What is a Crime? Law Commission of Canada, 2004 We all have notions of what it means to commit a crime. Most of us are very much aware of the behaviours which, by law, constitute crime. Rarely, however, do we stop to consider why certain activities and behaviours are deemed criminal and others are not. A brilliant and provocative volume, *What Is A Crime?* forces us to reconsider both how we define criminal conduct in contemporary society, and how we respond to it once it has been identified. Drawing from diverse scholarly traditions -- including law, sociology, criminology and socio-legal studies -- contributors to this collection reflect on the processes of defining crime, and consider the varied and complex implications of our decisions to criminalize certain unwanted behaviour. Employing various case studies, the contributors reflect on the social processes that inform definitions of crime, criminal law, and its enforcement, while illuminating the subjective

nature of crime and questioning the role of law in dealing with complex social issues. Collectively, the authors provide a critical dialogue on law and governance in contemporary society. *What Is A Crime?* will be of interest to a broad spectrum of readers with an interest in the governance of crime and its control in contemporary society. Students and scholars of law, sociology, political science, philosophy, and criminology will find this book invaluable in furthering their understanding of the processes of defining and responding to crime and criminal behaviour. It will also hold sway with policymakers, criminal justice practitioners, and anyone with a stake in our current approaches to crime.

The Ageless Generation Alex Zhavoronkov, 2013-07-02 Over the past 20 years, the biomedical research community has been delivering hundreds of breakthroughs expected to extend human lifespan beyond thresholds imaginable today. However, much of this research has not yet been adopted into clinical practice, nor has it been widely publicized. Biomedicine will transform our society forever by allowing people to live longer and to continue working and contributing financially to the economy longer, rather than entering into

retirement and draining the economy through pensions and senior healthcare. Old age will become a concept of the past, breakthroughs in regenerative medicine will continue, and an unprecedented boom to the global economy, with an influx of older able-bodied workers and consumers, will be a reality. A leading expert in aging research, author Alex Zhavoronkov provides a helicopter view on the progress science has already made, from repairing tissue damage to growing functional organs from a single cell, and illuminates the possibilities that the scientific and medical community will soon make into realities. The Ageless Generation is an engaging work that causes us to rethink our ideas of age and ability in the modern world.

Making Digital Cultures Martin Hand,2016-05-13 Many people in the West or

global North now live in a culture of 24/7 instant messaging, iPods and MP3s, streamed content, blogs, ubiquitous digital images and Facebook. But they are also surrounded by even more paper, books, telephone calls and material objects of one kind or another. The juxtaposition and proliferation of older and newer technologies is striking. Making Digital Cultures brings together recent theorizing of the 'digital age' with empirical studies of how institutions embrace these technologies in relation to older established technological objects, processes and practices. It asks how relations between 'analogue' and 'digital' are conceptualized and configured both in theory and inside the public library, the business organization and the archive. With its direct engagement with new media theory, science and technology studies, and cultural sociology, this volume will be of interest to scholars and students in the areas of media and communication and science and technology studies.
