Excel 2003 Expert Adrienne Tommy,2004 This book is made up of five parts, each dealing with a specific topic: managing data (named ranges, import/export, lists and filters, publishing Web pages, using XML with Excel etc), tools for analysing data (including auditing tools, what-if analysis tools, pivot tables and charts), templates, working in a team (sharing and protecting data), configuring menus, toolbars and default settings, and a basic guide to working with macros. Each chapter is independent of the others, so that you can choose what to study, and in what order. At the end of the book, you will find the official list of topics tested in the MOS Excel 2003 Expert exam. The number of the corresponding lesson and exercise is given next to each topic in the list.

Developing Quality Metadata Cliff Wootton,2009-10-16 With the explosion of new audio and video content on the Web, it's more important than ever to use accurate and comprehensive metadata to get the most out of that content. Developing Quality Metadata is an advanced user guide that will help you improve your metadata by making it accurate and coherent with your own solutions. This book is designed to get you thinking about solving problems in a proactive and productive way by including practical descriptions of powerful programming tools and user techniques using several programming languages. For example, you can use shell scripting as part of the graphic arts and media production process, or you can use a popular spreadsheet application to drive your workflow. The concepts explored in this book are framed within the context of a multimedia professional working on the Web or in broadcasting, but they are relevant to anyone responsible for a growing library of content, be it audio-visual, text, or financial.
