Advanced Information Networking and Applications Leonard Barolli,Farookh Hussain,Tomoya Enokido,2022-03-30 This book covers the theory, design and applications of computer networks, distributed computing and information systems. Networks of today are going through a rapid evolution, and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low-power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations is emerging as a critically important disruptive computer class based on a new

platform, networking structure and interface that enable novel, low-cost and high-volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications, different kinds of networks need to collaborate, and wired and next generation wireless systems should be integrated in order to develop high-performance computing solutions to problems arising from the complexities of these networks. The aim of the book "Advanced Information Networking and Applications" is to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.

Cybercrime Fighters Ayunda Nisa Chaira,2010-03-03 Hati-hati kalau berselancar di dunia maya! Soalnya, ada dua kejahatan di internet: hacker, yang cuma masuk ke data orang tanpa permisi, dan crakcker, yang paling berbahaya dari keduanya. Dia masuk ke data orang dan merusaknya, bahkan mencuri isinya: uang, informasi, dan rahasia! Di CIS, Cyber International School, Dilla dan Muthia belajar internet serta cara menggunakannya untuk kebaikan. Tapi, perkenalan mereka dengan Jessie, membawa petaka. HP Muthia error disabotase, dan Dilla punya popularitas tingkat baru: dipermalukan di sekolah melalui mading! Pelakunya tidak lain adalah Jessie. Olala, ternyata, Jessie seorang hacker! Dia yang merusak HP Muthia dari jarak jauh dan mengobok-obok blog pribadi Dilla lalu ditempel di mading. Bagaimana jadinya, ya, jika Cybercrime Fighters menyatukan mereka? Bisa nggak mereka akur di organisasi untuk memerangi para cracker tersebut? Apa yang terjadi ketika akhirnya mereka benar-benar berhadapan degan cracker yang asli? [DAR! Learning from Libraries that Use WordPress Kyle M. Jones,Polly-Alida Farrington,2013 With its intuitive interface and open-source development method, the WordPress web platform has emerged as a uniquely flexible content management system (CMS) with many library-related applications. In this book Jones and Farrington, two web designer/librarians, explore the variety of ways libraries are implementing WordPress as a CMS, from simple out-of-the-box websites to large sites with many custom features. Emphasizing a library-specific perspective, the authors Offer a brief history of WordPress, reviewing its genesis and sketching in some possible future directions Analyze the software's strengths and weaknesses, spotlighting its advantages over other existing web publishing platforms as well as discussing the limitations libraries have encountered Present a variety of case studies, offering first-hand examples which detail why WordPress was selected, methods of implementation and degree of customization, feedback from users, and reflections on usability Discuss essential plug-ins, themes, and other specialized applications for library sites This useful book shows how scores of libraries have used WordPress to create library websites that are both user-friendly and easy to maintain.

Visual Domain Adaptation in the Deep Learning Era

Gabriela Csurka,Timothy M. Hospedales,Mathieu Salzmann,Tatiana Tommasi,2022-06-06 Solving problems with deep neural networks typically relies on massive amounts of labeled training data to achieve high performance. While in many situations huge volumes of unlabeled data can be and often are generated and available, the cost of acquiring data labels remains high. Transfer learning (TL), and in particular domain adaptation (DA), has emerged as an effective solution to overcome the burden of annotation, exploiting the unlabeled data available from the target domain together with labeled data or pre-trained models from similar, yet different source domains. The aim of this book is to provide an overview of such DA/TL methods applied to computer vision, a field whose popularity has increased significantly in the last few years. We set the stage by revisiting the theoretical background and some of the historical shallow methods before discussing and comparing different domain adaptation strategies that exploit deep architectures for visual recognition. We introduce the space of self-training-based methods that draw inspiration from the related fields of deep semi-supervised and self-supervised learning in solving the deep domain adaptation. Going beyond the classic domain adaptation problem, we then explore the rich space of problem settings that arise when applying domain adaptation in practice such as partial or open-set DA, where source and target data categories do not fully overlap, continuous DA where the target data comes as a stream, and so on. We next consider the least restrictive setting of domain generalization (DG), as an extreme case where neither labeled nor unlabeled target data are available during training. Finally, we close by considering the emerging area of learning-to-learn and how it can be applied to further improve existing approaches to cross domain learning problems such as DA and DG.

