The Palgrave Handbook of Disability and Communication Michael S. Jeffress, Joy M. Cypher, Jim Ferris, Julie-Ann Scott-Pollock, 2023-03-29 The Palgrave Handbook of Disability and Communication covers a broad spectrum of topics related to how we perceive and understand disability and the language, constructs, constraints and communication behavior that shape disability discourse within society. The essays and original research presented in this volume address important matters of disability identity and intersectionality, broader cultural narratives and representation, institutional constructs and constraints, and points related to disability justice, advocacy, and public policy. In doing so, this book brings together a diverse group of over 40 international scholars to address timely problems and to promote disability justice by interrogating the way people communicate not only to people with disabilities, but also how we communicate about disability, and how people express themselves through their disabled identity.

Engaging with Historical Traumas Nena Močnik, Ger Duijzings, Hanna Meretoja, Bonface Njeresu Beti, 2021-07-12 This book provides case-studies of how teachers and practitioners have attempted to develop more effective 'experiential learning' strategies in order to better equip students for their voluntary engagements in communities, working for sustainable peace and a tolerant society free of discrimination. All chapters revolve around this central theme, testing and trying various paradigms and experimenting with different practices, in a wide range of geographical and historical arenas. They demonstrate the innovative potentials of connecting know-how from different disciplines and combining experiences from various practitioners

in this field of shaping historical memory, including non-formal and formal sectors of education, non-governmental workers, professionals from memorial sites and museums, local and global activists, artists, and engaged individuals. In so doing, they address the topic of collective historical traumas in ways that go beyond conventional classroom methods. Interdisciplinary in approach, the book provides a combination of theoretical reflections and concrete pedagogical suggestions that will appeal to educators working across history, sociology, political science, peace education and civil awareness education, as well as memory activists and remembrance practitioners.

The Hybrid Face Massimo Leone, 2023-12-12 This original and interdisciplinary volume explores the contemporary semiotic dimensions of the face from both scientific and sociocultural perspectives, putting forward several traditions, aspects, and signs of the human utopia of creating a hybrid face. The book semiotically delves into the multifaceted realm of the digital face, exploring its biological and social functions, the concept of masks, the impact of COVID-19, AI systems, digital portraiture, symbolic faces in films, viral communication, alien depictions, personhood in video games, online intimacy, and digital memorials. The human face is increasingly living a life that is not only that of the biological body but also that of its digital avatar, spread through a myriad of new channels and transformable through filters, post-productions, digital cosmetics, all the way to the creation of deepfakes. The digital face expresses new and

largely unknown meanings, which this book explores and analyzes through an interdisciplinary but systematic approach. The volume will interest researchers, scholars, and advanced students who are interested in digital humanities, communication studies, semiotics, visual studies, visual anthropology, cultural studies, and, broadly speaking, innovative approaches about the meaning of the face in present-day digital societies.

Interactional Humor Béatrice Priego-Valverde, 2023-12-04 The central question explored in this volume is: How is humor multimodally produced, perceived, responded to, and negotiated? To this end, it offers a panorama of linguistic research on multimodal and interactional humor, based on different theoretical frameworks, corpora, and methodologies. Humor is considered as an activity that is interactionally achieved, regardless of whether the interaction in which it is embedded is face-to-face, computer-mediated, with a human or a robot, oral or written. The aim is to analyze both the linguistic resources of the participants (such as their lexicon, prosody, gestures, gazes, or smiles) and the semiotic resources that social networks and instant messaging platforms offer them (such as memes, gifs, or emojis).

Middleworld Jon Voelkel, Pamela Voelkel, 2010-04 When his archaeologist parents go missing in Central America, fourteen-year-old Max embarks on a wild adventure through the Mayan underworld in search of the legendary Jaguar Stones, which enabled ancient Mayan kings to wield the powers of living gods. Includes cast of characters, glossary, facts about the Maya cosmos and calendar, and a recipe for chicken tamales.

