Failed Images Ernst van Alphen,2018 'Failed Images' attempts to understand the divergence between photography and the reality it portrays, analysing the various ways the photograph transforms that which exists before the camera. Because the photographic medium enables very different practices, which in turn results in many kinds of images, it must also be examined from a perspective outside of the dominant approach to the medium, generally called the 'snapshot.' This book therefore explores the photographic image by focusing on practices which refuse this conventional approach, namely staged, blurred, under- and overexposed, and archival photography.

John Heartfield and the Agitated Image Andrés Mario Zervigón,2012-12-01 Working in Germany between the two world wars, John Heartfield (born Helmut Herzfeld, 1891–1968) developed an innovative method of appropriating and reusing photographs to powerful political effect. As a pioneer of modern photomontage, he sliced up mass media photos with his iconic scissors and then reassembled the fragments into compositions that utterly transformed the meaning of the originals. In John Heartfield and the Agitated Image, Andrés Mario Zervigón explores this crucial period in the life and work of a brilliant, radical artist whose desire to disclose the truth obscured by the mainstream press and imperial propaganda made him a de facto prosecutor of Germany's visual culture. Zervigón charts the evolution of Heartfield's photomontage from an act of antiwar resistance into a formalized and widely disseminated political art in the Weimar Republic. Appearing on everything from campaign posters to book covers, the photomonteur's notorious pictures challenged well-worn assumption and correspondingly walked a dangerous tightrope over the political, social, and cultural cauldron that was interwar Germany. Zervigón explains how Heartfield's engagement with montage arose from a broadly-shared dissatisfaction with photography's capacity to represent the modern world. The result was likely the most important combination of avant-garde art and politics in the twentieth century. A rare look at Heartfield's early and middle years as an artist and designer, this book provides a new understanding of photography's role at this critical juncture in history.

The Image of the City Kevin Lynch,1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Earmarked for Collision Chris Robinson,2023-05-25 Collage art and film date back to the early 20th century (the earliest collages have roots in 12th-century Japan). It was rooted in the age of consumerism where artists addressed an array of political and social issues by creating a carefully crafted collision of pre-existing images and sounds to generate new meanings and commentaries on the surrounding world. Collage has also pushed the boundaries of animation, by incorporating other artistic forms (e.g., photography, live action, experimental cinema, literature, found sound) while exploring an array of social, cultural and political issues. In Earmarked for Collision, award-winning writer Chris Robinson (The Animation Pimp, Mad Eyed Misfits, Unsung Heroes of Animation) takes us on a tour of the history of collage animation, cataloguing the collage works of notable artists like Larry Jordan, Harry Smith, Stan Vanderbeek, Terry Gilliam, Janie Geiser, Martha Colburn, Lewis Klahr, Run Wrake, Lei Lei, Kelly Sears, Jodie Mack, and many, many others.

Object:photo Mitra Abbaspour,Lee Ann Daffner,Maria Morris Hambourg,2014 OBJECT:PHOTO shifts the dialogue about modernist photography from an emphasis on the

subject and the image to the actual photographic object, created by a certain artist at a particular time and present today in its unique physicality. This shift is especially significant for a study of the period during which photography developed a distinctive formal language. A growing awareness of the rarity of images made between the two world wars has altered historians' considerations, encouraging new approaches privileging the originality of each work and the density of references each contains. This richly illustrated publication culminates a four-year collaborative research endeavor between The Museum of Modern Art's Departments of Photography and Conservation, and nearly 30 visiting scholars, on the material and aesthetic evolution of avant-garde photography in the early twentieth century. The 341 modernist photographs known as The Thomas Walther Collection, a major museum acquisition made in 2001, is presented in its entirety, establishing a new standard of depth for the medium. Essays by curators, researchers, and conservators consider the history of collecting from this era to the present and how deepening knowledge has shifted the perspective on the medium; the material facts of the Walther pictures as a baseline for understanding the development of photographic materials in this era; and how the intellectual formation of the writers of critical photographic publications of the era and the societal and cultural pressures of that historical moment inflected the photography's sense of its own history. Together with thematic, object-based case studies of groups of pictures that demonstrate new approaches in specific, divergent examples, these contributions reanimate the dialogue on this formative era in photography.

Myself and My Aims Kurt Schwitters,2021-03-10 Kurt Schwitters was a major protagonist in the histories of modern art and literature, whose response to the contradictions of modern life rivals that of Marcel Duchamp in its importance for artists working today. His celebrated Merz pictures—collaged and assembled from the scrap materials of popular culture and the debris of the studio, such as newspaper clippings, wood, cardboard, fabric, and paint—reflect a lifelong interest in collection, fragmentation, and abstraction, techniques he also applied to language and graphic design. As the first anthology in English of the critical and theoretical writings of this influential artist, Myself and My Aims makes the case for Schwitters as one of the most creative thinkers of his generation. Including material that has never before been published, this volume presents the full range of his prolific writing on the art and attitudes of his time, joining existing translations of his children's stories, poetry, and fiction to give new readers unprecedented access to his literary imagination. With an accessible introduction by Megan R. Luke and elegant English translations by Timothy Grundy, this book will prove an exceptional resource for artists, scholars, and enthusiasts of his art.
