcare, education, and wireless communication networking domains. Further, it introduces several intelligent security techniques with real-time implementation. As part of its comprehensive coverage, the book discusses contemporary multimedia authentication and fingerprinting techniques, while also proposing personal authentication/recognition systems based on hand images, surveillance system security using gait recognition, face recognition under restricted constraints such as dry/wet face conditions, and three-dimensional face identification using the approach developed here. This book equips perception technology professionals with the latest technologies, techniques, and strategies for multimedia security systems, offering a valuable resource for engineers and researchers working to develop security systems.

Antitrust for Small and Middle Size Undertakings and Image Protection from Non-Competitors Pranvera Këllezi,Bruce Kilpatrick,Pierre Kobel,2014-05-05 This publication provides an unparalleled comparative analysis of two hot topics in the field of antitrust and unfair competition laws with regard to a number of key countries. The first part of the book examines whether small and middle-sized businesses could or should be subject to specific competition rules. These businesses

account for 99% of the enterprises in Europe and the United States, making this a particularly important topic. The papers consider both the public and private enforcement rules across a range of jurisdictions and a detailed international report, prepared by Michele Carpagnano, identifies general trends and highlights differences and the most interesting features of national regulations. The second part of the book gathers contributions from various jurisdictions on the unfair competition question of whether a company could or should be protected against the use of their trademark, distinctive signs and other components of their image and identity on the part of non-competing companies. The papers focus on the fundamental issue of the competitive relationship as a condition of protection under unfair competition acts and the connection to intellectual property protection. The comprehensive and insightful international report, prepared by Martine Karsenty-Ricard, brings together these reflections by comparing various national positions. The book also includes the resolutions passed by the General Assembly of the LIDC following a debate on each of these topics, which include proposed solutions and recommendations. The International League of Competition Law (LIDC) is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

The Clostridia Julian I. Rood, Bruce A. McClane, J. Glenn Songer, Richard W. Titball, 1997-04-30 The clostridia are a group of bacteria of considerable medical and economic importance and include species responsible for generating the most potent toxins known to humans. *The Clostridia: Molecular Biology and Pathogenesis* is a unique work, comprising the most complete reference on the clostridia for over 20 years, bringing together the results from some of the most innovative and exciting research in the past decade. Using a principle-oriented rather than taxonomic approach, the results from molecular biology research are placed in the context of their clinical significance, and the

disease process as a whole. This state-of-the-art work is truly comprehensive, covering and integrating the diverse topics of genetics, physiology, pathogenesis and cell biology. Written and edited by world-renowned authorities, material is presented to give the reader an up-to-date knowledge of the pathogenic species of this important genus. Background information is followed by details of the genetics, molecular biology, biochemistry and disease mechanisms. The structure, function and mode of action of toxins and other virulence determinants is clearly presented. As such, this work will prove essential for students, teachers, research microbiologists, infectious disease clinicians, toxin specialists, and all those working in medical or veterinary bacteriology, microbial genetics and the pharmaceutical industries. Covers appropriate medical and veterinary topics Contains authoritative contributions by international experts Presents the current state of knowledge and areas for future research Truly comprehensive--covers topics from molecular biology and physiology

Regulating Artificial Intelligence in Industry Damian M. Bielicki, 2021-12-24 Artificial Intelligence (AI) has augmented human activities and unlocked opportunities for many sectors of the economy. It is used for data management and analysis, decision making, and many other aspects. As with most rapidly advancing technologies, law is often playing a catch up role so the study of how law interacts with AI is more critical now than ever before. This book provides a detailed qualitative exploration into regulatory aspects of AI in industry. Offering a unique focus on current practice and existing trends in a wide range of industries where AI plays an increasingly important role, the work contains legal and technical analysis performed by 15 researchers and practitioners from different institutions around the world to provide an overview of how AI is being used and regulated across a wide range of sectors, including aviation, energy, government, healthcare, legal, maritime, military, music, and

others. It addresses the broad range of aspects, including privacy, liability, transparency, justice, and others, from the perspective of different jurisdictions. Including a discussion of the role of AI in industry during the Covid-19 pandemic, the chapters also offer a set of recommendations for optimal regulatory interventions. Therefore, this book will be of interest to academics, students and practitioners interested in technological and regulatory aspects of AI.

