Arne Dahl

Getting Started with Sensors Kimmo Karvinen,Tero Karvinen,2014-08-14 To build electronic projects that can sense the physical world, you need to build circuits based around sensors: electronic components that react to physical phenomena by sending an electrical signal. Even with only basic electronic components, you can build useful and educational sensor projects. But if you incorporate Arduino or Raspberry Pi into your project, you can build much more sophisticated projects that can react in interesting ways and even connect to the Internet. This book starts by teaching you the basic electronic circuits to read and react to a sensor. It then goes on to show how to use Arduino to develop sensor systems, and wraps up by teaching you how to build sensor projects with the Linux-powered Raspberry Pi.

To the Top of the Mountain Arne Dahl,2014-06-26 A man is blown up in a high-security prison. A major drugs baron comes under attack. A massacre takes place in a dark suburb. Detective Paul Hjelm and his team have been disbanded and discredited, the six detectives scattered throughout Sweden. But now something dangerous is approaching, and only Hjelm and his team can stop it.