The Secret War Between Downloading and Uploading Peter Lunenfeld,2011-04-22 As we hurtle into the twenty-first century,

will we be passive downloaders of content or active uploaders of meaning? The computer, writes Peter Lunenfeld, is the twenty-first century's culture machine. It is a dream device, serving as the mode of production, the means of distribution, and the site of reception. We haven't quite achieved the flying cars and robot butlers of futurist fantasies, but we do have a machine that can function as a typewriter and a printing press, a paintbrush and a gallery, a piano and a radio, the mail as well as the mail carier. But, warns Lunenfeld, we should temper our celebration with caution; we are engaged in a secret war between downloading and uploading—between passive consumption and active creation—and the outcome will shape our collective futures. In The Secret War Between Downloading and Uploading, Lunenfeld makes his case for using digital technologies to shift us from a consumption to a production model. He describes television as the "the high fructose corn syrup of the imagination" and worries that it can cause "cultural diabetes"; prescribes mindful downloading, meaningful uploading, and "info-triage" as cures; and offers tips for crafting "bespoke futures" in what he terms the era of "Web n.0" (interconnectivity to the nth power). He also offers a stand-alone genealogy of digital visionaries, distilling a history of the culture machine that runs from the Patriarchs (Vannevar Bush's WWII generation) to the Hustlers (Bill Gates and Steve Jobs) to the Searchers (Larry Page and Sergey Brin of Google fame). After half a century of television-conditioned consumption/downloading, Lunenfeld tells us, we now find ourselves with a vast new infrastructure for uploading. We simply need to find the will to make the best of it.

The eBay Business Handbook 4th Edition Robert Pugh,2015-01-26 Completely revised, updated and expanded new edition of the best-selling eBay business guide Anyone can buy

and sell on eBay. But how many people actually make serious money from eBay? How many people make enough give up the day job and run an eBay business full time? Robert Pugh has done just that and in this fully updated and revised fourth edition of his best-selling eBay Business Handbook he reveals the secrets of his success. Robert covers everything you need to know, from the basics of setting up your eBay account through to the creation and management of your own business. He gives you the information you need to use eBay to its full potential, to maximise returns and develop a robust online business. This book has been written for anyone who has ever considered the idea of being their own boss. Whether you want to supplement an existing income or you want a complete change in lifestyle, this book is for you - giving you the confidence and knowledge you need to make that step. Unlike many other eBay guides, this handbook is based on the personal experiences of an established Power Seller. Everything is covered; from the practical concerns of international sales to the purchase of packing materials. With a fresh, common sense approach to selling, there are many hints, tips and personal recommendations that can be applied to all of your eBay activities. One of the most valuable sections is dedicated to where to find stock to sell. Where traders obtain their stock is a closely guarded secret and often finding a source of stock can be quite daunting. This guide tells you where to look, how to buy from different sources and, perhaps most interesting of all, how to use eBay as a source of goods. New for the fourth edition: -- Understand and work with the new seller defect process. -- Take best advantage of recent developments and turn them into hard cash. -- Maximise your selling potential across all media, including mobile. -- How to work with the latest eBay fee structure, so you retain the most of your revenue. -- Share in the knowledge gleaned from over 100,000 eBay transactions. Discover how the author went from zero to over 53,000 positive feedbacks (and counting). From the very first LP record to the family car, he has sold items into almost every

corner of the globe and taken every form of payment known to man. Anybody can do this, just follow the simple steps in this guide, dedicate the time, and soon you too could be living the eBay dream.
