Contingency, Irony, and Solidarity Richard Rorty,1989-02-24 In this 1989 book Rorty argues that thinkers such as Nietzsche, Freud, and Wittgenstein have enabled societies to see themselves as historical contingencies, rather than as expressions of underlying, ahistorical human nature or as realizations of suprahistorical goals. This ironic perspective on the human condition is valuable on a private level, although it cannot advance the social or political goals of liberalism. In fact Rorty believes that it is literature not philosophy that can do this, by promoting a genuine sense of human solidarity. A truly liberal culture, acutely aware of its own historical contingency, would fuse the private, individual freedom of the ironic, philosophical perspective with the public project of human solidarity as it is engendered through the insights and sensibilities of great writers. The book has a characteristically wide range of reference from philosophy through social theory to literary criticism. It confirms Rorty's status as a uniquely subtle theorist, whose writing will prove absorbing to academic and nonacademic readers alike.

Characteristics of Hawaiian Volcanoes Michael P. Poland,Taeko Jane Takahashi,Claire M. Landowski,2014 *Characteristics of Hawaiian Volcanoes* establishes a benchmark for the current understanding of volcanism in Hawaii, and the articles herein build upon the elegant and pioneering work of Dutton, Jagger, Steams, and many other USGS and academic scientists. Each chapter synthesizes the lessons learned about a specific aspect of volcanism in Hawaii, based largely on continuous observation of eruptive activity and on systematic research into volcanic and earthquake processes during HVO's first 100 years. Visiting with the Ancestors Laura Peers,Alison K. Brown,2016-09-29 In 2010, five magnificent Blackfoot shirts, now owned by the University of Oxford's Pitt Rivers Museum, were brought to Alberta to be exhibited at the Glenbow Museum, in Calgary, and the Galt Museum, in Lethbridge. The shirts had not returned to Blackfoot territory since 1841, when officers of the Hudson's Bay Company acquired them. The shirts were later transported to England, where they had remained ever since. Exhibiting the shirts at the museums was, however, only one part of the project undertaken by Laura Peers and Alison Brown. Prior

to the installation of the exhibits, groups of Blackfoot people—hundreds altogether—participated in special “handling sessions,” in which they were able to touch the shirts and examine them up close. The shirts, some painted with mineral pigments and adorned with porcupine quillwork, others decorated with locks of human and horse hair, took the breath away of those who saw, smelled, and touched them. Long-dormant memories were awakened, and many of the participants described a powerful sense of connection and familiarity with the shirts, which still house the spirit of the ancestors who wore them. In the pages of this beautifully illustrated volume is the story of an effort to build a bridge between museums and source communities, in hopes of establishing stronger, more sustaining relationships between the two and spurring change in prevailing museum policies. Negotiating the tension between a museum’s institutional protocol and Blackfoot cultural protocol was challenging, but the experience described both by the authors and by Blackfoot contributors to the volume was transformative. Museums seek to preserve objects for posterity. This volume demonstrates that the emotional and spiritual power of objects does not vanish with the death of those who created them. For Blackfoot people today, these shirts are a living presence, one that evokes a sense of continuity and inspires pride in Blackfoot cultural heritage.

Capitalist Patriarchy and the Case for Socialist Feminism Zillah R. Eisenstein, 2019-06-01 Fourteen provocative papers on the oppression of women in capitalist countries, along with three articles on the subordinate position of women in two communist countries, Cuba and China. These important, often path-breaking articles are arranged in five basic sections, the titles of which indicate the broad range of issues being considered: Introduction; motherhood, reproduction, and male supremacy; socialist feminist historical analysis; patriarchy in revolutionary society; socialist feminism in the United States. The underlying thrust of the book is

toward integrating the central ideas of radical feminist thought with those pivotal for Marxist or socialist class analysis.

Monitoring Behavior and Supervisory Control T.

Sheridan, 2013-03-09 This book includes all papers presented at the International Symposium on Monitoring Behavior and Supervisory Control held at Berchtesgaden, Federal Republic of Germany, March 8-12, 1976. The Symposium was sponsored by the Scientific Affairs Division of the North Atlantic Treaty Organization, Brussels, and the government of the Federal Republic of Germany, Bonn. We believe the book constitutes an important and timely status report on monitoring behavior and supervisory control by human operators of complex man-machine systems in which the computer is sharing key functions with the man. These systems include aircraft and other vehicles, nuclear and more conventional power plants, and processes for the manufacture of chemicals, petroleum, and discrete parts. By monitoring we mean the systematic observation by a human operator of multiple sources of information, e. g. , ranging from integrated display consoles to disparate live situations. The monitor's purpose is to determine whether operations are normal and proceeding as desired, and to diagnose difficulties in the case of abnormality or undesirable outcomes. By supervisory control we mean control by a human operator of a computer which, at a lower level, is controlling a dynamic system. In such systems, the computer-control normally operates continuously or at high data rates in loops closed through electromechanical sensors and motors. By contrast, the human operator normally signals or reprograms the computer intermittently or at a much slower pace. The human operator handles the higher level tasks and determines the goals of the overall system.