COVID Communication Douglas A. Vakoch, John C. Pollock, Amanda M. Caleb, 2023-05-30 This book focuses on how we understand COVID-19—medically, socially, and rhetorically. Given the expectation that other flu pandemics will occur, it stresses the importance of examining how the public response is shaped in the face of global health emergencies. It considers questions such as how can pandemic language both limit and expand our

understanding of disease as biomedical, social, and experiential? In what ways can health communication be improved through the study and application of rhetoric and the health humanities? COVID Communication fills a gap in the pandemic literature by promoting interdisciplinary analysis of communication methods, realized through a health humanities approach. It centers human experience and culture within conversations about the biological reality of a pandemic. This volume will be a welcome contribution to the scientific investigations and practice of psychology and public health professionals. Interdisciplinary perspective New insights on how a pandemic is understood Highlights the relevance to important usually neglected relevance for psychology and public health professionals Endorsements of COVID Communication "In an era of the COVID-19 pandemic crisis, COVID Communication provides a smart, urgent alternative to our collective downward spiral, not only offering a fiery critique of our selfish and self-destructive present but also providing galvanizing, positive visions of what futures we might hope for." – Shailendra Saxena, King George's Medical University, India; editor of Coronavirus Disease 2019 (COVID-19): Epidemiology, Pathogenesis, Diagnosis, and Therapeutics "COVID Communication shows that the pandemic affects us not only because it makes us sick or ruins our economy, but also because of how it is spoken, written, and thought about, ultimately because of how it is socially constructed. An original and very necessary look to arm ourselves intellectually against the pandemic." – Alberto del Campo Tejedor, Pablo de Olavide University, Spain; author of La infame fama del andaluz "The COVID-19 pandemic represented a global challenge that needed nations and their people to come together, find a joint response, and build a narrative that was clear, consistent, inclusive,

and respectful of people. The reality, however, is that the responses to the pandemic reflected the ideologies of national leaders, political leaders, media outlets, and activists, leading to a fragmented and at times polarized global discourse. This important work examines the different narratives that circulated within the information environment to explore how these may have led to differing levels of trust in politicians, in science, and in one another. Through an analysis of rhetoric across diverse nations and platforms, the chapters provide a framework that is crucial for understanding the interplay between discourse, cognition, and behavior.” – Darren Lilleker, Bournemouth University, UK; co-editor of *Political Communication and COVID-19: Governance and Rhetoric in Times of Crisis* “This book presents a collection of must-read scholarly chapters that illustrate a panoramic view of how people from different countries and cultures communicate about this global pandemic. These chapters paint a rich canvas of thoughts, emotions, reactions, and actions through communication expressions, ranging from intuitive rhetoric and probing cartoons to emotional memes and creative advertising. The book is a great resource for aiding health communication scholars, instructors, professionals, journalists, and students in enhancing their COVID-19 research, teaching, practice, reporting, and learning.” – Carolyn A. Lin, University of Connecticut, USA; co-editor of *Communication Technology and Social Change: Theory and Implications* “In an era of cultural anxiety caused by the global pandemic and social unrest, COVID Communication could not be timelier. Presenting broad cross-cultural and multi-modal perspectives on media portrayals of the illness that has caused so much suffering and uncertainty, this insightful book offers a ‘rhetorical toolkit’

that gives us tools to navigate the maze of modern communication with a deeper understanding of the power of language in the time of social media. It is a perfect resource for classes on media literacy, while it is useful to anyone who wants to become a more active, independent, and secure consumer of the media in the age of information abundance.” – Katja Plemenitaš, University of Maribor, Slovenia; co-author of Josip Hutter and the Dwelling Culture of Maribor “COVID-19, as a disaster and series of converging crises, has forever shaped society. COVID Communication offers an easy-to-read, unparalleled academic-practitioner focus to help understand the cultural, social, economic, political, community health, and personal risk assessment aspects of communication during and after the COVID-19 pandemic. Together, in a ground-breaking analysis that enhances the rich intellectual tradition of the field of communications, each chapter in COVID Communication offers readers the opportunity to view multiple media sources and approaches that engender a deeper understanding of health information and communication during and after COVID-19 and its ensuing crises.” – DeMond S. Miller, Rowan University, USA; co-editor of Community Disaster Recovery and Resiliency: Exploring Global Opportunities and Challenges “With its twenty-one chapters exploring a wide spectrum of issues ranging from individual and social responses to the global coronavirus breakout to the divergent narrative patterns identified from various countries, COVID Communication is indeed a timely and significant guide to understanding the recent pandemic. The collection makes the reader realize and acknowledge the multitude of complex, intersecting factors and processes that are relevant to comprehend the coronavirus pandemic and to cope with its various representations.” – Şemsettin

