Literary Translation Clifford E. Landers,2001-09-13 In this book, both beginning and experienced translators will find pragmatic techniques for dealing with problems of literary translation, whatever the original language. Certain challenges and certain themes recur in translation, whatever the language pair. This guide proposes to help the translator navigate through them. Written in a witty and easy to read style, the book's hands-on approach will make it accessible to translators of any background. A significant portion of this Practical Guide is devoted to the question of how to go about finding an outlet for one's translations.

Translation into the Second Language Stuart Campbell,2014-08-27 The dynamics of

immigration, international commerce and the postcolonial world make it inevitable that much translation is done into a second language, despite the prevailing wisdom that translators should only work into their mother tongue. This book is the first study to explore the phenomenon of translation into a second language in a way that will interest applied linguists, translators and translation teachers, and ESOL teachers working with advanced level students. Rather than seeing translation into a second language as deficient output, this study adopts an interlanguage framework to consider L2 translation as the product of developing competence; learning to translate is seen as a special variety of second language acquisition. Through carefully worked case studies, separate components of translation competence are identified, among them the ability to create stylistically authentic texts in English, the ability to monitor and edit output, and the psychological attitudes that the translator brings to the task. While the case studies mainly deal with Arabic speakers undergoing translator training in Australia, the conclusions will have implications for translation into a second language, especially English, around the world. Translation into the Second Language is firmly grounded in empirical research, and in this regard it serves as a stimulus and a methodological guide for further research. It will be a valuable addition for advanced undergraduate and postgraduate students of applied linguistics, translation theory, bilingualism and second language acquisition as well as those involved in teaching or practicing translation at a professional level.

The Global Translator's Handbook Morry Sofer, 2012-12-16 A practical guide to translation as a profession, this book provides everything translators need to know, from digital equipment to translation techniques, dictionaries in over seventy languages, and sources of translation work. Gregory Rabassa and Marina Orellana.

Art of Translating Prose Burton Raffel, 2010-11-01

Training the Translator Paul Kussmaul, 1995-01-01 This book begins by investigating, through the use of think-aloud protocols, the mental processes of students when they translate. The creative and successful processes observed can be used directly for teaching purposes, while the unsuccessful ones can serve to find out where remedial training is needed. The book then goes on to discuss methods for improving a translator's competence. The strategies offered are based on the pragmatic and semantic analysis of texts from a functional point of view, and they include such practical matters as the use of dictionaries and the evaluation of translations and error analysis. The book is intended for teachers in translator-training institutions, but it can also be used by students for self-training.

The Beginning Translator's Workbook Michele H. Jones, 2014-03-18 This workbook combines methodology and practice for beginning translators with a solid proficiency in French. It assumes a linguistic approach to the problems of translation and addresses common pitfalls, including the delineation of "translation units", word polysemy, false cognates, and structural and cultural obstacles to literal translation. The first part of the book focuses on specific strategies used by professionals to counter these problems, including transposition, modulation, equivalence, and adaptation. The second part of the book provides a global application of the techniques taught in the opening sections, guiding the student through step-by-step translations of literary and non-literary excerpts. The revised edition clarifies some of the finer points of the translation techniques introduced in the

first edition, provides extra practice exercises, and offers information on a website that can be used in class.

Fundamentals of Translation Sonia Colina, 2015-04-02 Clear and concise, this textbook provides a non-technical introduction to the basic and central concepts of translation theory and practice, including translation briefs, parallel texts and textual functions, cohesion and coherence, and old and new information. Colina focuses on the key concepts that beginning students of translation, practising translators, language students and language professionals need to understand. Numerous exercises (discussion, group and individual) at the end of each chapter and 'Practice' activities throughout each chapter allow students to self-assess their practical understanding of chapter topics. In addition, examples, figures and text extracts from a wide variety of world languages contextualise chapter material and produce a lively and accessible narrative. Suitable for non-specialists with no prior experience of translation, it will also be of interest to practising translators, language students and language industry professionals who wish to gain a wider and up-to-date understanding of translation.

