Locating the Moving Image Julia Hallam,Les Roberts,2013-11-07 Essays exploring the methodologies used by film scholars to develop a spatial history of the moving image. Leading scholars in the interdisciplinary field of geo-spatial visual studies examine the social experience of cinema and the different ways in which film production developed as a commercial enterprise, as a leisure activity, and as modes of expression and communication. Their research charts new pathways in mapping the relationship between film production and local film practices, theatrical exhibition circuits and cinema going, creating new forms of spatial anthropology. Topics include cinematic practices in rural and urban communities, development of cinema by amateur filmmakers, and use of GIS in mapping the spatial development of film production and cinema going as social practices. "Introduces some of the concrete ways practical mapping and GIS technologies help elaborate historical film projects. . . . The scope of many of these projects is breathtaking in scale. . . . Others embrace ethnographic methods that tell poignant individual stories. Still others deftly merge qualitative and quantitative approaches. . . . As a whole, the volume brings together disparate fields of study in interesting ways." -James Craine, California State University, Northridge "This collection breaks new ground for cinema history. Hallam and Roberts have gathered some of the foremost scholars who are mapping spatial histories of the moving image and the geographies of film production, distribution and consumption. Introducing new interdisciplinary methods and asking new questions, Locating the Moving Image takes film studies into new territory, beyond the boundaries of the text and its interpretation, towards an understanding of the relationship between culture, spatiality and place." -Richard Maltby, Matthew Flinders Distinguished Professor of Screen Studies, Flinders University

Telling the Map Christopher Rowe,2017-07-17 There are ten stories here including one readers have waited ten long years for: in new novel-la The Border State Rowe revisits the world of his much-lauded story The Voluntary State. Competitive cyclists twins Michael and Maggie have trained all their lives to race internationally. One thing holds them back: their mother who years before crossed the border ... into Tennessee. Praise for Christopher Rowe: "Rowe's stories are the kind of thing you want on a cold, winter's night when the fire starts burning low. Terrific." -Justina Robson (Glorious Angels) "As good as he is now, he'll keep getting better. Read these excellent stories, and see what I mean."-Jack Womack (Going, Going, Gone) "Rowe's work might remind you of that of Andy Duncan. Both exemplify an archetypically Southern viewpoint on life's mysteries, a worldview that admits marvels in the most common of circumstances and narrates those unreal intrusions in a kind of downhome manner that belies real sophistication."- Asimov's "As smooth and heady as good Kentucky bourbon."- Locus Christopher Rowe's stories have been finalists for the Hugo, Nebula, World Fantasy, and Theodore Sturgeon awards, frequently reprinted, translated into a half-dozen languages, praised by the New York Times Book Review, and long listed in the Best American Short Stories. He holds an MFA from the Bluegrass Writer's Studio. Rowe and his wife Gwenda Bond co-write the Supernormal Sleuthing Series for children, and reside in a hundred-year-old house in Lexington, Kentucky.

In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll

learn how to: • Create and delete files, directories, and symlinks • Administer your system, including networking, package installation, and process management • Use standard input and output, redirection, and pipelines • Edit files with Vi, the world's most popular text editor • Write shell scripts to automate common or boring tasks • Slice and dice text files with cut, paste, grep, patch, and sed Once you overcome your initial shell shock, you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust.

The Revolution Will Not Be Funded INCITE!,2017-01-13 A trillion-dollar industry, the US non-profit sector is one of the world's largest economies. From art museums and university hospitals to think tanks and church charities, over 1.5 million organizations of staggering diversity share the tax-exempt 501(c)(3) designation, if little else. Many social justice organizations have joined this world, often blunting political goals to satisfy government and foundation mandates. But even as funding shrinks, many activists often find it difficult to imagine movement-building outside the non-profit model. The Revolution Will Not Be Funded gathers essays by radical activists, educators, and non-profit staff from around the globe who critically rethink the long-term consequences of what they call the non-profit industrial complex. Drawing on their own experiences, the contributors track the history of non-profits and provide strategies to transform and work outside them. Urgent and visionary, The Revolution Will Not Be Funded presents a biting critique of the quietly devastating role the non-profit industrial complex plays in managing dissent. Contributors.