The Pragmatics of Internet Memes Chaoqun

Xie, 2022-05-15 What is a meme? What is in a meme? What does 'living in/with memes' actually mean? What do memes mean to human beings dwelling in a life-world at once connected and fragmented by the internet and social media? Answers to and ways of answering these and other meme questions that arise in social events represent human assistance in or resistance to meaning making. A pragmatic perspective on internet memes as a way of seeing in social life experience offers a unique window on how meme matters in mediated (inter)actions turn out to be inextricably intertwined with human beings' presencing and essencing in the life-world. Ultimately, this volume seeks to reveal what and how serious if not unsayable concerns can be concealed behind the seemingly humorous, carefree and colorful carnival of internet memes across cultures, contexts, genres and modalities. This book will be of some value to anyone keen on the dynamics of memes and internet pragmatics and on critical insights that can be garnered in kaleidoscopic multimodal communication. Originally published as special issue of *Internet Pragmatics* 3:2 (2020).

THE GREATEST LIES EVER SOLD ELIAS

DEMETRIOU, 2023-04-28 This book is the story of the Global Elites and their Great Reset. It focuses mainly on Covid-19 but also touches on other aspects of the agenda, including: the Russia/Ukraine conflict, the economic crisis, climate change and Artificial Intelligence. The author has provided much information through painstaking research and has re-written over 100 famous songs accordingly. Also included are dozens upon dozens of fascinating images relating to it all, including self made memes. All of which are

clever, funny and relevant to the cause. The intention is to wake up the masses to the great deception of the greatest lies ever sold.

Not What The Bus Promised Tamara Hervey, Ivanka Antova, Mark L Flear, Matthew Wood, 2023-10-05 What does the UK's exit from the EU mean for health and the NHS? This book explains the legal and practical implications of Brexit on the NHS: its staffing; especially on the island of Ireland; medicines, medical devices and equipment; and biomedical research. It considers the UK's post-Brexit trade agreements and what they mean for health, and discusses the effects of the COVID-19 pandemic on post-Brexit health law. To put the legal analysis in context, the book draws on over 400 conversations the authors had with people in the north of England and Northern Ireland, interviews with over 40 health policy stakeholders, details of a film about their research made with ShoutOut UK, the authors' work with Parliaments and governments across the UK, and their collaborations with key actors like the NHS Confederation, the British Medical Association, and Cancer Research UK. The book shows that the language people use to talk about hoped-for legitimate post-Brexit health governance suggests a great deal of faith in law and legal process among 'ordinary people', but the opposite from 'insider elites'. **Not What The Bus Promised** puts the authors' knowledge and experiences centre frame, rather than claiming to express 'objective reality'. It will be of interest to any reader who cares about the NHS and wants to understand its present and future.

Taboos and Controversial Issues in Foreign Language Education Christian Ludwig, Theresa Summer, 2023-02-24 This edited volume provides innovative insights into how critical language pedagogy and taboo topics can inform and transform the teaching and learning of foreign languages.

The book investigates the potential as well as the challenges involved in dealing with taboo topics in the foreign language classroom. Traditionally subsumed under the acronym PARSNIP (politics, alcohol, religion, narcotics, isms, and pork). By examining how additional controversial topics such as disability, racism, conspiracy theories and taboo language can be integrated into conceptual teaching frameworks and teaching practice, this edited volume draws on examples from literary texts and pop culture such as young adult novels, music videos, or rap songs and investigates their potential for developing critical literacies. The book considers foreign language teaching outside of English teaching contexts and sets the groundwork for addressing the integration of taboo topics in foreign language education theory, research, and practice. Filling an important gap in educational research, the book will be of great interest to researchers, academics, and students of foreign language education, critical pedagogy, and applied linguistics. It will also be useful reading for teacher trainers and educators of foreign language education. Chapter 1 of this book is available for free in PDF format as Open Access from the individual product page at www.taylorfrancis.com. It has been made available under a Creative Commons Attribution 4.0 International license. Funded by the University of Bamberg.

