Revolutions in Human Biospecimen Study: Leveraging new technologies to explore the pathology, therapeutics and biomarkers for atherosclerotic disease Ying Wang,Michal Mokry,Kathryn L. Howe,2023-11-20 Over the last few years, new high-throughput biotechnologies are revolutionizing our ways to utilize human biospecimens for understanding atherosclerotic disease. These recent advances allow deep profiling of individual cells at the genomics, epigenomics, transcriptomics and proteomics levels, or even simultaneous detection of various combinations of 'Omics' in the same cell. Additionally, novel methods to integrate data at different levels from tissue sections and dissociated tissues are the emerging trends in large and institutional biobank studies. Growing literature has shown the value of such sequencing and bioinformatic strategies in shedding light on (1) how risk genes, as identified by the Genome-Wide Association Study, contribute to atherogenesis (genotype to phenotype), and (2) how features of atherosclerotic lesions affect patient response in clinical trials (phenotype to the clinical outcome). The hybrid of cutting-edge biotechnologies and bioinformatic approaches helps us maximize biobank resources to accelerate bench-to-bedside research.

Bombay Before Mumbai Prashant Kidambi,Manjiri Kamat,Rachel Dwyer,2019 'City of Gold', 'Urbs Prima in Indis', 'Maximum City': no Indian metropolis has captivated the public imagination quite like Mumbai. The past decade has seen an explosion of historical writing on the city that was once Bombay. This book, featuring new essays by its finest historians, presents a rich sample of Bombay's palimpsestic pasts. It considers the making of urban communities and spaces, the workings of power and the nationalist makeover of the colonial city. In addressing these themes, the contributors to this volume engage critically with the scholarship of a distinguished historian of this frenetic metropolis. For over five decades, Jim Masselos has brought to life with skill and empathy Bombay's hidden histories. His books and essays have traversed an extraordinarily diverse range of subjects, from the actions of the city's elites to the struggles of its most humble denizens. His pioneering research has opened up new perspectives and inspired those who have followed in his wake. *Bombay Before Mumbai* is a fitting tribute to Masselos' enduring contribution to South Asian urban history

WEBKDD 2002 - Mining Web Data for Discovering Usage Patterns and Profiles Osmar R. Zaiane,Jaideep Srivastava,Myra Spiliopoulou,Brij Masand,2003-10-02 1 WorkshopTheme Data mining as a discipline aims to relate the analysis of large amounts of user data to shed light on key business questions. Web usage mining in particular, a relatively young discipline, investigates methodologies and techniques that - dress the unique challenges of discovering insights from Web usage data, aiming to evaluate Web usability, understand the interests and expectations of users and assess the effectiveness of content delivery. The maturing and expanding Web presents a key driving force in the rapid growth of electronic commerce and a new channel for content providers. Customized offers and content, made possible by discovered knowledge about the customer, are fundamental for the establishment of viable e-commerce solutions and sustained and effective content delivery in noncommercial domains. Rich Web logs provide companies with data about their online visitors and prospective customers, allowing microsegmentation and personalized interactions. While Web mining as a domain is several years old, the challenges that characterize data analysis in this area continue to be formidable. Though processing data routinely takes up a major part of the effort in data mining, Web usage data presents further challenges based on the difficulties of assigning data streams to unique users and tracking them over time. New innovations are required to reliably reconstruct sessions, to ascertain similarity and differences between sessions, and to be able to segment online users into relevant groups.

Tables of IGY Monthly Median Ionospheric Data W. J. G. Beynon,C. M. Minnis,2013-10-22 Annals of the International Geophysical Year, Volume 19: Tables of IGY Monthly Median Ionospheric Data is the fifth of six volumes of I.G.Y. data containing tables of monthly median values of ionospheric characteristics for the period July 1957-January 1959 inclusive. The data are extracted from booklets, bulletins and data summaries of many kinds which have been prepared at ionospheric observatories and sent to one of the Discipline V World Data Centers at Boulder, Moscow, Slough, and Tokyo. This volume is composed of 21 chapters representing the stations, which are arranged in alphabetical order. The tables for each station are preceded by some of the more important information relating to the station. This information is taken from the Ionospheric Stations Manual (U.S.R.I., 1958) that also

contains hourly values of cos X and many other useful data. Both the U.R.S.I, three letter code and the C.S.A.G.I. number have been included in the tables to facilitate reference either to the Ionospheric Stations Manual or to Annals of the I.G.Y. Volume VII. This book will be of value to geophysicists, researchers, and workers in the allied fields.