Challenging the Traditional Axioms Nike K. Pokorn, 2005-04-26 Translation into a non-mother tongue or inverse translation, especially of literary texts, has always been frowned upon within Translation Studies in Western cultures and regarded by literary scholars and linguists as an activity of dubious worth, doomed to fail. The study, which received an award from EST in 2001, sets out to challenge the established view and to critically question some of the axiomatic assumptions of Western theorists. Its challenge is supported by extensive empirical research involving reader response to translations of specific literary texts. The conclusion reached is that the quality of the translation, its fluency and acceptability in the target language environment depend primarily on the

as yet undetermined individual abilities of the particular translator, his/her translation strategy and knowledge of the source and target cultures, and not on his/her mother tongue or the direction in which s/he is translating.

Translation Universals Anna Mauranen, Pekka Kujamäki, 2004-01-29 Translation universals is one of the most intriguing and controversial topics in recent translation studies. Can we discover general laws of translation, independent of the particularities of individual translations? Research into this is new: serious empirical work only began in the late nineties. The present volume offers the state of the art on the issue. It includes theoretical discussion on alternative conceptualisations and new distinctions around the basic concepts. Several papers test hypotheses on universals in the light of recent work in different languages, and some suggest new ones emerging from empirical work over the last two to three years. The book contributes to the search for generalities in translation, the methodological solutions available, and presents emerging evidence on the kinds of regularities that large-scale research is bringing forth. On a more practical level, the applicability of the hypotheses and findings to translator education is, as always, a concern for translation studies.

The Translator as Writer Susan Bassnett, Peter Bush, 2007-11-15 Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. *The Translator as Writer* bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises

this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.

Becoming a Translator Douglas Robinson, 2019-12-06 Fusing theory with advice and information about the practicalities of translating, *Becoming a Translator* is the essential resource for novice and practicing translators. The book explains how the market works, helps translators learn how to translate faster and more accurately, as well as providing invaluable advice and tips about how to deal with potential problems, such as stress. The fourth edition has been revised and updated throughout, offering: a whole new chapter on multimedia translation, with a discussion of the move from intersemiotic translation to audiovisual translation, media access and accessibility studies new sections on cognitive translation studies, translation technology, online translator communities, crowd-sourced translation, and online ethnography tweetstorms capturing the best advice from top industry professionals on Twitter student voices, especially from Greater China Including suggestions for discussion, activities, and hints for the teaching of translation, and drawing on detailed advice from top translation professionals, the fourth edition of *Becoming a Translator* remains invaluable for students and teachers of Translation Studies, as well as those working in the field of translation.

Translation Practices , 2009-01-01 This cutting-edge collection, born of a belief in the value of

approaching 'translation' in a wide range of ways, contains essays of interest to students and scholars of translation, literary and textual studies. It provides insights into the relations between translation and comparative literature, contrastive linguistics, cultural studies, painting and other media. Subjects and authors discussed include: the translator as 'go-between'; the textual editor as translator; Ghirri's photography and Celati's fiction; the European lending library; La Bible d'Amiens; the coining of Italian phraseological units; Michèle Roberts's Impossible Saints; the impact of modern translations for stage on perceptions of ancient Greek drama; and the translation of slang, intensifiers, characterisation, desire, the self, and America in 1990s Italian fiction. The collection closes with David Platzer's discussion of translating Dacia Maraini's poetry into English and with his new translations of 'Ho Sognato una Stazione' ('I Dreamed of a Station') and 'Le Tue Bugie' ('Your Lies').

Targeting the Source Text Justine Brehm Cripps, 2004-12 Despite the evident need that the translators be experts in the use of its tongues of work, has themselves written very little on the question of how the apprentices of translating can come they possess the specific control of the tongues that need for the exercise of the profession.