Open Educational Resources in Higher Education

Jako Olivier, Andreas Rambow, 2023-02-07 This book explores open educational resources and open education through research conducted on this topic globally. This book engages with intersections between open educational resources, social justice and equality, as well as policy in terms of open educational resources. Numerous examples of open praxis are also included, ranging from open educational resources courses to the affordances

of artificial intelligence, data-driven learning, and open textbooks in this context. Furthermore, chapters range from providing a broad overview of open educational resources international and regional initiatives in Africa, to cases of work done in the United States, New Zealand, Israel, and Hong Kong. The role of Wikipedia and Wikidata is also prominent. Finally, this book includes unique contributions, focusing on open educational resources and feminist pedagogy, as well as disabled learners' motivations for participating in Massive Open Online Courses (MOOCs). Academics and researchers working in the field of open education and higher education in general will understand the importance of this work.

Isn't it Ironic? Ian Kinane, 2021-04-25 This volume addresses the relationship between irony and popular culture and the role of the consumer in determining and disseminating meaning. Arguing that in a cultural climate largely characterised by fractious communications and perilous linguistic exchanges, the very role of irony in popular culture needs to come under greater scrutiny, it focuses on the many uses, abuses, and misunderstandings of irony in contemporary popular culture, and explores the troubling political populism at the heart of many supposedly satirical and (apparently) non-satirical texts. In an environment in which irony is frequently claimed as a defence for material and behaviour judged controversial, how do we, as a society entrenched in forms of popular culture and media, interpret work that is intended as satire but which reads as unironic? How do we accurately decode works of popular film, literature, television, music, and other cultural forms which sell themselves as bitinglly ironic commentaries on current society, but which are also problematic celebrations of the very issues they purport to critique? And what happens when texts intended and received in one

manner are themselves ironically recontextualised in another? Bringing together studies across a range of cultural texts including popular music, film and television, Isn't it Irony? will appeal to scholars of the social sciences and humanities with interests in cultural studies, media studies, popular culture, literary studies and sociology.

Viral Discourse Rodney H. Jones, 2021-03-11 This Element consists of ten short pieces written by prominent discourse analysts in the midst of the COVID-19 pandemic. Each piece focuses on a different aspect of the pandemic, from the debate over wearing face masks to the metaphors used by politicians and journalists in different countries to talk about the virus. Each of the pieces also makes use of a different approach to analysing discourse (e.g. Critical Discourse Analysis, Genre Analysis, Corpus Assisted Discourse Analysis) and demonstrates how that approach can be applied to a small set of data. The aim of the Element is to show how the range of tools available to discourse analysts can be brought to bear on a pressing, 'real-world' problem, and how discourse analysis can contribute to formulating 'real-world' solutions to the problem.

Introduction to Sociology George

Ritzer, 2017-09-15 This Fourth Edition of George Ritzer's Introduction to Sociology shows students the relevance of sociology to their lives. While providing a rock-solid foundation, Ritzer illuminates traditional sociological concepts and theories, as well as some of the most compelling contemporary social phenomena: globalization, consumer culture, the digital world, and the "McDonaldization" of society. With examples on every page from current events and contemporary research, and stories about "public" sociologists who are engaging with the critical issues of today, the text demonstrates the power of sociology to explain the world, and the diversity of questions that sociologists seek to answer. New to this Edition New "Trending" boxes focus on influential books written by sociologists that have become part of the public conversation about important issues. Replacing "Public Sociology" boxes, these boxes demonstrate the diversity of sociology's practitioners, methods, and subject matter, and feature such authors as: Michelle Alexander (The New Jim Crow) Elizabeth Armstrong and Laura Hamilton (Paying for the Party) Randol Contreras (The Stick-Up Kids) Matthew Desmond (Evicted) Kimberly Hoang (Dealing in Desire) Arlie Hochschild (Strangers in Their Own Land) Eric Klinenberg (Going Solo) C.J. Pascoe (Dude, You're a Fag) Lori Peek and Alice Fothergill (Children of Katrina) Allison Pugh (The Tumbleweed Society) Updated examples in the text and Digital Living boxes keep pace with changes in digital technology and online practices, including Uber, bitcoin, net neutrality, digital privacy, WikiLeaks, and cyberactivism. New or updated subjects apply sociological thinking to the latest issues including: the 2016 U.S. election Brexit the global growth of ISIS climate change President Trump's proposed Mexican border wall further
