Alzheimer Discourse Vai Ramanathan,2013-11-05 This book deals with the narrative discourse--specifically lifestories--of 16 patients suffering from Alzheimer's disease (AD). It attempts to understand the discourse of these patients in contextual terms. Thus far, the dominant explanation for incoherence in AD speech has been largely provided by research in psycholinguistics, much of which has understood AD speech in terms of the progressively deteriorating nature of the disease. This study provides a complementary view by examining ways in which some social factors--audiences, setting, and time--influence the extensiveness and meaningfulness of AD talk. By offering both an examination of interactions across the data as well as analyzing particular cases in detail, this unusual study attempts to juxtapose some general insights regarding AD discourse with case-specific ones. Sociolinguistic analyses of the data demonstrate how certain audiences and particular settings set in motion discourse activities that either facilitate the patients' ability to recall their pasts or impede it. This analysis also includes a critical look at the researcher's contribution in negotiating and reinforcing these activities. Ethnographic details about the social worlds of some of these patients shed light on how larger social contexts at least indirectly contribute to exacerbating the patients' conditions or stabilizing them. The analyses of both context and language provides a more global understanding of the Alzheimer experience. This study also discusses some interactional strategies by which professionals can begin to engage AD patients in meaningful talk as well as ways by which they can better hear AD patients' cues at narrating. Throughout, this book underscores the need to factor in social factors when making assessments regarding AD patients' communicative abilities.

Acting in Person and in Style Jerry L. Crawford,Catherine Hurst,Michael Lugering,2010-01-07 Appropriate for both fundamental and advanced levels, the authors ground their commentary on actor training on the process of personalization and the innovative approaches to voice and movement training. They define the personalization process as one in which the actor discovers and explores in the self, characteristics, qualities, attitudes, and experiences that are legitimate dimensions of the role being created. Part I transitions from essential ingredients used in creating a role, such as focusing and speaking, to guidelines for auditioning and rehearsing, including role analysis. The discussions of basic acting principles are supported by skills-building exercises. Part II explores historical performance styles and shows how basic stylistic elements can be freshly adapted for modern audiences. Thus, in Part II, the authors center their discussions of voice, movement, character, and emotion around theatrical styles prevalent during certain historical periods and around sound acting theories gleaned from a wide range of acting traditions. Each chapter in this part ends with a helpful checklist that summarizes voice, movement, gesture, and other elements common to the era discussed.