Privacy and Data Protection Issues of Biometric Applications Els J. Kindt, 2013-12-05 This book discusses all critical privacy and data protection aspects of biometric systems from a legal perspective. It contains a systematic and complete analysis of the many issues raised by these systems based on examples worldwide and provides several recommendations for a transnational regulatory framework. An appropriate legal framework is in most countries not yet in place. Biometric systems use facial images, fingerprints, iris and/or voice in an automated way to identify or to verify (identity) claims of persons. The treatise which has an interdisciplinary approach starts with explaining the functioning of biometric systems in general terms for non-specialists. It continues with a description of the legal nature of biometric data and makes a comparison with DNA and biological material and the regulation thereof. After describing the risks, the work further reviews the opinions of data protection authorities in relation to biometric systems and current and future (EU) law. A detailed legal comparative analysis is made of the situation in Belgium, France and the Netherlands. The author concludes with an evaluation of the proportionality principle and the application of data protection law to biometric data processing operations, mainly in the private sector. Pleading for more safeguards in legislation, the author makes several suggestions for a regulatory framework aiming at reducing the risks of biometric systems. They include limitations to the collection and storage of biometric data as well as technical measures, which could influence the proportionality of the

processing. The text is supported by several figures and tables providing a summary of particular points of the discussion. The book also uses the 2012 biometric vocabulary adopted by ISO and contains an extensive bibliography and literature sources.

Protectors of Privacy Abraham L. Newman, 2018-07-05 From credit-card purchases to electronic fingerprints, the amount of personal data available to government and business is growing exponentially. All industrial societies face the problem of how to regulate this vast world of information, but their governments have chosen distinctly different solutions. In *Protectors of Privacy*, Abraham L. Newman details how and why, in contrast to the United States, the nations of the European Union adopted comprehensive data privacy for both the public and the private sectors, enforceable by independent regulatory agencies known as data privacy authorities. Despite U.S. prominence in data technology, Newman shows, the strict privacy rules of the European Union have been adopted far more broadly across the globe than the self-regulatory approach championed by the United States. This rift has led to a series of trade and security disputes between the United States and the European Union. Based on many interviews with politicians, civil servants, and representatives from business and NGOs, and supplemented with archival sources, statistical analysis, and examples, *Protectors of Privacy* delineates the two principal types of privacy regimes—comprehensive and limited. The book presents a theory of regulatory development that highlights the role of transgovernmental networks not only in implementing rules but also in actively shaping the political process surrounding policymaking. More broadly, Newman explains how Europe's institutional revolution has created in certain sectors the regulatory capacity that allows it to challenge U.S. dominance in international economic governance.

Data Protection in the Internet Dário Moura Vicente, Sofia de Vasconcelos

Casimiro,2019-12-01 This book identifies and explains the different national approaches to data protection – the legal regulation of the collection, storage, transmission and use of information concerning identified or identifiable individuals – and determines the extent to which they could be harmonised in the foreseeable future. In recent years, data protection has become a major concern in many countries, as well as at supranational and international levels. In fact, the emergence of computing technologies that allow lower-cost processing of increasing amounts of information, associated with the advent and exponential use of the Internet and other communication networks and the widespread liberalization of the trans-border flow of information have enabled the large-scale collection and processing of personal data, not only for scientific or commercial uses, but also for political uses. A growing number of governmental and private organizations now possess and use data processing in order to determine, predict and influence individual behavior in all fields of human activity. This inevitably entails new risks, from the perspective of individual privacy, but also other fundamental rights, such as the right not to be discriminated against, fair competition between commercial enterprises and the proper functioning of democratic institutions. These phenomena have not been ignored from a legal point of view: at the national, supranational and international levels, an increasing number of regulatory instruments – including the European Union’s General Data Protection Regulation applicable as of 25 May 2018 – have been adopted with the purpose of preventing personal data misuse. Nevertheless, distinct national approaches still prevail in this domain, notably those that separate the comprehensive and detailed protective rules adopted in Europe since the 1995 Directive on the processing of personal data from the more fragmented and liberal attitude of American courts and legislators in this respect. In a globalized world, in which personal data can instantly circulate and be used simultaneously in communications networks that

are ubiquitous by nature, these different national and regional approaches are a major source of legal conflict.

OECD Development Pathways Social Protection System Review of Indonesia OECD,2019-04-11
Indonesia has made impressive progress in reducing income inequality and improving living standards since the Asian Financial Crisis but the decline in poverty has slowed in recent years while inequality has risen and a large part of the population remains vulnerable.

Computer Vision and Image Processing in Intelligent Systems and Multimedia Technologies
Sarfraz, Muhammad,2014-04-30 The fields of computer vision and image processing are constantly evolving as new research and applications in these areas emerge. Staying abreast of the most up-to-date developments in this field is necessary in order to promote further research and apply these developments in real-world settings. Computer Vision and Image Processing in Intelligent Systems and Multimedia Technologies features timely and informative research on the design and development of computer vision and image processing applications in intelligent agents as well as in multimedia technologies. Covering a diverse set of research in these areas, this publication is ideally designed for use by academicians, technology professionals, students, and researchers interested in uncovering the latest innovations in the field.

Research Handbook on Privacy and Data Protection Law González, Gloria, Van Brakel,

Rosamunde,De Hert, Paul,2022-03-15 This Research Handbook is an insightful overview of the key rules, concepts and tensions in privacy and data protection law. ICT Systems Security and Privacy Protection Sabrina De Capitani di Vimercati,Fabio Martinelli,2017-05-17 This book constitutes the refereed proceedings of the 32nd IFIP TC 11 International Conference on ICT Systems Security and Privacy Protection, SEC 2017, held in Rome, Italy, in May 2017. The 38 revised full papers presented were carefully reviewed and selected from 199 submissions. The papers are organized in the following topical sections: network security and cyber attacks; security and privacy in social applications and cyber attacks defense; private queries and aggregations; operating systems and firmware security; user authentication and policies; applied cryptography and voting schemes; software security and privacy; privacy; and digital signature, risk management, and code reuse attacks.

Nonlinear Dynamics and Applications Santo Banerjee,Asit Saha,2022-10-06 This book covers recent trends and applications of nonlinear dynamics in various branches of society, science, and engineering. The selected peer-reviewed contributions were presented at the International Conference on Nonlinear Dynamics and Applications (ICNDA 2022) at Sikkim Manipal Institute of Technology (SMIT) and cover a broad swath of topics ranging from chaos theory and fractals to quantum systems and the dynamics of the COVID-19 pandemic. Organized by the SMIT Department of Mathematics, this international conference offers an interdisciplinary stage for scientists, researchers, and inventors to present and discuss the latest innovations and trends in all possible areas of nonlinear dynamics.

Biometric Recognition Jianjiang Feng,Junping Zhang,Manhua Liu,Yuchun Fang,2021-09-09 The LNCS volume 12878 constitutes the proceedings of the 15th Chinese Conference on Biometric Recognition, held in Shanghai, China, in September 2021. The 53 papers presented in this book were carefully reviewed and selected from 72 submissions. The papers cover a wide range of topics such as multi-modal biometrics and emerging biometrics; hand biometrics; facial biometrics; and speech biometrics.

The Responsibility to Protect Desmond Tutu,Václav Havel,2012 'The Responsibility to Protect' provides a comprehensive view on how this contemporary principle has developed and analyzes how to best apply it to current humanitarian crises.

Smart Systems and IoT: Innovations in Computing Arun K. Somani,Rajveer Singh Shekhawat,Ankit Mundra,Sumit Srivastava,Vivek Kumar Verma,2019-10-26 The book features original papers from the 2nd International Conference on Smart IoT Systems: Innovations and Computing (SSIC 2019), presenting scientific work related to smart solution concepts. It discusses computational collective intelligence, which includes interactions between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It also describes how to successfully approach various government organizations for funding for business and the humanitarian technology development projects. Thanks to the high-quality content and the broad range of the topics covered, the book appeals to researchers pursuing advanced studies.

Sourcebook on the Foundations of Social Protection Delivery Systems Kathy Lindert,Tina George Karippacheril,Inés Rodríguez Caillava,Kenichi Nishikawa Chávez,2020-10-29 The Sourcebook on the

Foundations of Social Protection Delivery Systems synthesizes real-world experiences and lessons learned of social protection delivery systems from around the globe. It takes a broad view of social protection, covering various intended populations such as poor or low-income families, unemployed workers, persons with disabilities, and individuals facing social risks. It discusses many types of interventions that governments provide to individuals, families, or households, including categorical programs, poverty-targeted programs, labor benefits and services, disability benefits and services, and social services. The Sourcebook seeks to address concrete “how-to?” questions, including: • How do countries deliver social protection benefits and services? • How do they do so effectively and efficiently? • How do they ensure dynamic inclusion, especially for the most vulnerable and needy? • How do they promote better coordination and integration—not only among social protection programs but also among programs in other parts of government? • How can they meet the needs of their intended populations and provide a better client experience? The delivery systems framework elaborates on the key elements of that operating environment. The framework is anchored in core implementation phases along the delivery chain. Key actors, including people and institutions, interact all along that delivery chain. Those interactions are facilitated by communications, information systems, and technology. This framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection. The Sourcebook structures itself around eight key principles that can frame the delivery systems mind-set: 1. There is no single blueprint for delivery systems, but there are commonalities, and those common elements constitute the core of the delivery systems framework. 2. Quality of implementation matters, and weaknesses in any of the core elements will negatively affect the entire system, reducing the impacts of the program(s) they support. 3. Delivery systems evolve over time, in a nonlinear fashion, and their starting points matter.

4. Efforts should be made to “keep it simple†? and to “do simple well,†? from the start. 5. The “first mile†?—people’s direct interface with administrative functions—is often the weakest link in the delivery chain; improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines. 6. Social protection programs do not operate in a vacuum, and thus their delivery systems should not be developed in silos; synergies across institutions and information systems are possible and can improve program outcomes. 7. Social protection delivery systems can contribute more broadly to government’s ability to serve other sectors, such as health insurance subsidies, scholarships, social energy tariffs, housing benefits, and legal services. 8. The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems, through a dynamic, integrated, and human-centered approach.
